POLICE HEALTH MANAGEMENT INFORMATION SYSTEM (PHMIS)

USER MANUAL

PREFACE

This User Manual is designed to assist healthcare personnel in navigating and utilizing the Police Health Management Information System (PHMIS) effectively. The system has been developed to digitalize and centralize patient data, enabling healthcare providers to offer better patient care, streamline healthcare processes, and enhance data security.

PHMIS is designed to empower healthcare professionals and staff with the tools necessary to deliver high-quality patient care while maintaining the highest standards of data privacy and security.

The successful implementation of PHMIS is expected to bring the following benefits:

i. Improved patient care and outcomes due to better access to patient records and medical data.
ii. Enhanced management of healthcare resources, leading to more efficient and cost-effective service delivery.
iii. Better tracking of disease trends and healthcare performance.
iv. Strengthened capacity and skills of healthcare personnel through training and support.
v. Increased overall satisfaction among both healthcare providers and patients.

This manual serves as a valuable reference tool for using the system to manage health operations efficiently and accurately.

1.0 Introduction to PHMIS User Manual

Welcome to the PHMIS User Manual. This comprehensive guide is designed to assist you in navigating and utilizing PHMIS effectively and efficiently. Whether you are a healthcare provider, administrator, or support staff, this manual will serve as your primary reference for using PHMIS to its fullest potential.

The manual includes process flows, system images, and screenshots to complement the textual instructions, making it easier for users to understand and navigate the system effectively.

1.1 About PHMIS

PHMIS has revolutionized Police Health Centre (PHC) by digitalizing and centralizing patient data, enabling healthcare providers to offer better patient care, streamline healthcare processes, and enhance data security. PHMIS is designed to empower healthcare professionals and staff with the tools necessary to deliver high-quality patient care while maintaining the highest standards of data privacy and security.

1.2 Purpose and Scope

PURPOSE AND SCOPE:

The manual is designed to serve as a reference and guidance document for medical personnel using PHMIS. Its primary purpose is to facilitate the efficient use of the Health Management Information System in healthcare facilities.

This manual aims to provide comprehensive guidance for the effective usage of PHMIS by health facilities. It outlines essential compliance guidelines and best practices for ensuring data security and patient privacy.

WHAT YOU WILL FIND IN THIS MANUAL:

i. Getting Started: Initial setup and login process for a seamless start to using PHMIS.
ii. User Roles: Different user roles within PHMIS, including responsibilities and access permissions.
iii. Navigation: The system layout, user interface, and how to navigate through different sections and modules.
iv. Data Entry: How to input patient information, medical histories, treatment plans, and other essential data accurately and efficiently.
v. Workflow and Processes: How PHMIS supports various healthcare workflows, from client registration to electronic prescribing.
vi. Reports and Analytics: How to generate reports, track patient data trends, and extract valuable insights.
vii. Data Security and Compliance: Importance of data security and privacy compliance, along with best practices.

1.3 User Expectations

i. Users are expected to have a basic knowledge and understanding of computer applications to facilitate their use of PHMIS.
ii. The manual is intended to guide users through various processes and tasks within the system.

1.4 Contents Overview

i. The manual covers all modules within PHMIS, providing detailed process flows and descriptions.
ii. Users should follow the described processes and, in case of any issues, contact the designated support personnel at their facility.
iii. Detailed descriptions of all modules are included, with process flows and system-captured images to illustrate each step.

1.5 How to Use this Manual

i. Use the table of contents to quickly locate specific topics.
ii. Pay attention to tips, warnings, and notes for essential information and best practices.
iii. Refer to step-by-step instructions and screenshots for practical guidance.
iv. Bookmark or highlight sections that are relevant to your role and responsibilities.

TARGET AUDIENCE:

The intended users of this manual are assumed to have basic computer application knowledge. This prerequisite knowledge is expected to help users apply PHMIS effectively.

1.6 Feedback and Questions

If you have any feedback, questions, or suggestions for enhancing this manual or the PHMIS system itself, please contact your designated system support team or facility ICT officer.

1.7 Data Security and Compliance

Properly handling sensitive patient information is of utmost importance in healthcare to ensure patient privacy, data security, and compliance with regulatory requirements. The following are essential guidelines for handling sensitive patient information:

i. Access Control: Limit access to patient information to authorized personnel only. Implemented role-based access control (RBAC) to ensure individuals can only access data necessary for their job roles.
ii. Secure Physical Storage: Store physical records in locked cabinets or rooms with restricted access. Ensure paper records are not left unattended or in open areas.
iii. Password Management: Implement strong password policies and require regular password changes. Employees must not share their login credentials.
iv. Secure Electronic Devices: Secure all devices used to access patient data.
v. Employee Training: Provide comprehensive training on data privacy and security policies to all staff members who handle patient information.

1.8 Password Management and Data Security Best Practices

i. Use Strong and Unique Passwords: Create strong passwords that are long and complex, containing a combination of uppercase and lowercase letters, numbers, and special characters. Use a unique password for each account.

ii. Regularly Update Passwords: Change passwords every three to six months, or sooner if you suspect any compromise.
iii. Be Cautious of Phishing Attacks: Be vigilant when clicking on links or opening email attachments, especially from unknown sources.
iv. Secure Your Devices: Protect your devices with strong passwords or PINs.
v. Educate Yourself and Others: Stay informed about current security threats and best practices for data security.

1.9 PHMIS Users

The system has five categories of user groups who can access the system:

S/N	USER TYPE	RESPONSIBILITY
1.	**System Administrators**	1. Have access to different modules, including Setup modules. 2. Super Administrator is responsible for system setup, facility creation, and registering other default items. 3. Super Administrator has the highest privileges, can change user roles, and can view, manage, or modify facility details. 4. Only one Super Admin(National Admin) in the entire organization.
2.	**Medical Personnel**	1. Includes various medical staff roles like Medical Record, Nurses, Pharmacists, Technicians, Lab Clinicians, Anesthetists. 2. Users have access to modules relevant to their roles.
3.	**Cashiers**	Responsible for processing patient bills and payments through the system.
4.	**Insurance Officers**	Handle insurance claims, card verification, and insurance-related billing functions.
5.	**Facility Administrators**	Manage facility-level settings, user creation, and departmental configuration.

2.0 Getting Started with the System

The system can be accessed via different devices such as Laptops, Desktops, iPads, Tablets, Smartphones and PCs depending on the network infrastructure at the facility.

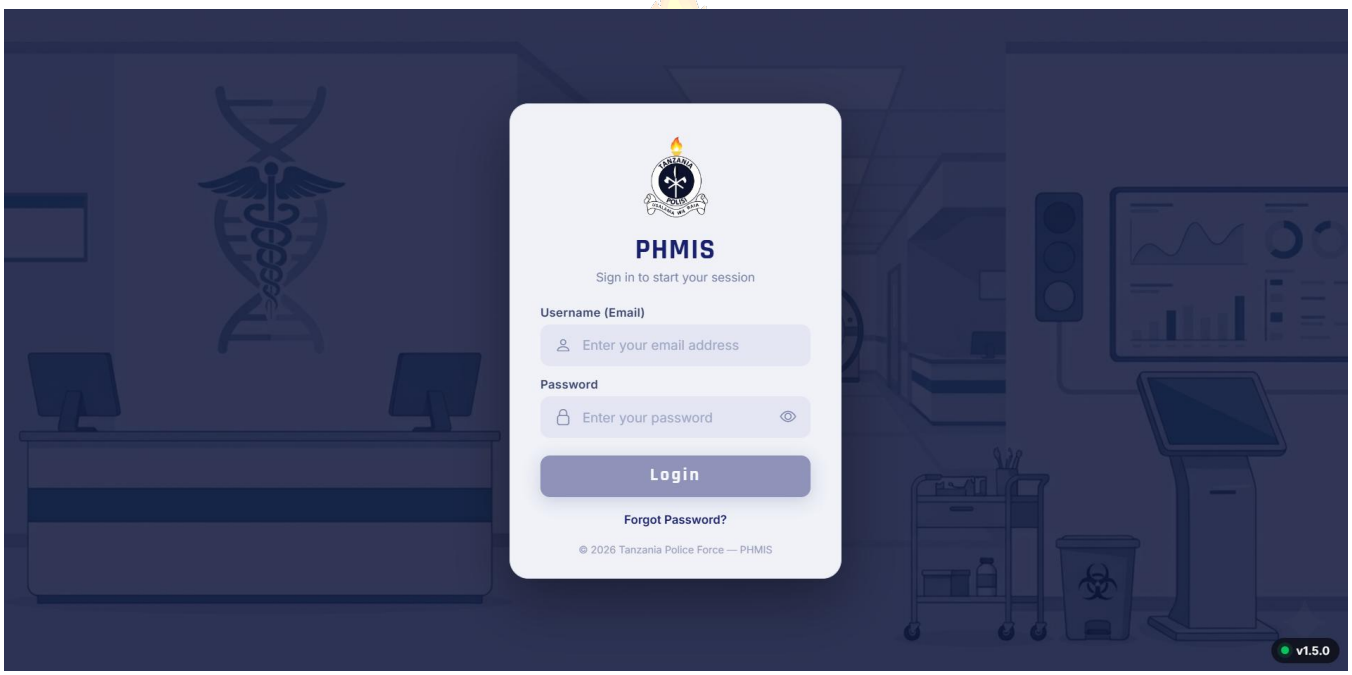
Accessing the System

PHMIS is a web-based system. To access the system, the following conditions must be met:

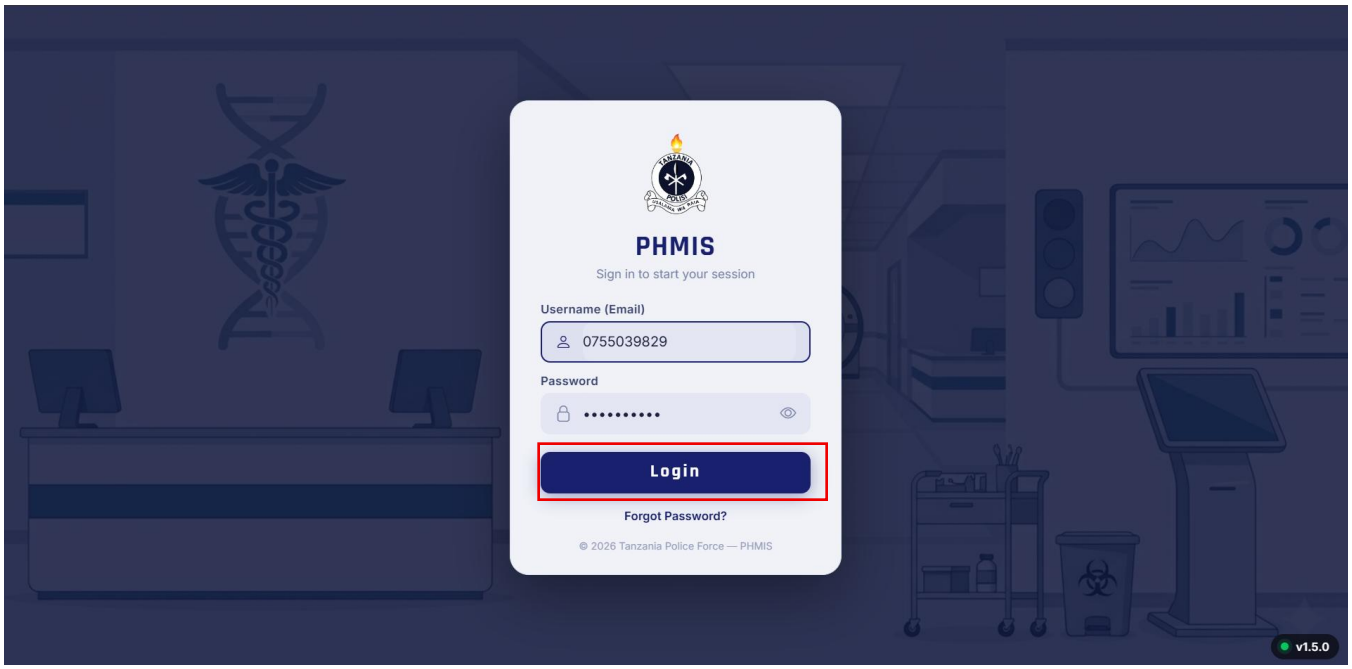
i. Availability of a device (Computer, Laptop, Tablet, iPad, or Smartphone) with an installed web browser. Google Chrome is most recommended.
ii. Internet connection.
iii. Correct user credentials (username and password).
iv. TPF VPN if needed.

Follow the steps below to log in:

i. Open a web browser (Google Chrome or Mozilla Firefox) and navigate to the PHMIS system URL (http://192.168.10.84:8081/) provided by your ICT administrator.
ii. Once the URL is entered correctly, the login page will appear as shown below.



- Click the Sign In button. A new window will appear asking you to enter your username and password.



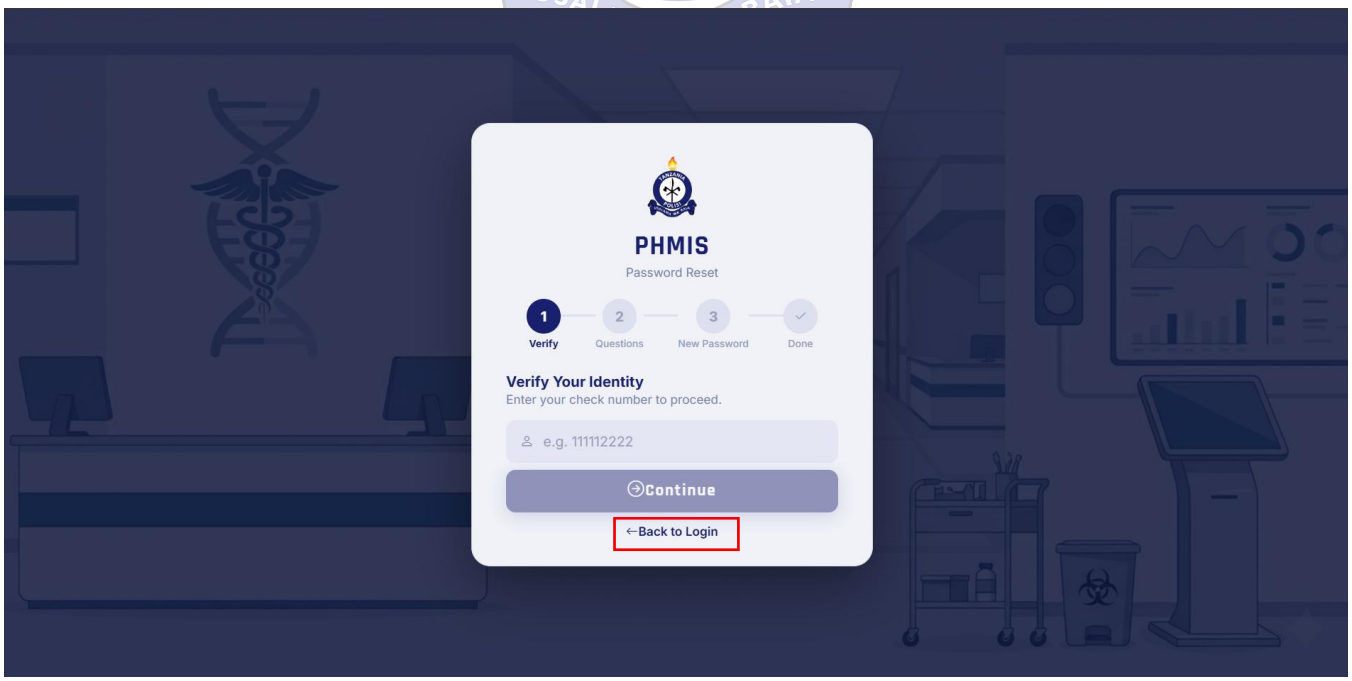
The PHMIS login page. Enter your username and password, then click "LogiIn" to access the system

- Enter your Username and Password correctly, then click the Login button.

2.1 Login

i. If the username and password are correct, the system will log you in to the respective modules to which you are assigned.

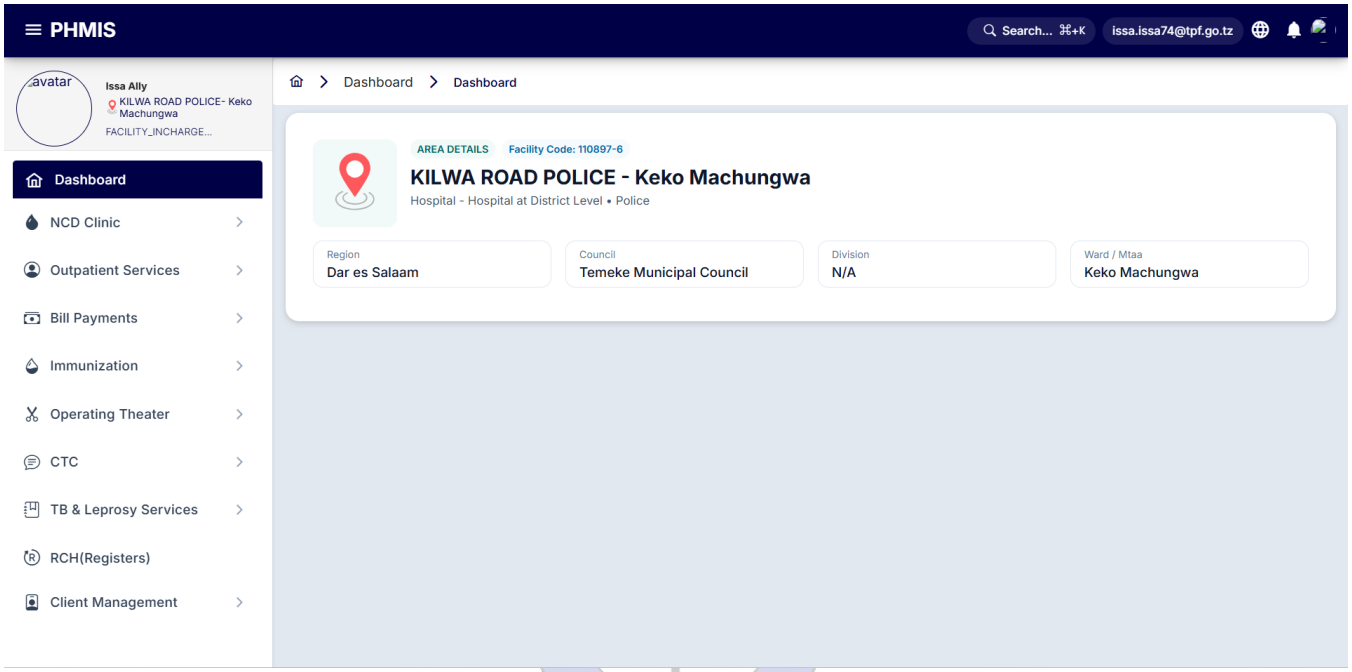
ii. If you have forgotten your password, click the Forgot Password button as shown in the login screen. The window below will appear. Verify your identity and answer security questions then set new password then click back to login button.



NOTE: The "Request New Password" button will only become active once a username has been entered in the Username field.

2.2 Password Recovery

Upon successful login, the system dashboard with modules for your user role will open as shown below.



The PHMIS main dashboard displayed after a successful login, showing all modules available to the logged-in user based on their assigned role.

From the dashboard, navigate to the system based on your assigned role and accomplish your daily duties.

NOTE: System users may not see the full dashboard if their role is restricted to specific modules. If a different window appears upon login, this is expected behaviour and not an error.

3.0 System Settings

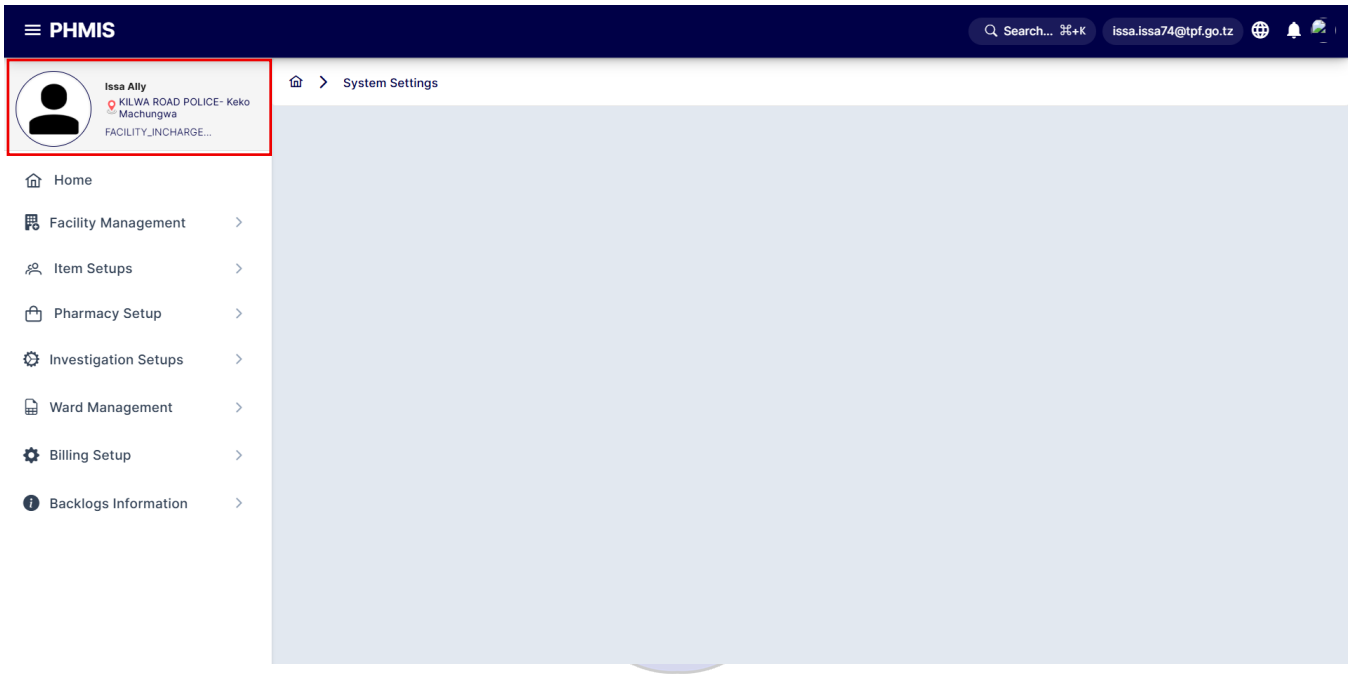
In this module, all facility initial configurations are done. This includes updating the facility address, mapping of medication, medical supply, investigation (both laboratory and radiology), services, and payment setups.

To set facility initial configuration, log in with the Facility In charge (Administrator) account.

3.1 Facility Setup

3.1.1 Facility Management

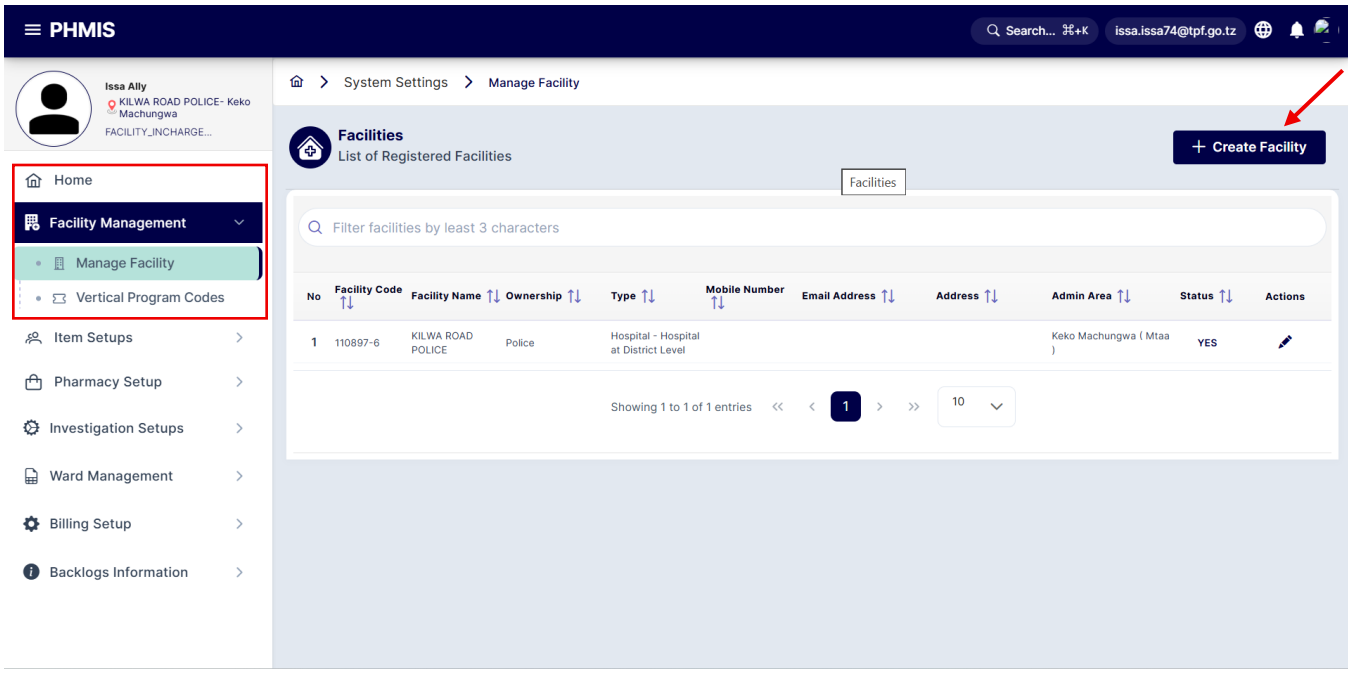
Under this sub-module, the user can update facility details by entering the name of the facility and clicking the pen (edit) symbol to edit the details.



3.1.2 Facility Item Mapping

Under this module, all facility items are mapped. These items include medical supplies, medications, investigations, consultation services, and procedures.

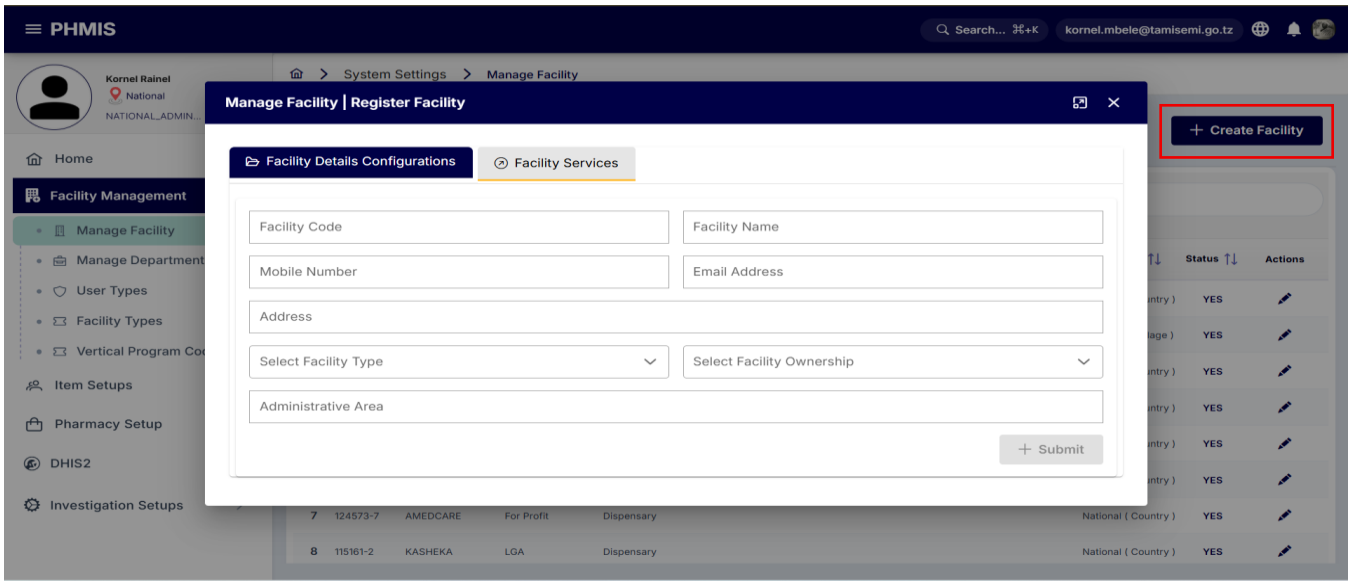
i. To map items, go to Item Setup, then click the Facility Item Mapping button, then click Create. A pop-up box will appear.
ii. Enter the name of the item in the search box. Items corresponding to the search term will appear.
iii. Select the item and click the Save button.



a. Facility Details Configurations

This is the initial stage where the basic identity and contact information for the facility are established.

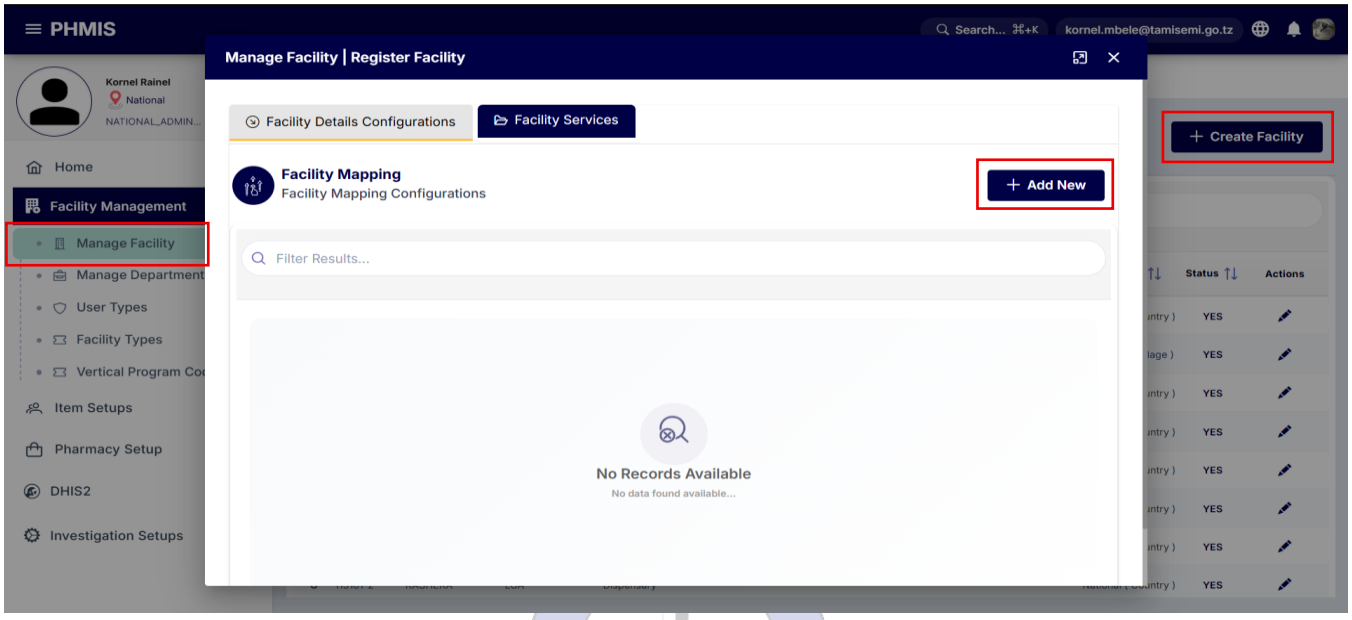
- **Enter Basic Info:** Input the **Facility Code** and the official **Facility Name** into the respective fields.
- **Contact Details:** Provide a valid **Mobile Number** and **Email Address** for administrative communication.
- **Location Information:** Enter the physical **Address** and specific **Administrative Area** where the facility is situated.
- **Classification:** Use the dropdown menus to choose the appropriate **Facility Type** (e.g., Dispensary, Hospital) and **Facility Ownership** (e.g., Public, Private).
- **Preliminary Submission:** Once all fields are complete, click the **+ Submit** button to save these configurations.



b. Navigating to Facility Services

After saving the basic details, you must map the specific services offered by the facility.

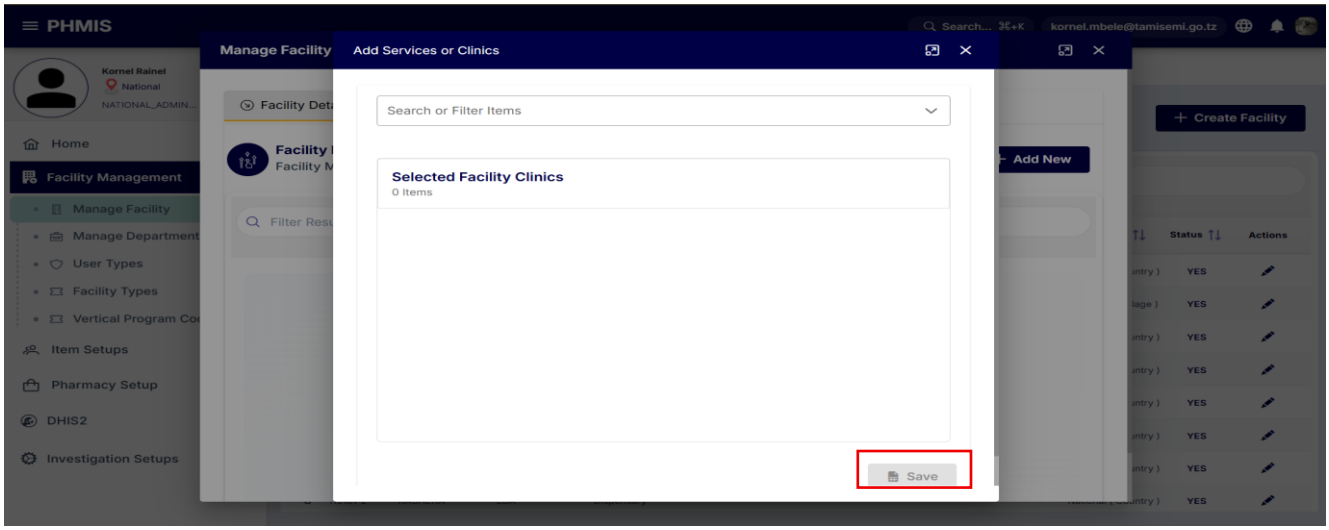
- **Switch Tabs:** At the top of the registration window, click on the **Facility Services** tab.
- **Initiate Mapping:** On the Facility Mapping screen, click the **+ Add New** button located on the right side to begin adding clinics or service units.



c. Adding Services or Clinics

This final phase defines the clinical scope of the registered facility.

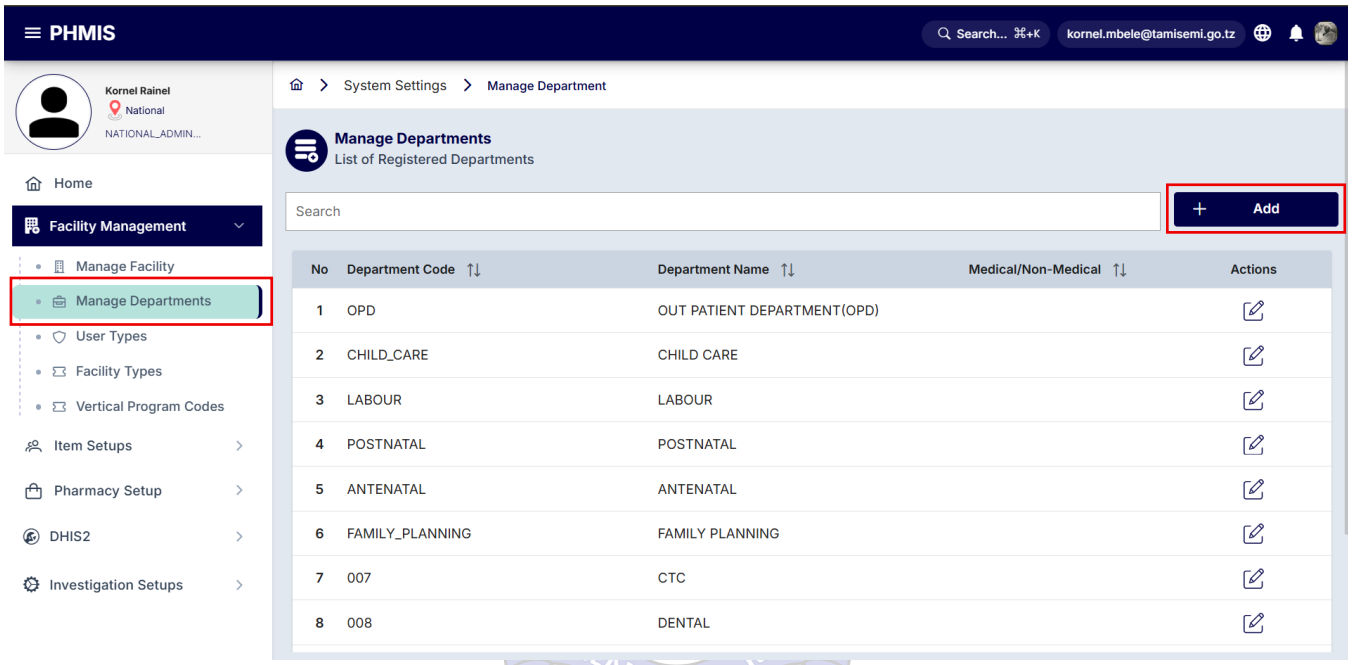
- **Search for Services:** Use the **Search or Filter Items** dropdown to find the specific services or clinics applicable to this facility.
- **Review Selection:** Any items chosen will appear in the **Selected Facility Clinics** list for your review.
- **Final Save:** Click the **Save** button at the bottom of the "Add Services or Clinics" window to finalize the facility registration process.



d. Viewing and Managing Registered Departments

The main interface allows you to oversee all departments currently configured in the system.

- **Accessing the List**: Navigate to **Facility Management** in the sidebar and select **Manage Departments** to view the "List of Registered Departments."
- **Searching Departments**: Use the **Search bar** at the top of the table to quickly filter departments by name or code.
- **Reviewing Information**: The table displays essential data for each entry, including the **Department Code**, **Department Name**, and its classification as **Medical/Non-Medical**.
- **Editing Existing Entries**: To update a department's details, click the **Edit icon (pencil)** under the **Actions** column for the specific row you wish to modify.



2. Registering a New Department

To add a new unit to the facility, follow the registration workflow shown in the modal window.

- **Initiate Registration**: Click the **+ Add** button located at the top right of the main department list.
- **Enter Department Code**: In the "Manage Department | Register Department" pop-up, input a unique identifier in the **Code** field (e.g., "OPD" or "LABOUR").
- **Enter Department Name**: Input the full descriptive title in the **Name** field (e.g., "OUT PATIENT DEPARTMENT").
- **Submit**: Once the fields are populated, click the **+ Submit** button to finalize the registration and add the department to the system.

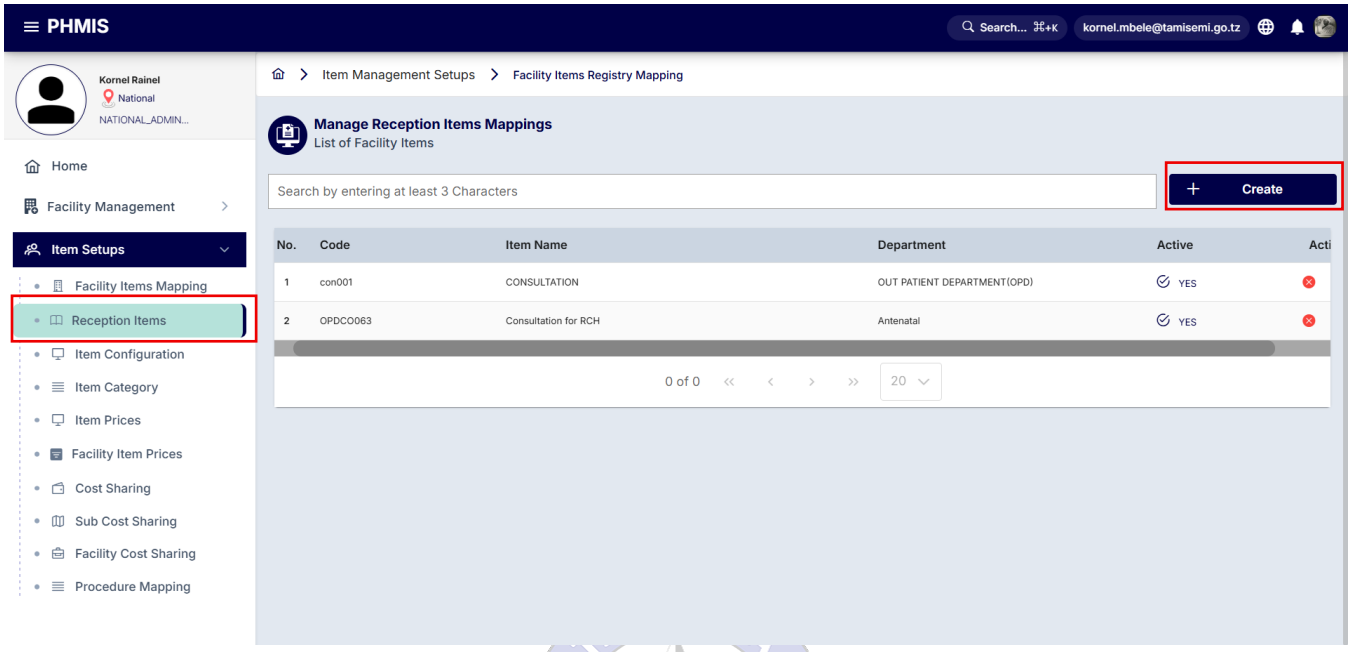
3.1.3 Reception Items

Reception items are all items that the receptionist will have access to when registering a patient.

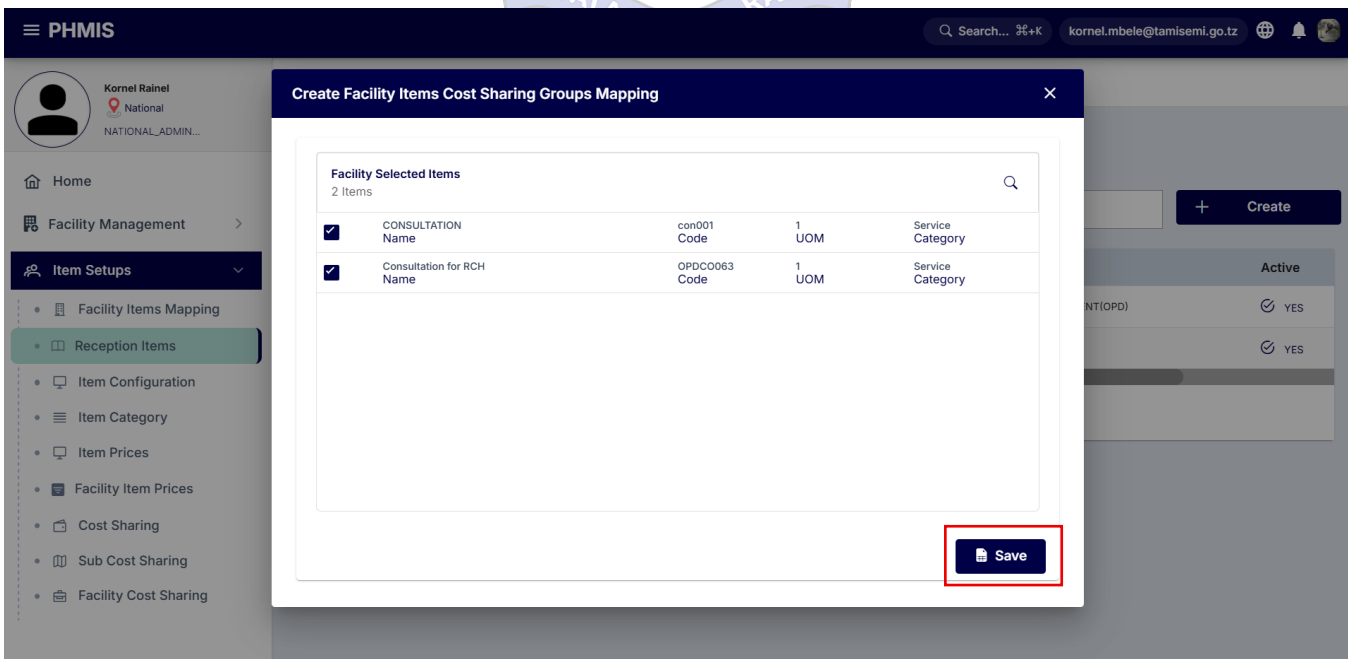
- To activate them, open Reception Items then click Create. A pop-up box will appear showing a number of items.
- Select the item to set by checking the box and click the Save button when done.



3.1.4 Item Category

This sub-module enables registration of new categories of items.

To add a new Item Category, open Item Category, then click Create. A pop-up box will appear requesting some information. Fill all required information and click Create when done.

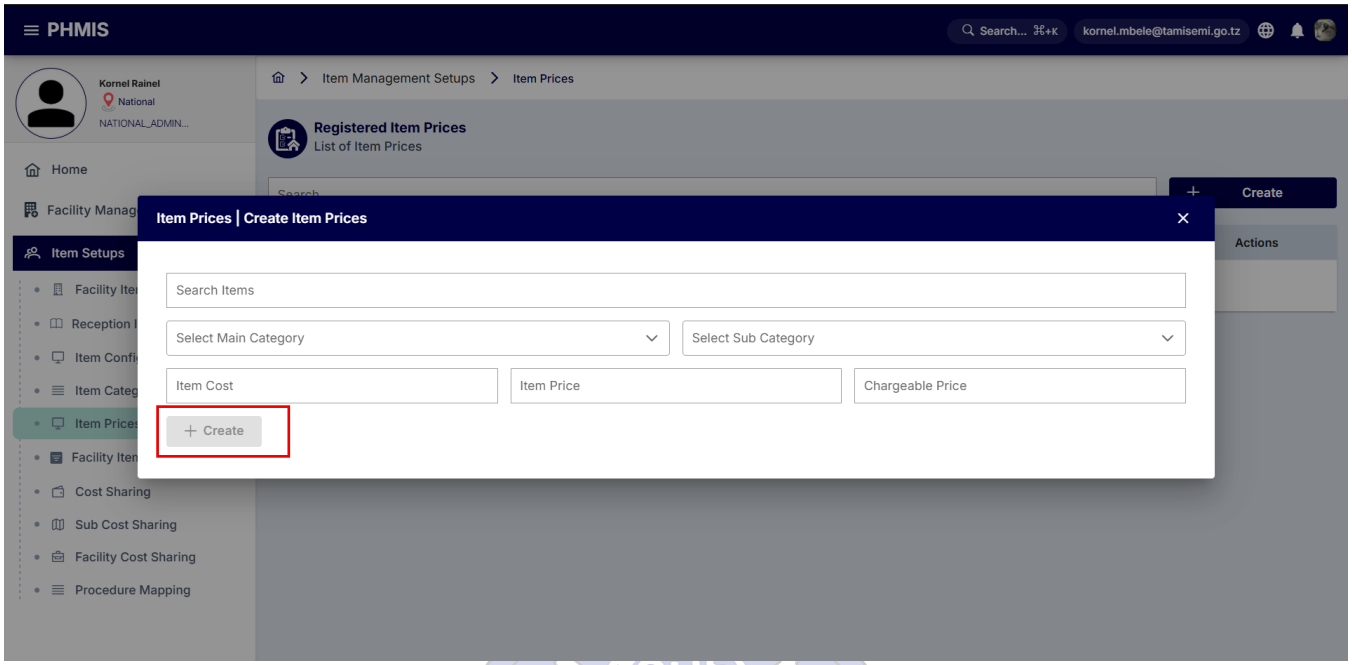


3.1.5 Facility Item Price

Under this sub-module, the user can update item prices as well as create initial configuration.

- For bulk data entry, go to Facility Item Price, then click Price Management and download the template. Enter prices for your items.
- Once done, click Upload to load the downloaded document with the prices entered.
- Create Price Entries can be used as an option for single entry.

NOTE: *For insurance, exempted, and non-payable items, the Chargeable entry must be filled with zero.*

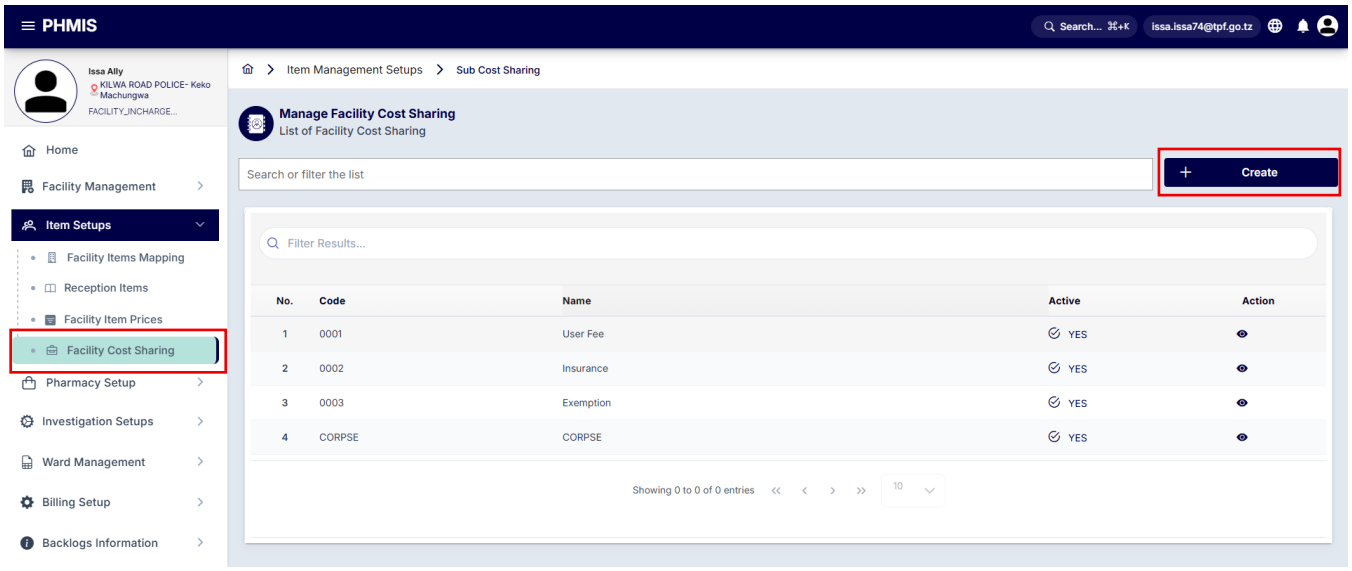


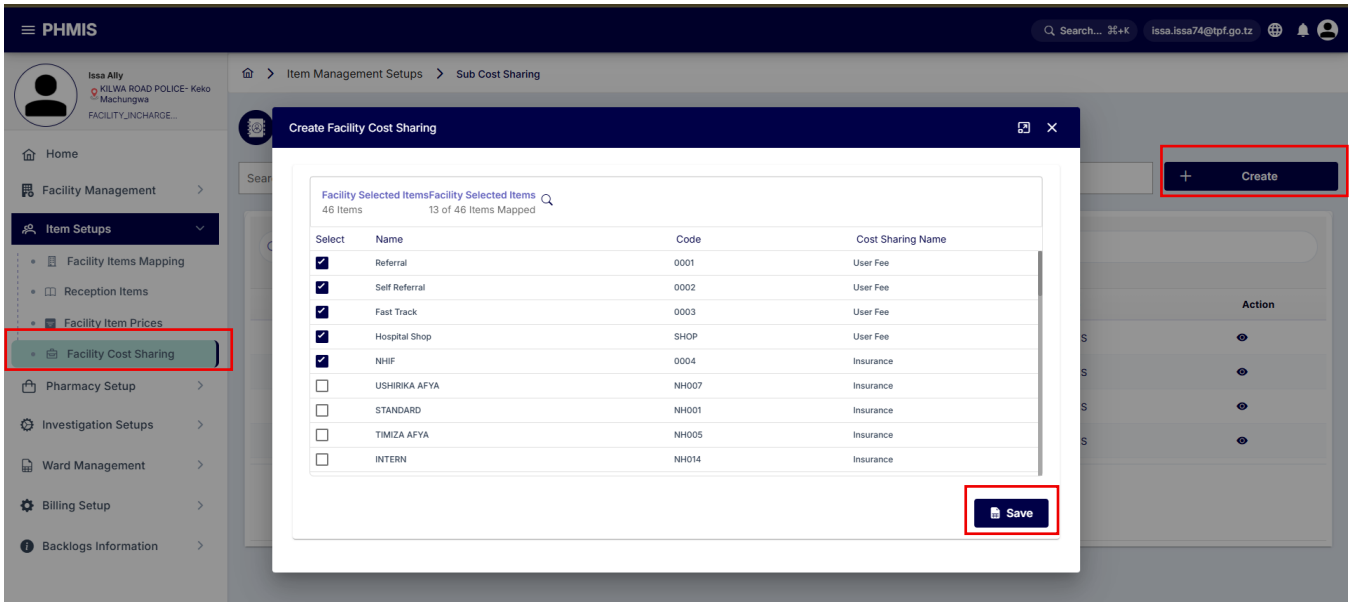
POLISI
USALAMA WA RAIA

3.1.6 Cost Sharing

This is the group category to which patients belong. It includes groups like user fee, insurance, and exemption.

- To create a new category, open Cost Sharing then click Create. A pop-up box will appear requiring you to enter the category name, category code, and category description. Fill all required information correctly.
- Click Create when done to save.

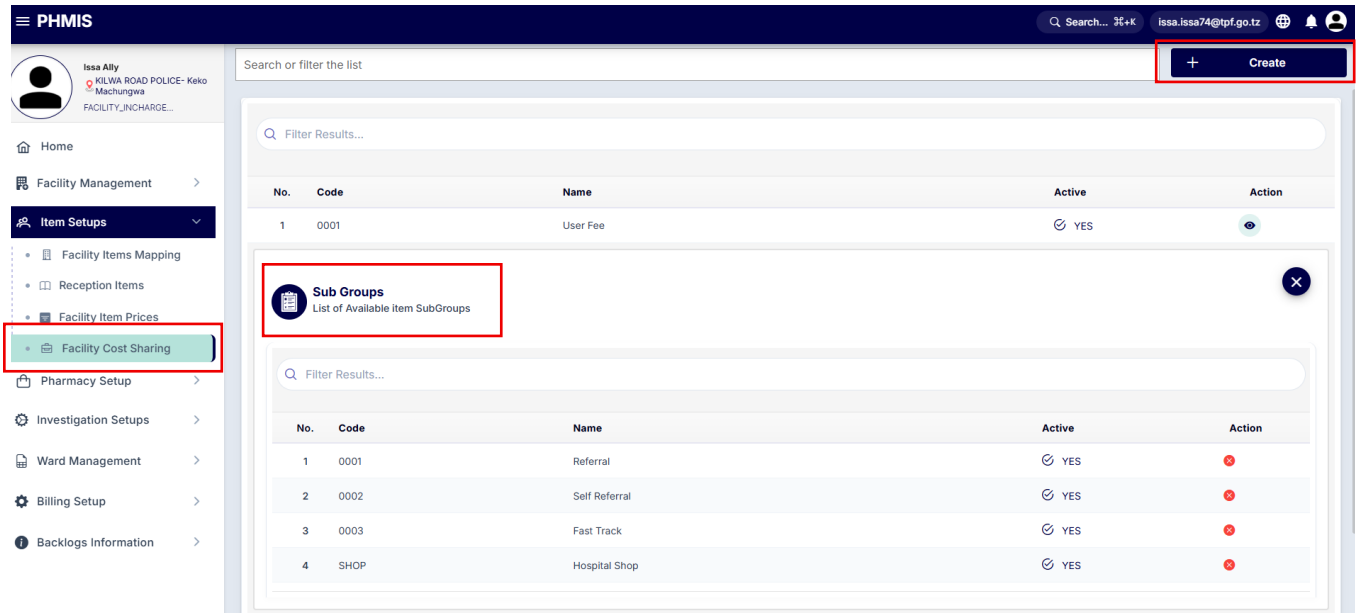




3.1.7 Sub Cost Sharing

After creating the cost sharing group, the next step is to link sub-cost sharing with the cost sharing group.

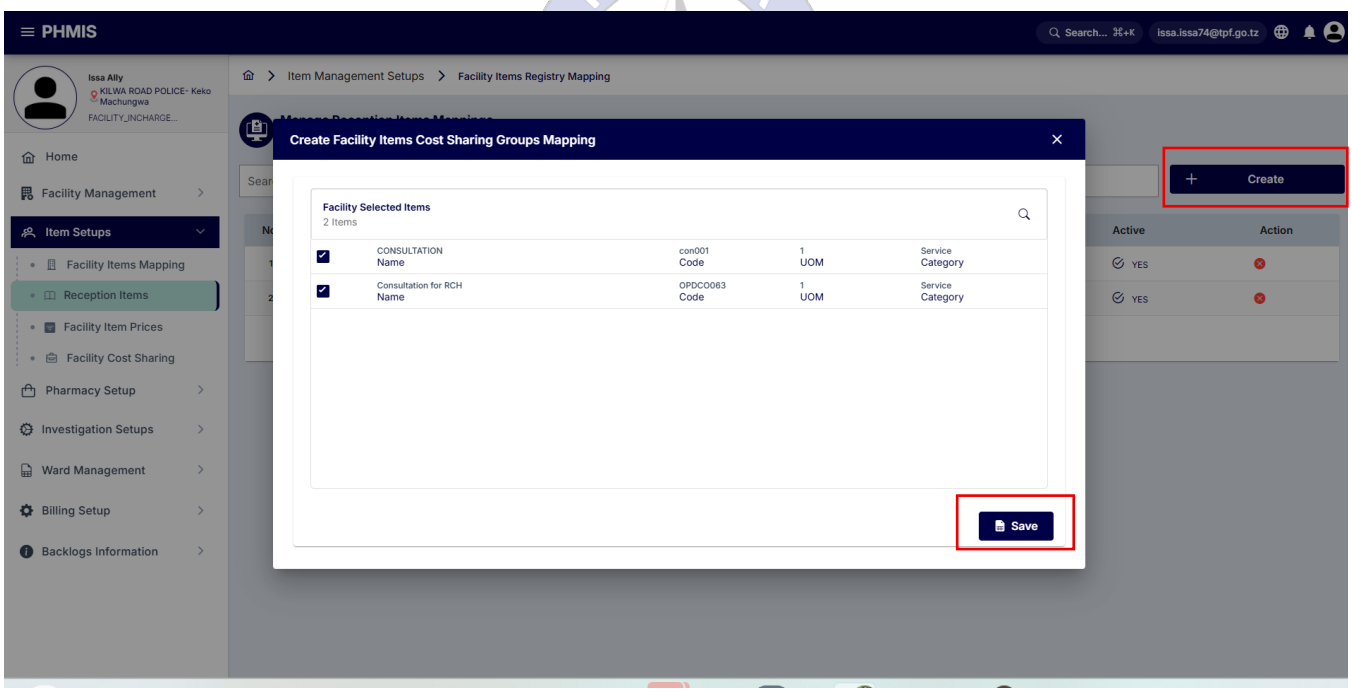
- To link them, go to Sub Cost Sharing, click Create. A pop-up box will appear. In the combo box, select the cost sharing group you want to link, enter the required details, and click Create to save.



3.1.8 Facility Cost Sharing

This sub-module enables the user to configure sub cost sharing groups that are active at the facility.

- To configure Facility Cost Sharing, open it then click Create. A pop-up box will appear.
- Select the group of Facility Items required by checking the box and click Save when done.

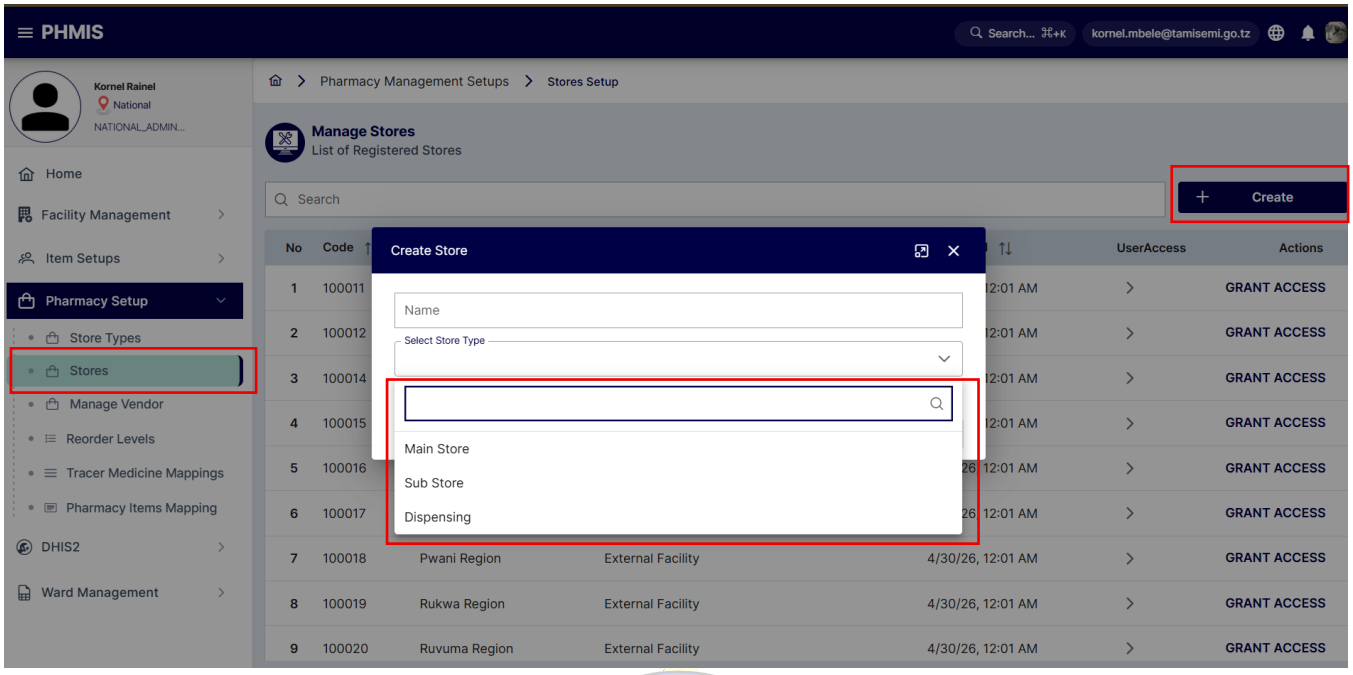


3.2 Pharmacy Setup

3.2.1 Stores

Under this module, the user can create stores operating in a facility.

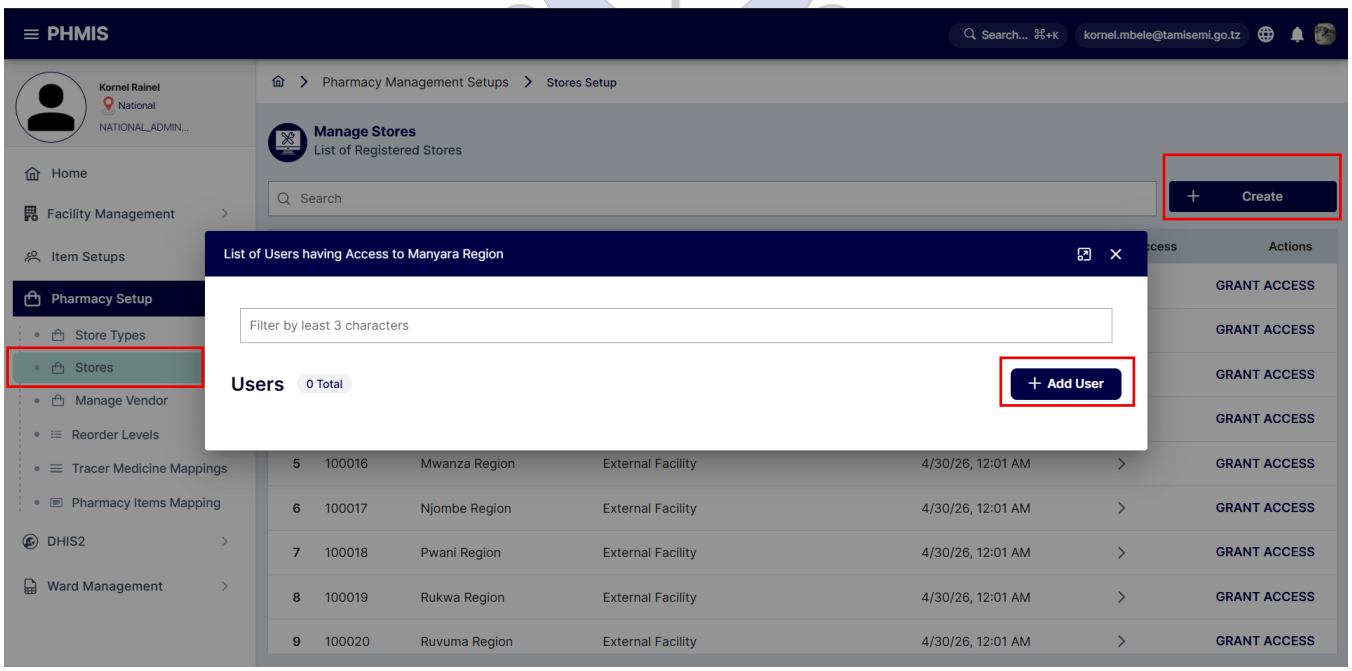
i. Navigate to Pharmacy Setup, then open Stores and click the Create button. A pop-up box will appear requiring you to enter the store name and select the store type.
ii. When the required information has been entered, click Create to save the record.



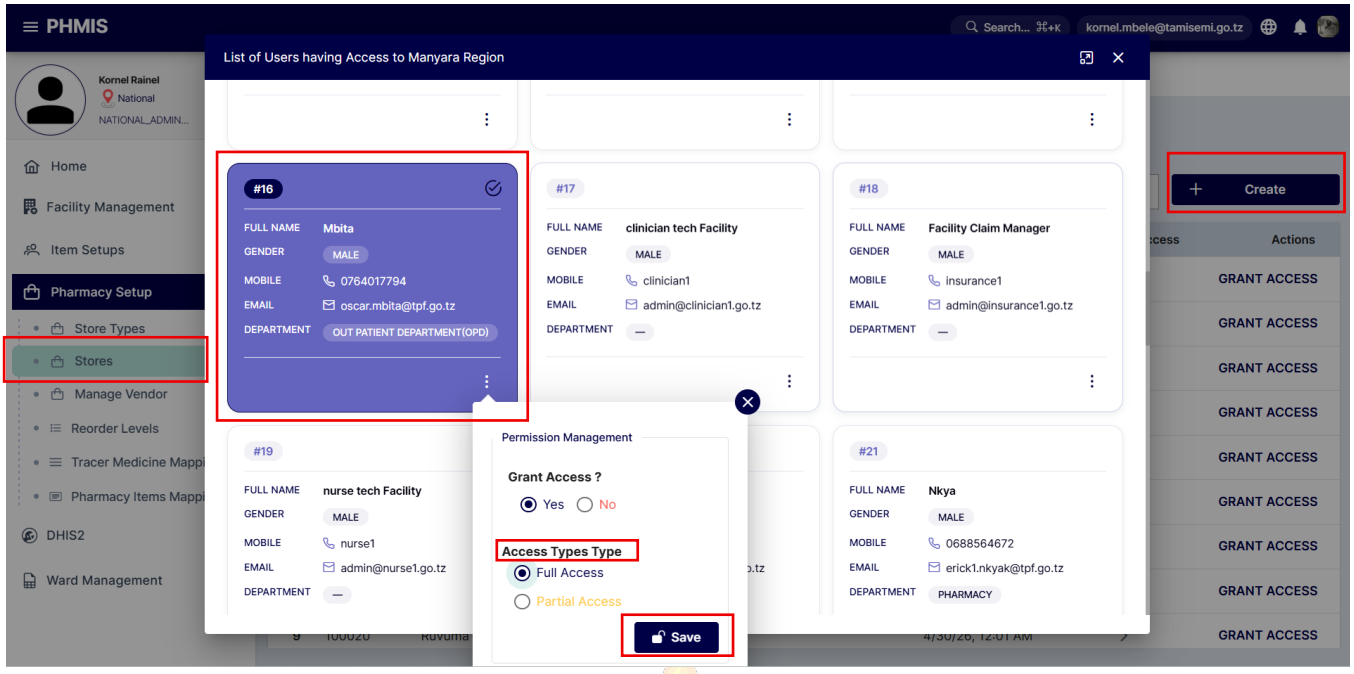
After store creation, assign user access by clicking Grant Access.

i. Search the user by entering their username and click the three dots in the action column.
ii. Select the radio button "Yes" to grant access and set access types accordingly.

NOTE: *User access must be given whether full or partial, depending on the user's actual practical operation in the facility.*



Then grant access to user and save;

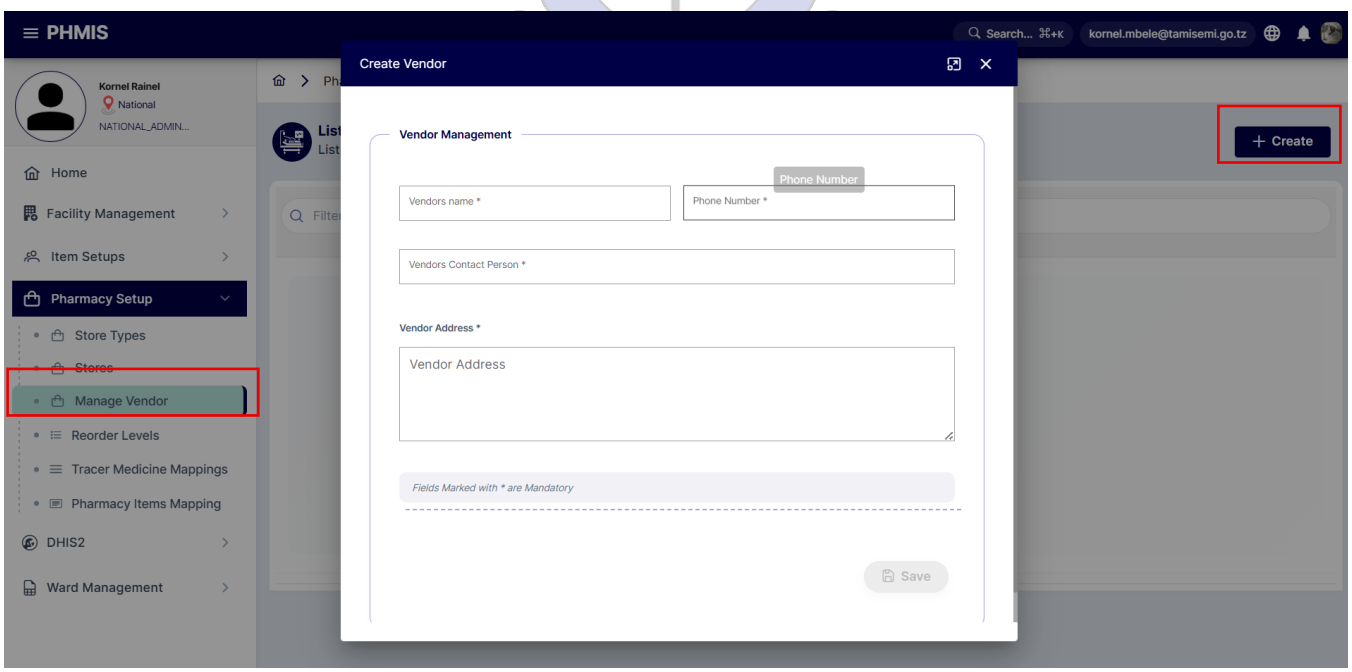


3.2.2 Manage Vendor

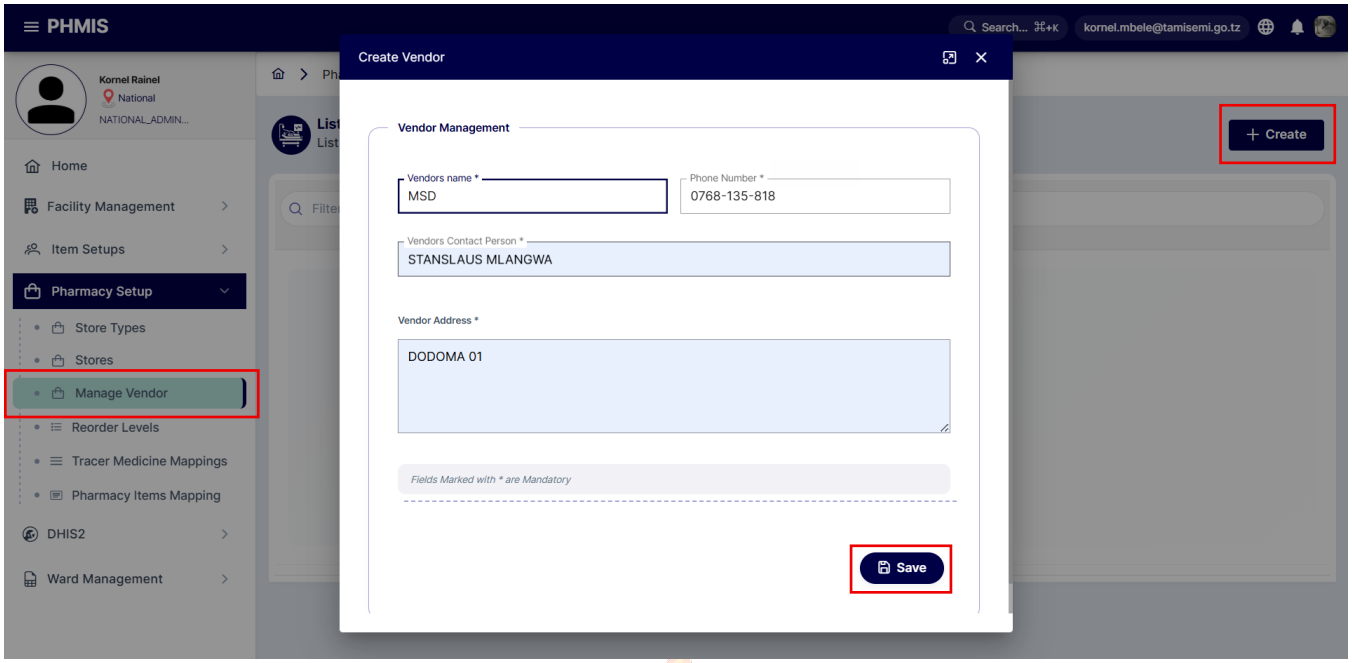
This sub-module allows the user to register a vendor.

i. To register a vendor, open Manage Vendor then click Create.

ii. A pop-up box will appear where the user will enter the required details and click Create to save.



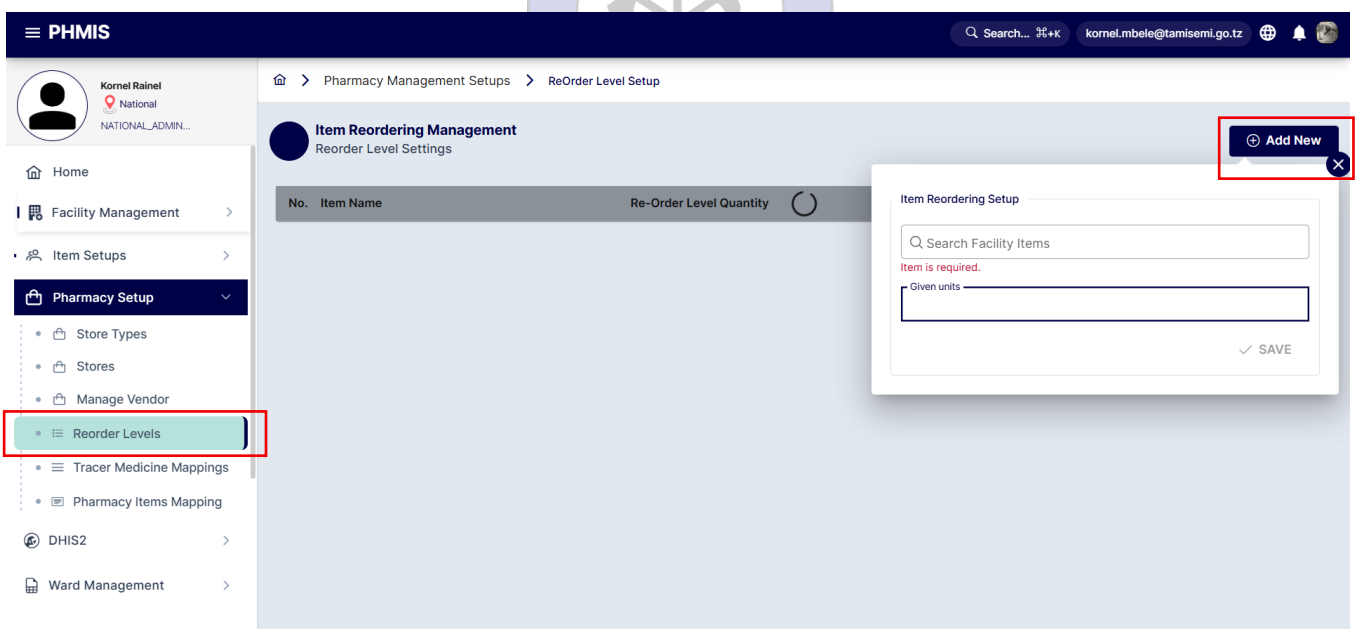
Fill all the required details and click save



3.2.3 Reorder Level

Under this module, the user can set the reorder level for items.

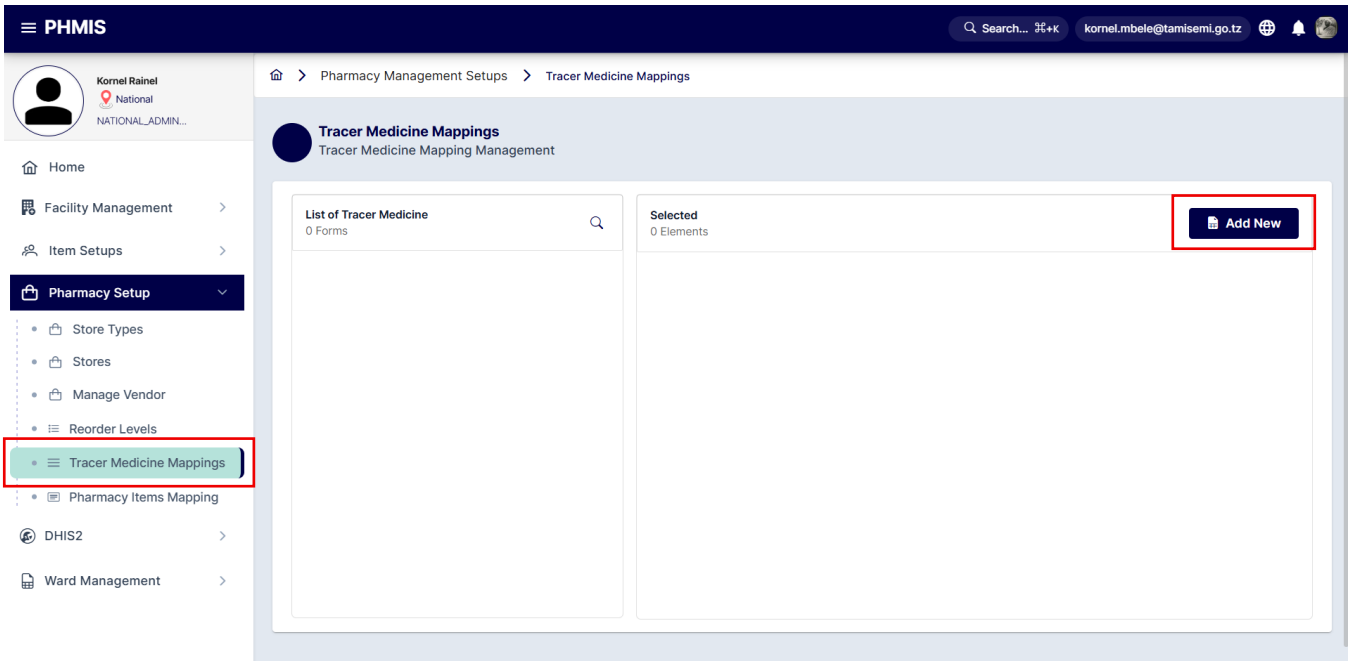
i. Click Add New. A pop-up box will appear requiring you to search the item, enter the unit, and click Save.



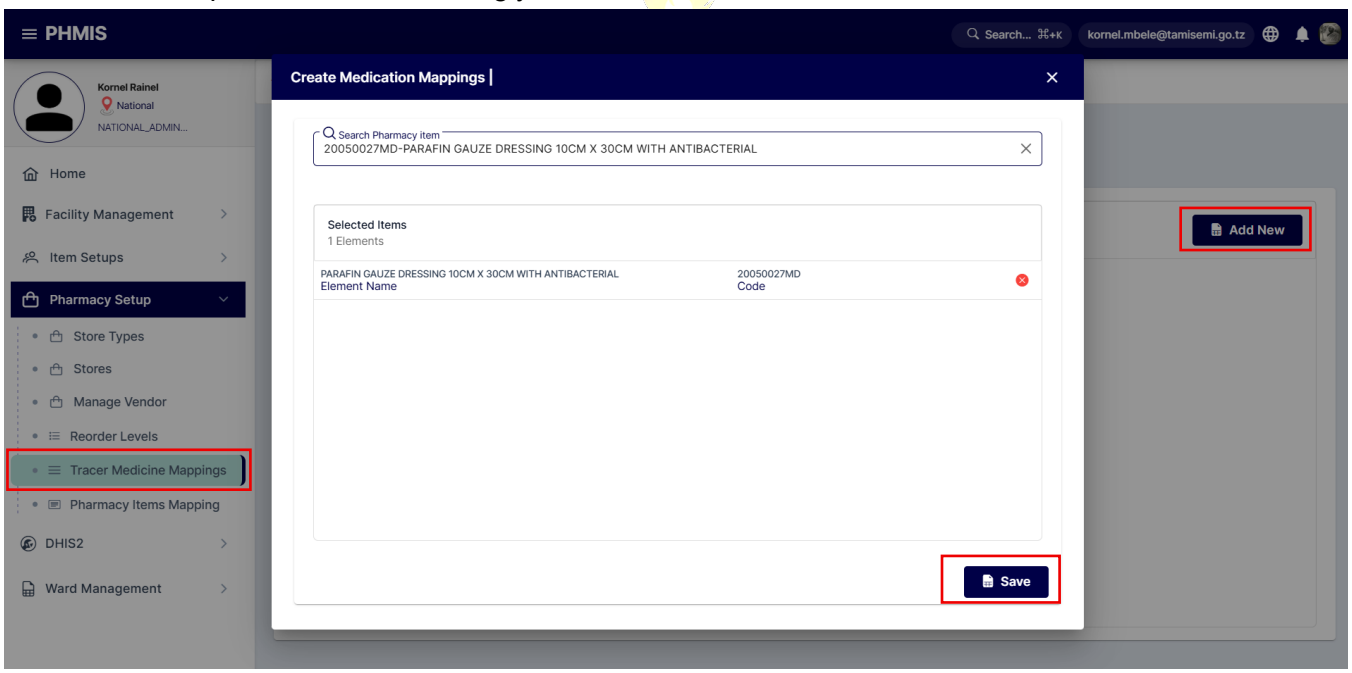
3.2.4 Tracer Medicine Mapping

Under this module, the user can set tracer medicines.

- Click Add New, then select the item by entering the name of the medicine and click Save.



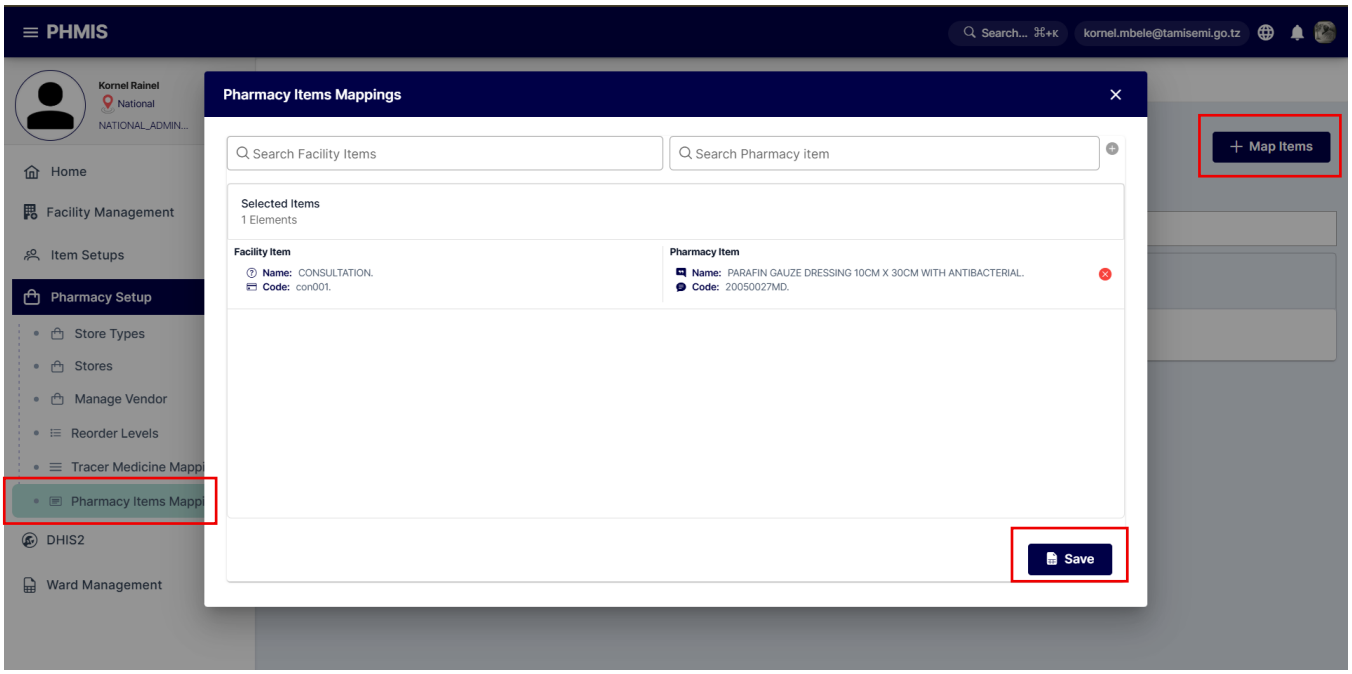
Then add all required details accordingly;



3.2.5 Pharmacy Items Mapping

Under this module, the user can set pharmacy items mapping.

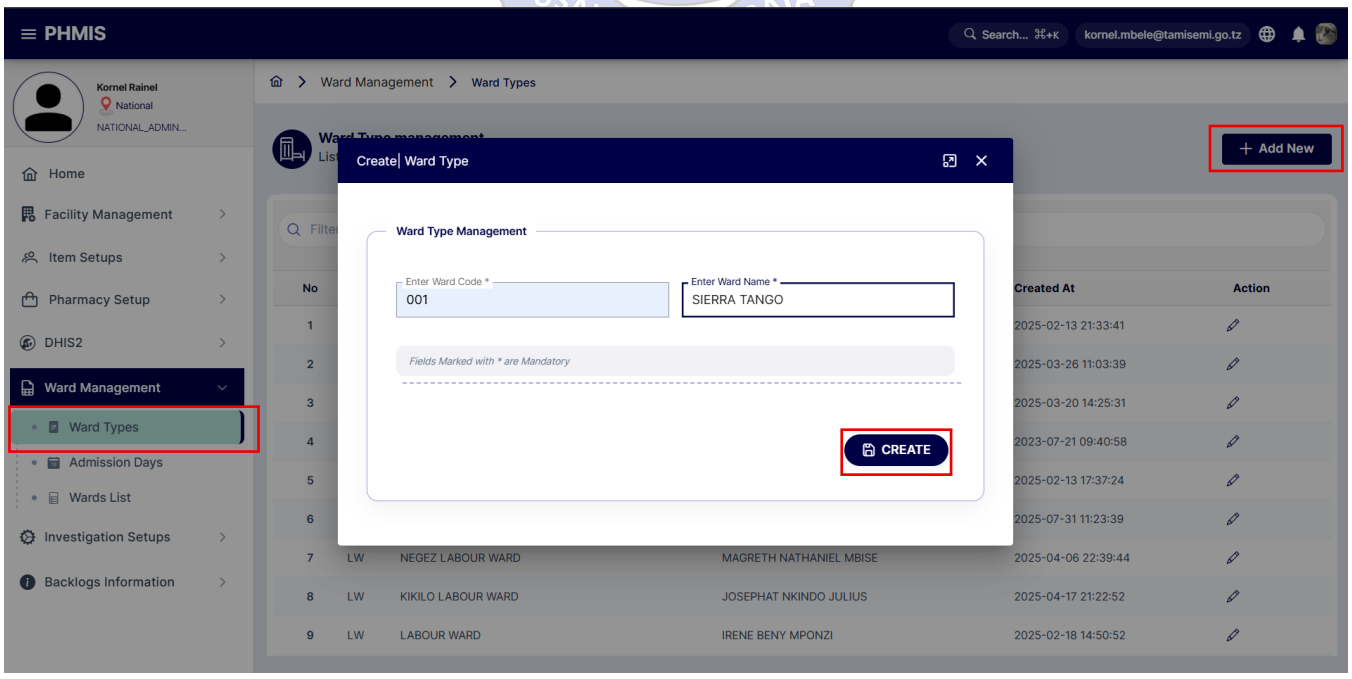
- Click Map Item, then select the item by searching facility items and search pharmacy item and click Save.



3.3 Ward Management

3.3.1 Ward Types

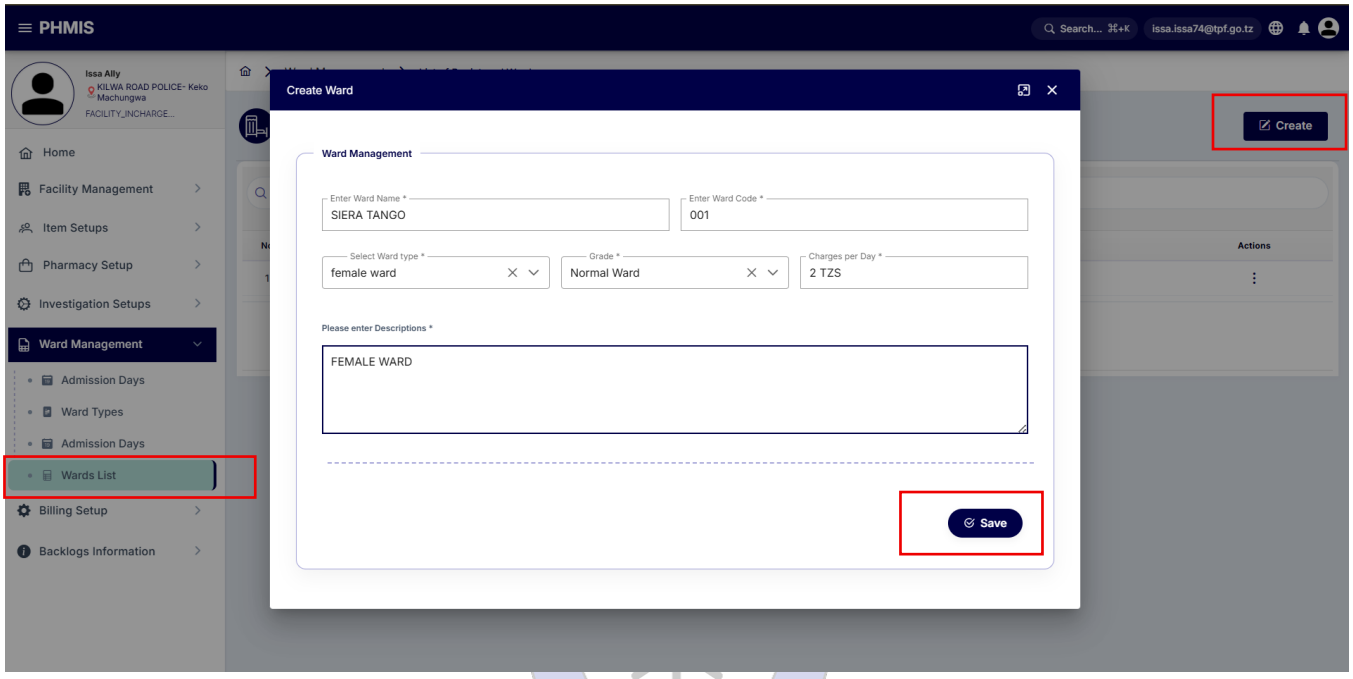
To add a new Ward Type, open Ward Type and then click Add New. A pop-up box will appear requiring you to enter the Ward Name and Ward Code. Enter them and click Create to save.



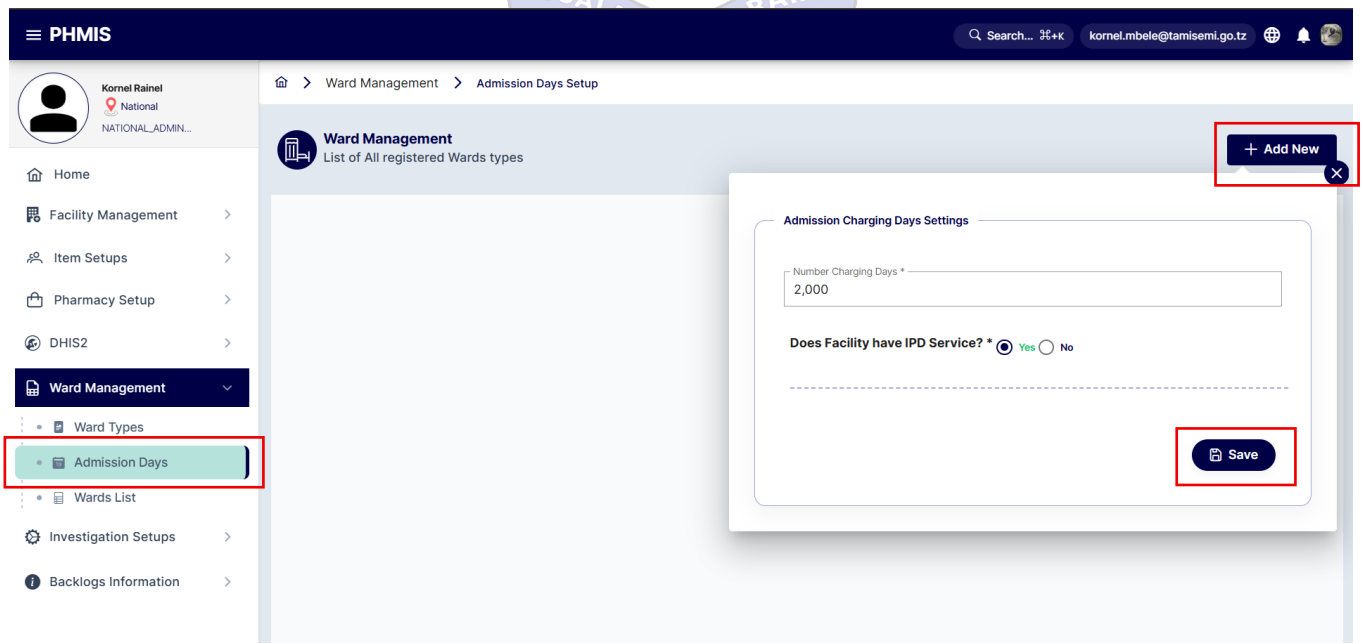
3.3.2 Ward List

To add a new ward:

i. Open Ward List, then click the Create Ward button. A pop-up box to enter the ward name and code will appear.
ii. Select the ward type from the dropdown and enter a description if available.
iii. Click Create to save.

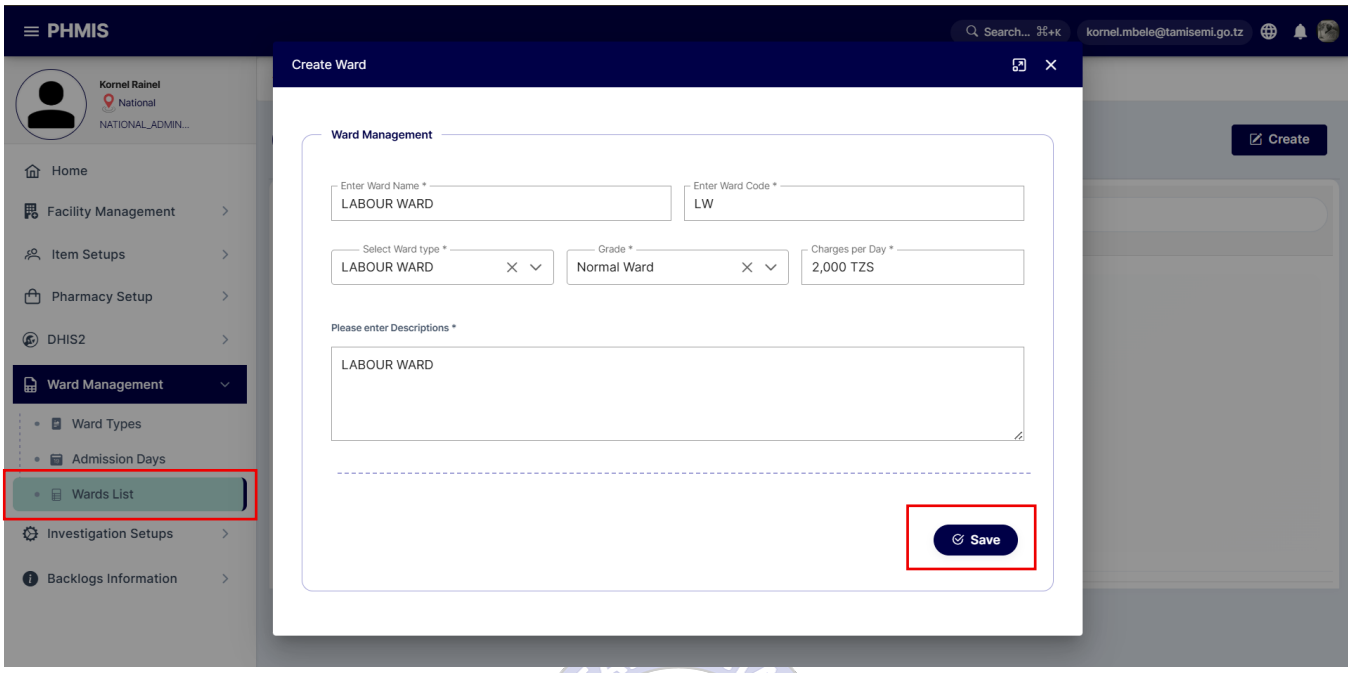


Admission Days
Click Add New then fill all required details as shown below and then click save



Adding Beds to the Ward;

- To add beds, open Ward List and click the three vertical dots under the Action column.
- Click Beds to create beds in the selected ward.
- Click Assign Nurse to allocate a nurse to a specific ward.

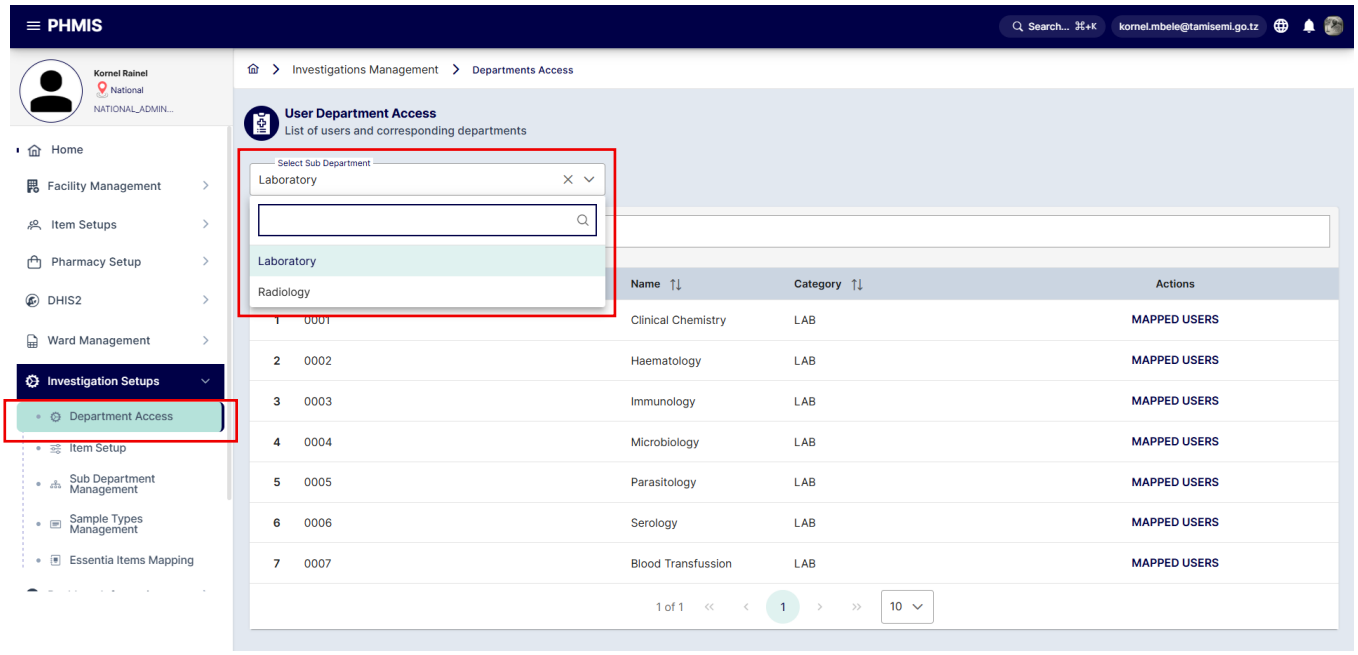


3.4 Investigation Setups

3.4.1 Department Access

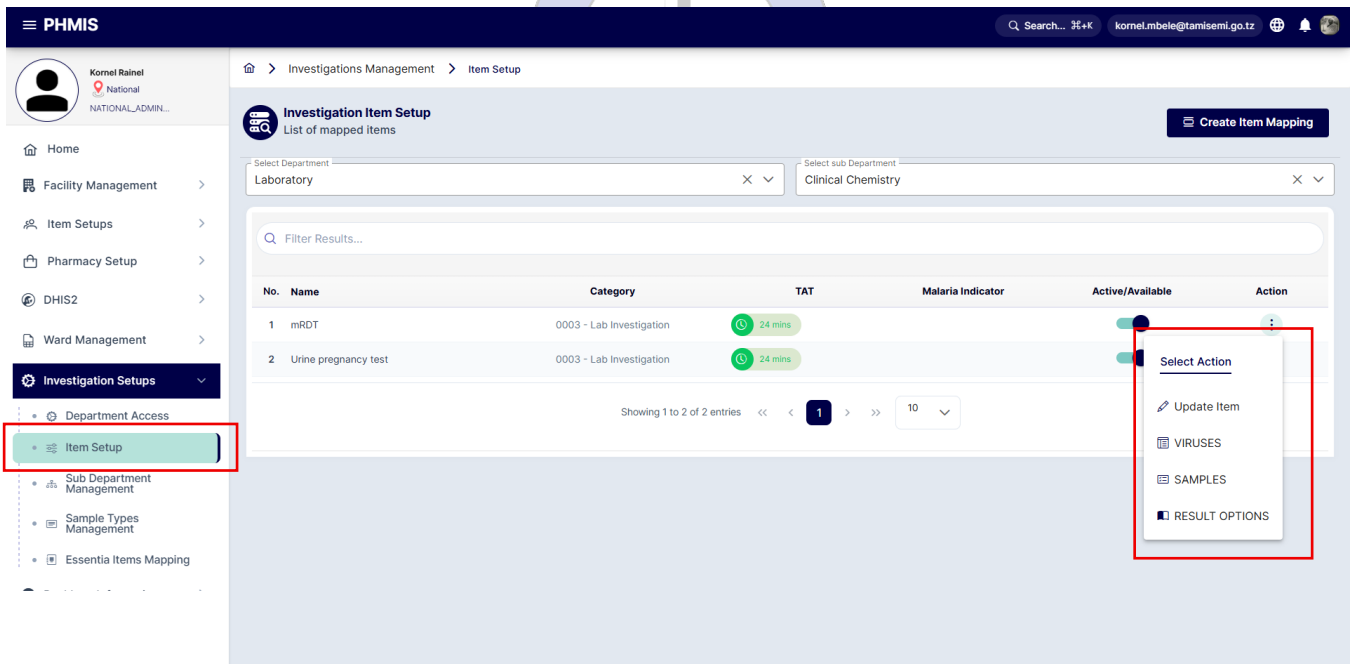
This module provides access of users to the department. To provide access, open Department Access, then select the department you want to map, then click Mapped Users. An Add User button will appear. Search the user you want to provide access to.

NOTE: *Mapping of users should be according to their operational responsibilities.*



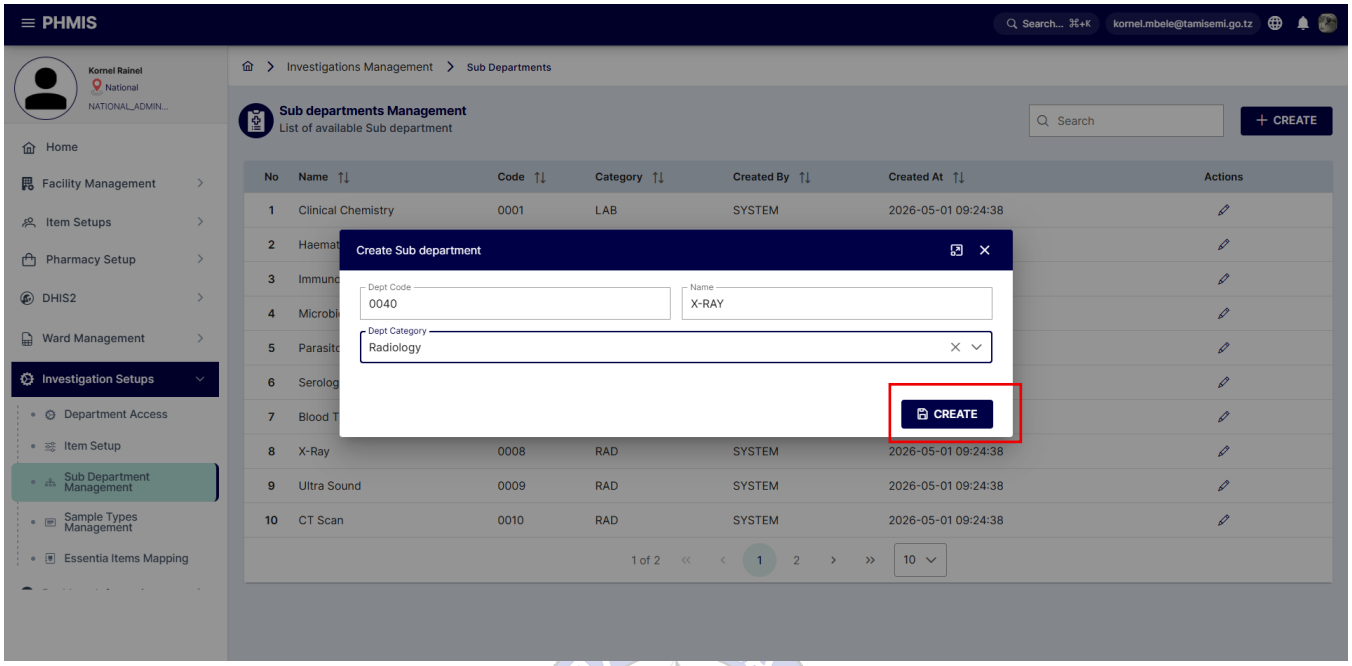
3.4.2 Item Setup

Under this module, items are mapped with their respective departments. To map the items, select a department then click the Create button for unmapped items, or click the three vertical dots for different options on existing items.



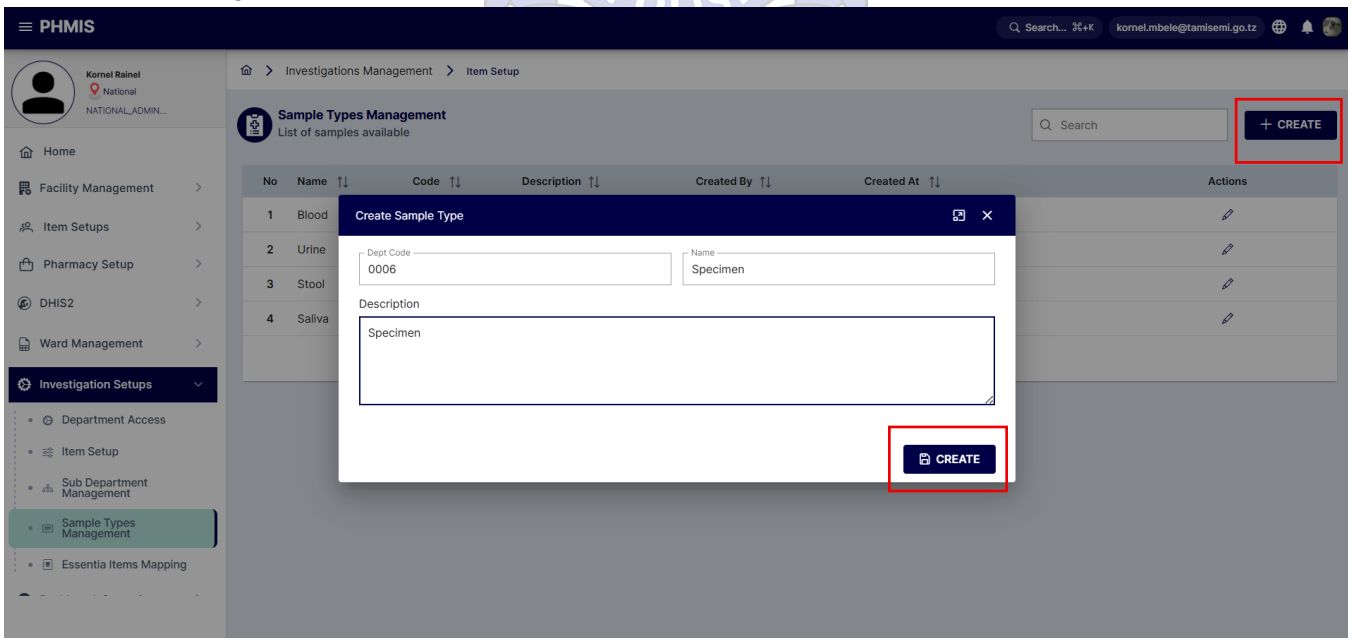
3.4.3 Sub Department Management

Under this module, Sub Department Management are created with their respective departments. To create the sub department, click the Create button then fill in details accordingly and then choose department category and click create or click the pen button to update created sub department category.



3.4.4 Sample Types Management

Under this module, items are mapped with their respective departments. To map the items, select a department then click the Create button for unmapped items, or click the three vertical dots for different options on existing items.



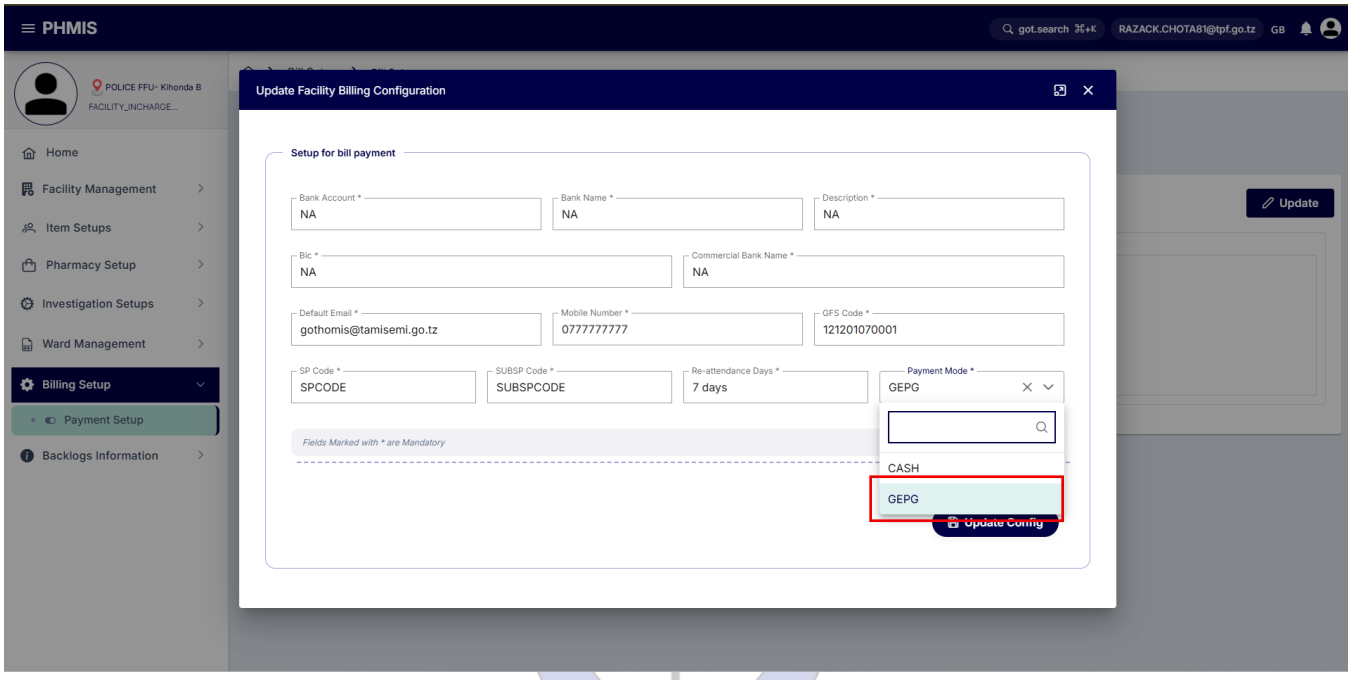
3.5 Billing Setup

3.5.1 Payment Setup

To set up billing information:

- Navigate to Billing Setup, then open Payment Setup and click Update.
- Fill all required fields with the correct information.
- In the last field, select payment mode based on the facility's operation and click Update to save.

NOTE: *Facilities are required to use the Government Electronic Payment Gateway (GEPG).*

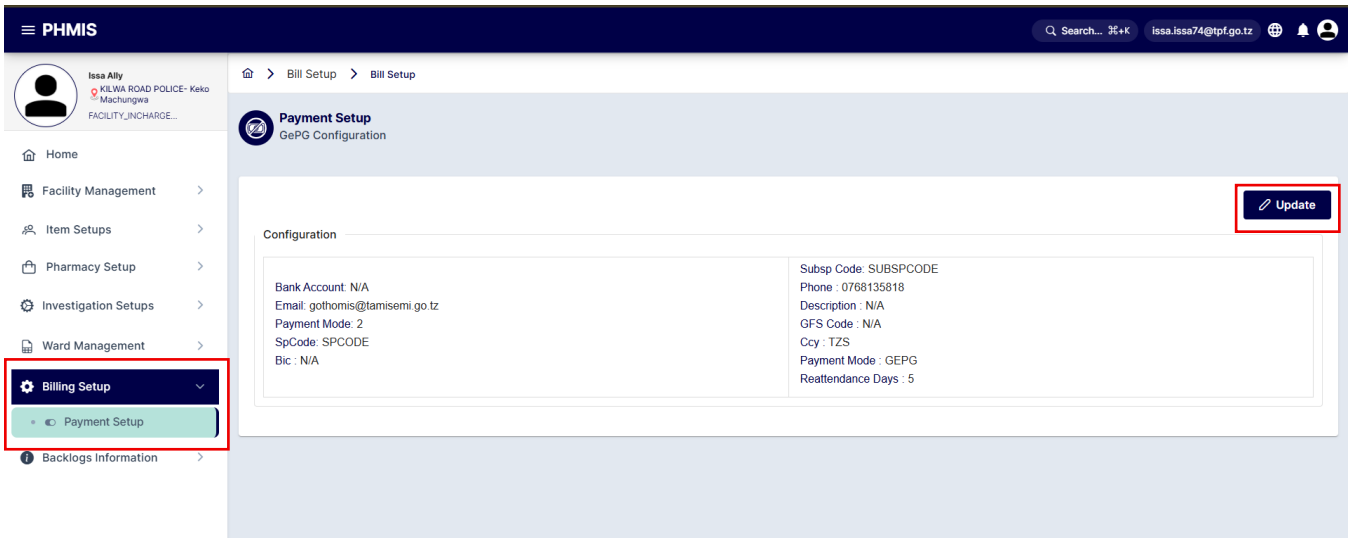


3.6 Backlogs Information

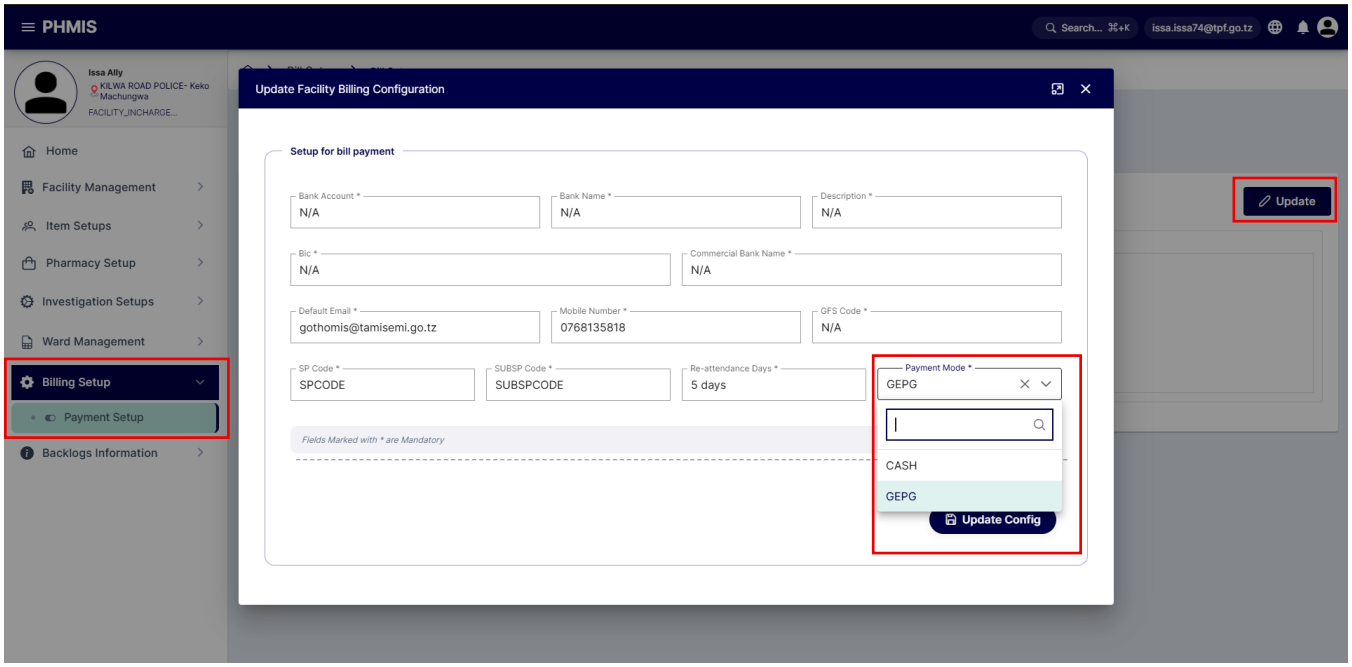
This module is used to transfer existing client information to the central database.

- Open Client Information then click Client Management and select Download Template. Fill the downloaded file with client information.
- When done, click Upload Client, select the file with client information, and upload.

NOTE: *Maximum file size should not exceed 5MB. If the file exceeds 5MB, it must be split into smaller files.*



Then click Update to save Payment Mode;



3.7 User Management

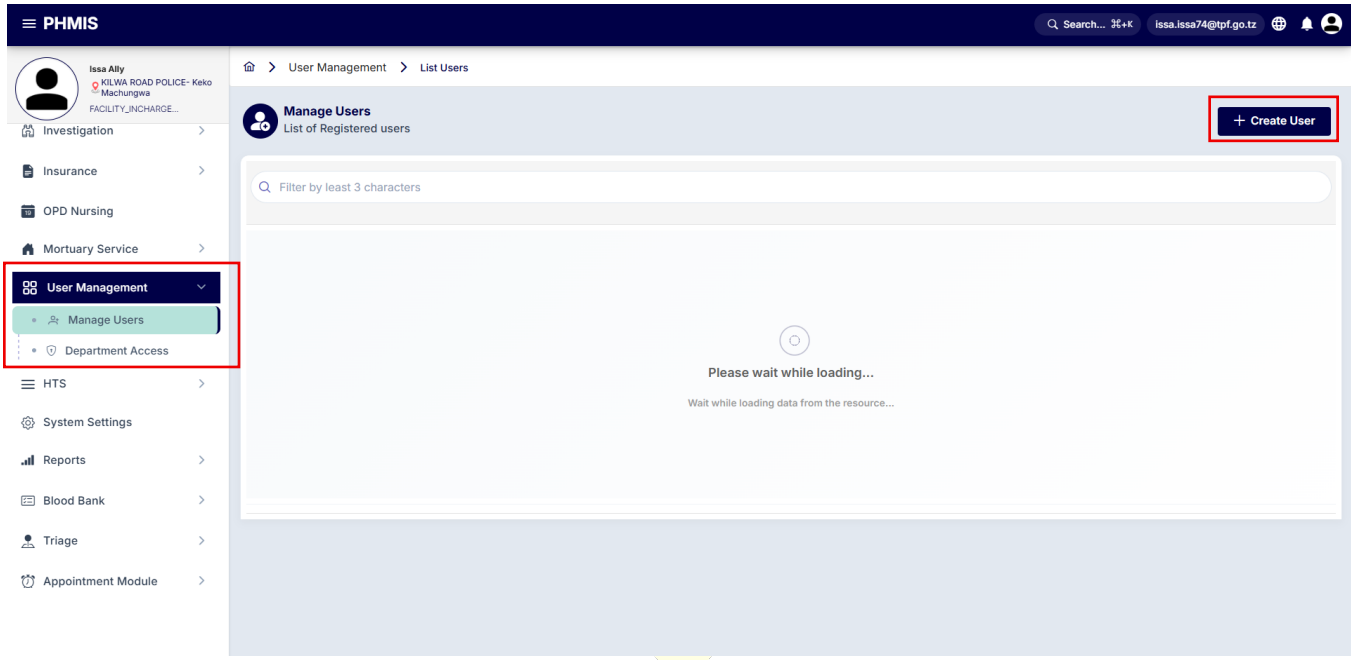
This module has two sub-modules: Manage Users for managing facility system users, and Departmental Access for managing user roles.

3.7.1 Manage Users

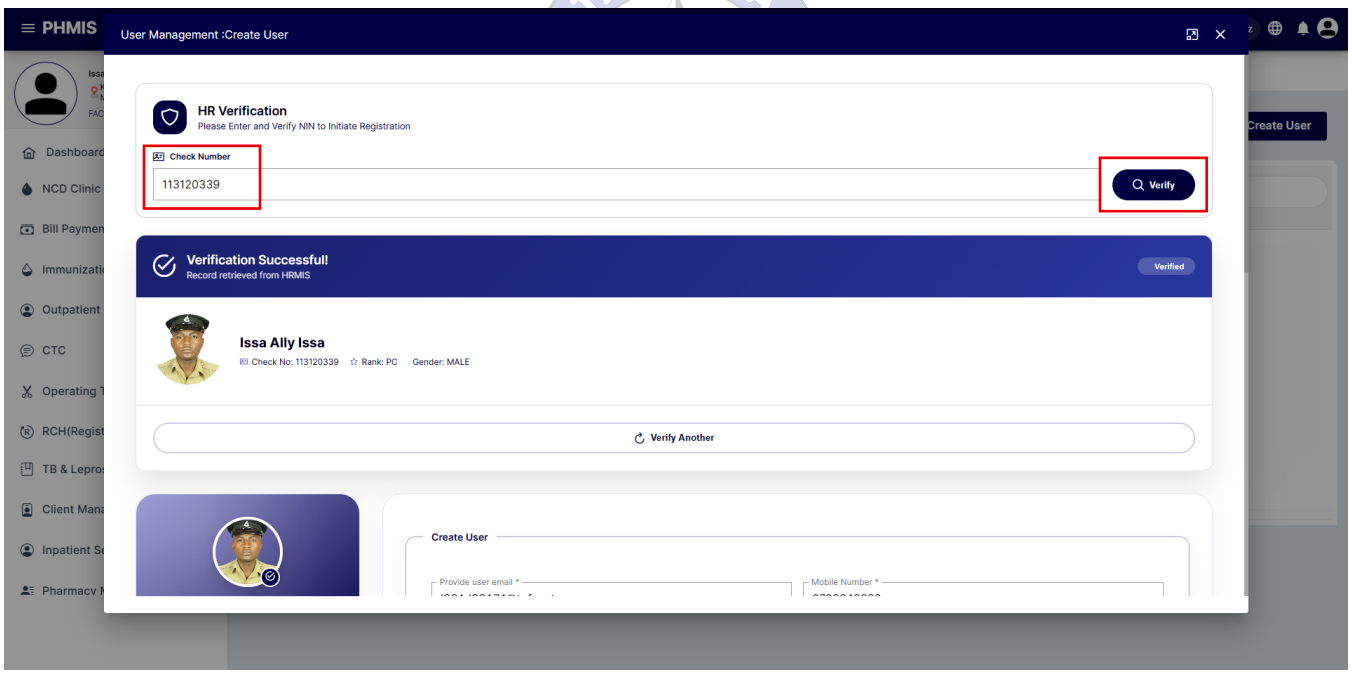
This module enables the Administrator to reset passwords, update details, and view user permissions.

- Registration of a user requires a National Identification Number (NIN). Before starting user registration, the NIDA information should be in place.
- To register a new user, navigate to User Management, then click Manage User, then click Create User.

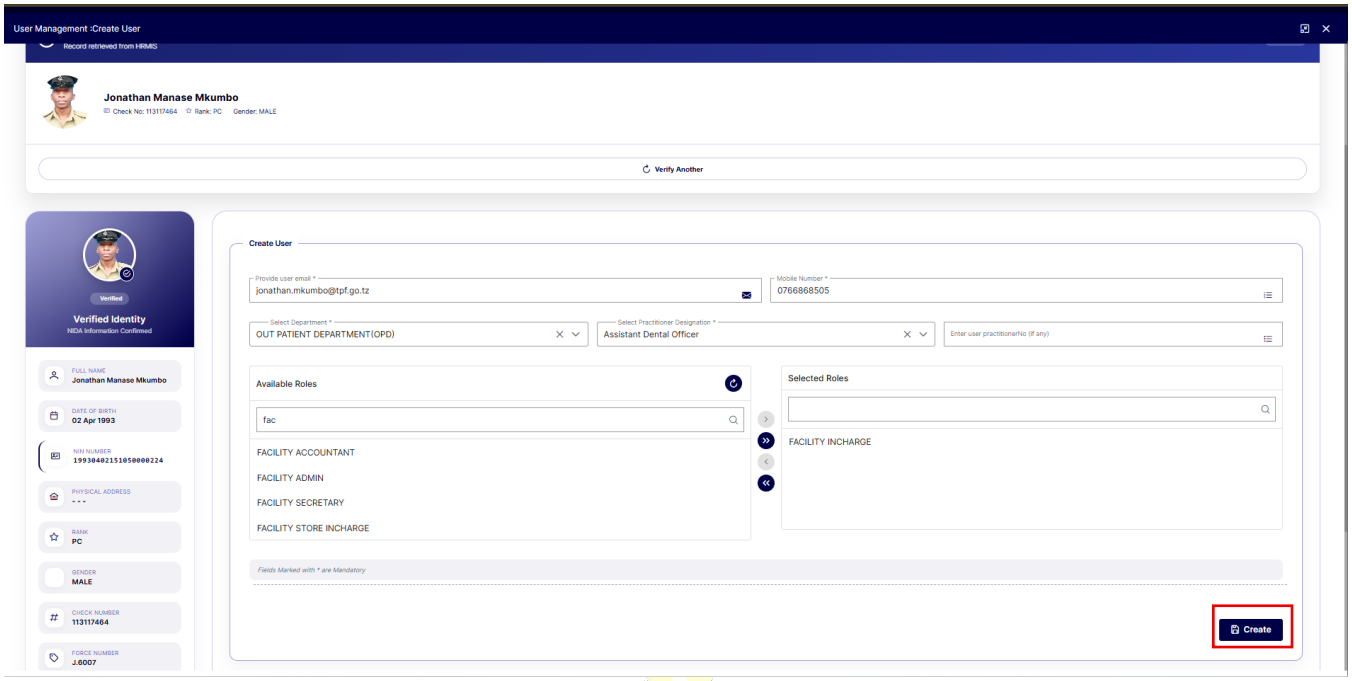
- A pop-up will appear requesting the NIDA number of the user. Enter the NIDA number and click Verify. The system will show verification questions. If answered correctly, the system will proceed to the registration window.



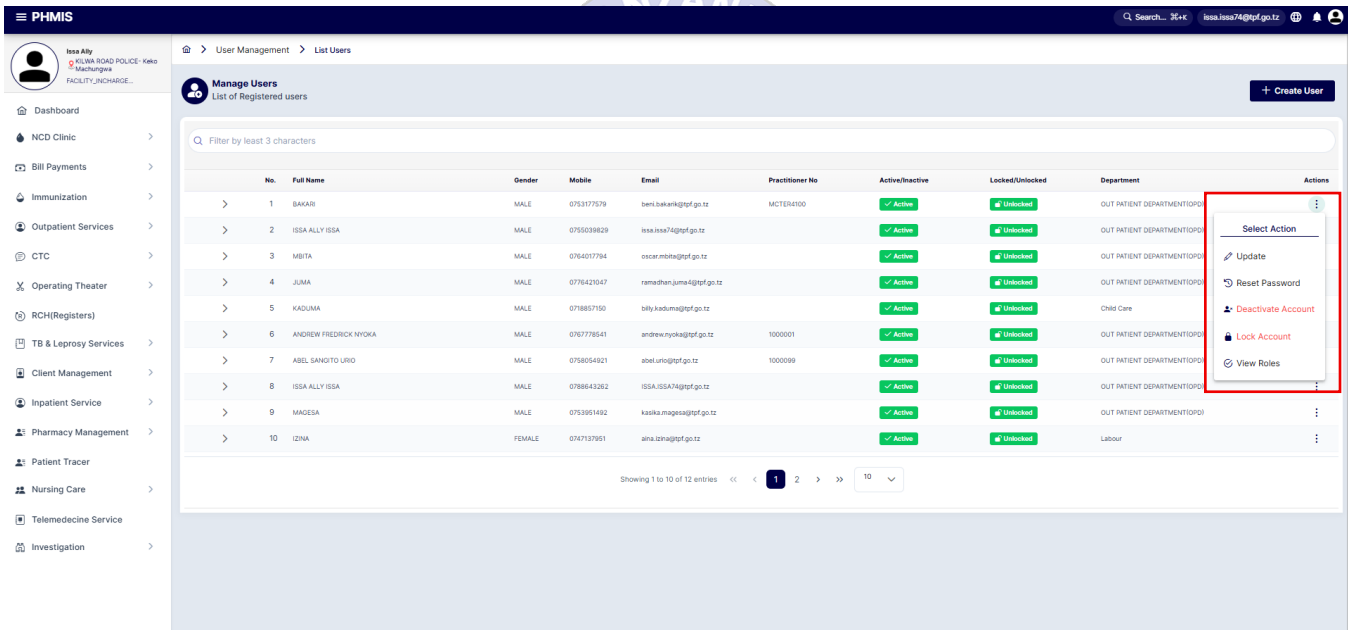
Enter User check number then Click Verify;



After filling all required details including choosing role of the user then click Create;



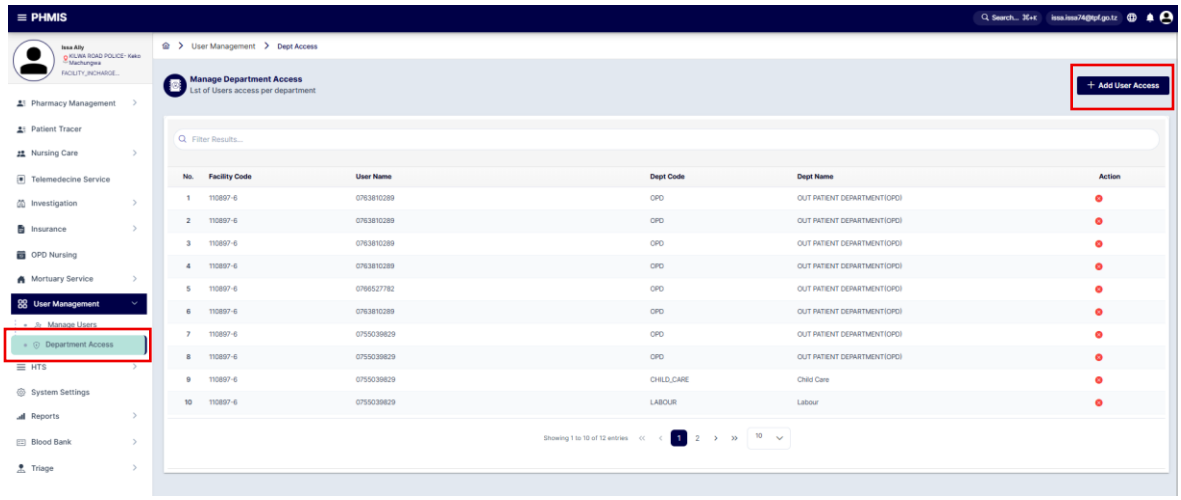
Select different type of actions to perform on each user;



3.7.2 Departmental Access

Under this module, all facility users are assigned to their respective departments.

- To assign a user to a department, navigate to User Management, then go to Departmental Access, then click Create.
- Search the user, assign them to the department, and click Save.



- Click Departmental Access to view users with their departments. To remove a user from a department, click the red X under the Action column.

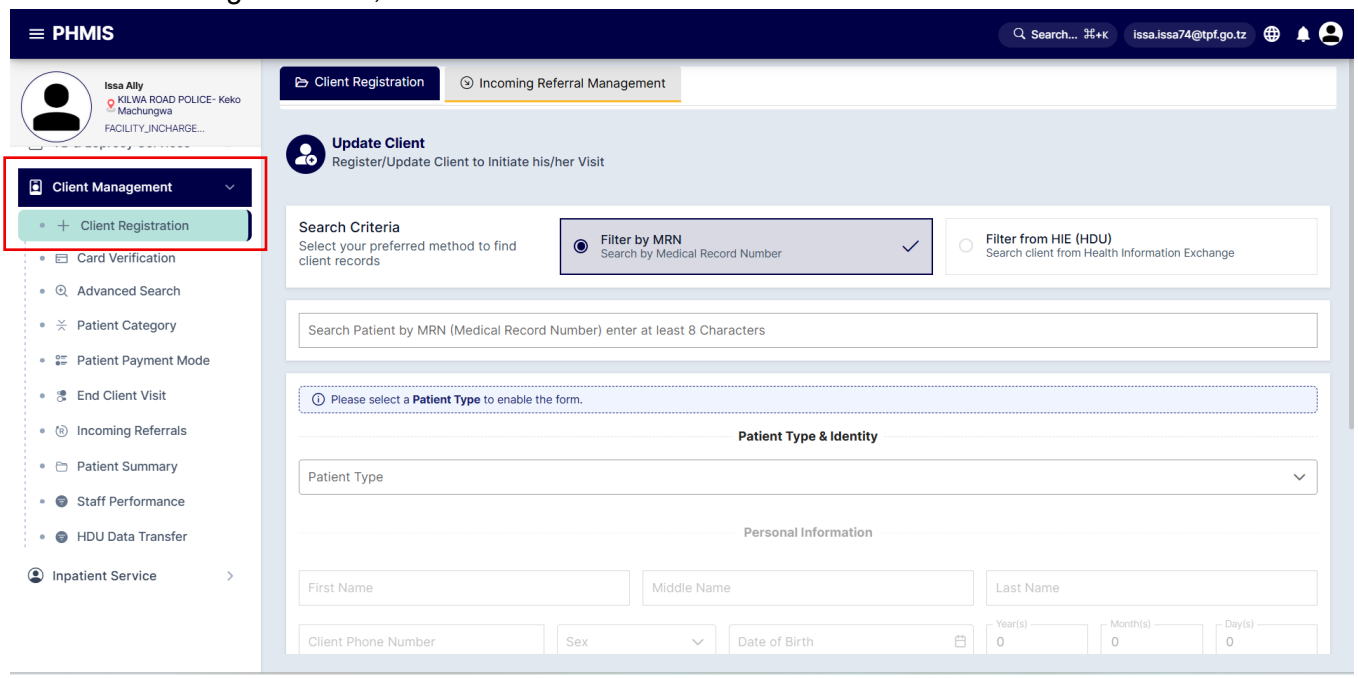
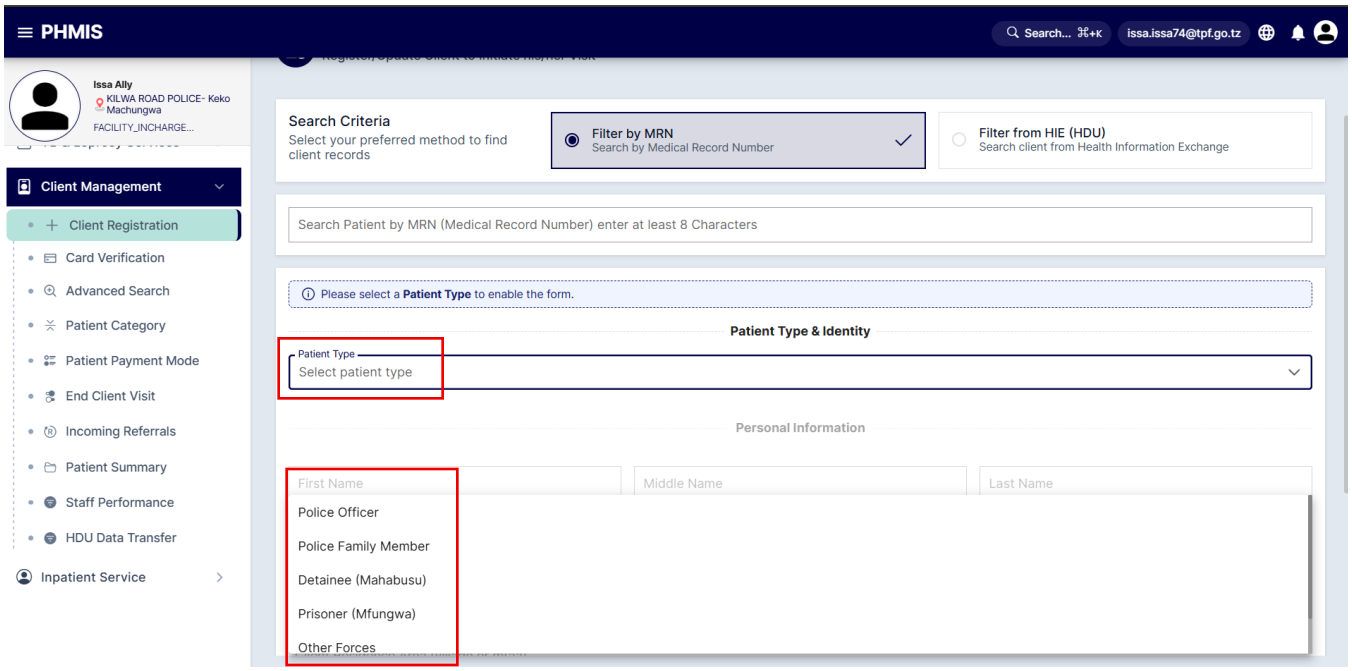
4.0 Client Management

The Client Management module comprises eight (8) sub-modules dealing with client information. These modules allow Client Registration, Card Verification, client searching, changing Patient Category, managing Patient Payment Mode, ending client visits, viewing and managing incoming referrals, and managing staff performance reports.

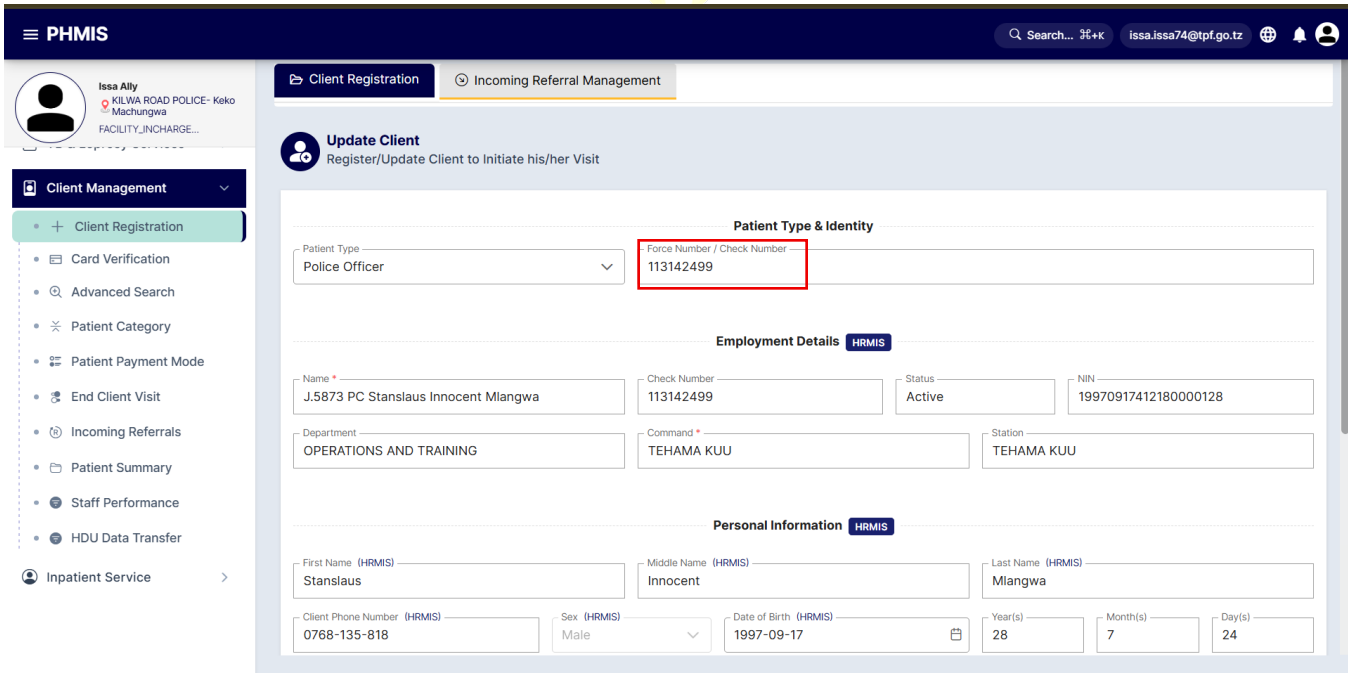
4.1 Client Registration

- To register a client attending for the first time, navigate to Client Management then click Client Registration. The registration window will open.
- Click Full Registration to add Next of Kin information and all other required fields.
- After filling all details, click Submit Form.

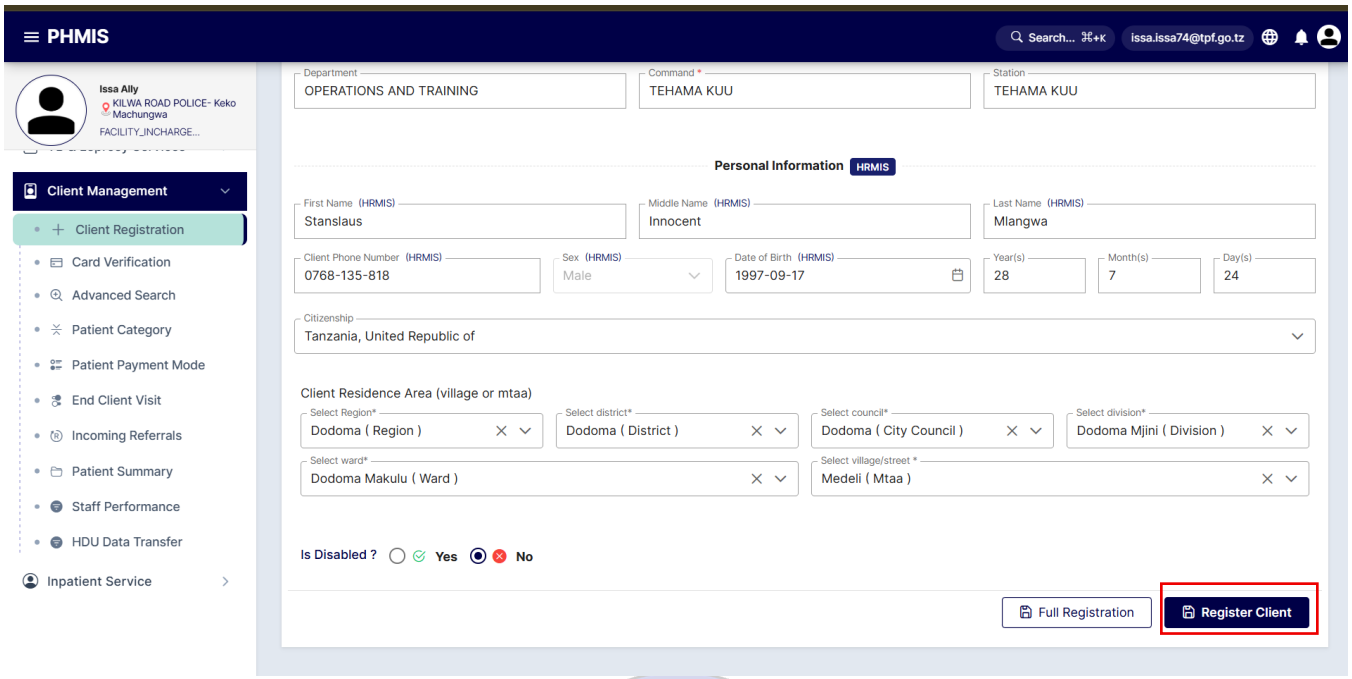




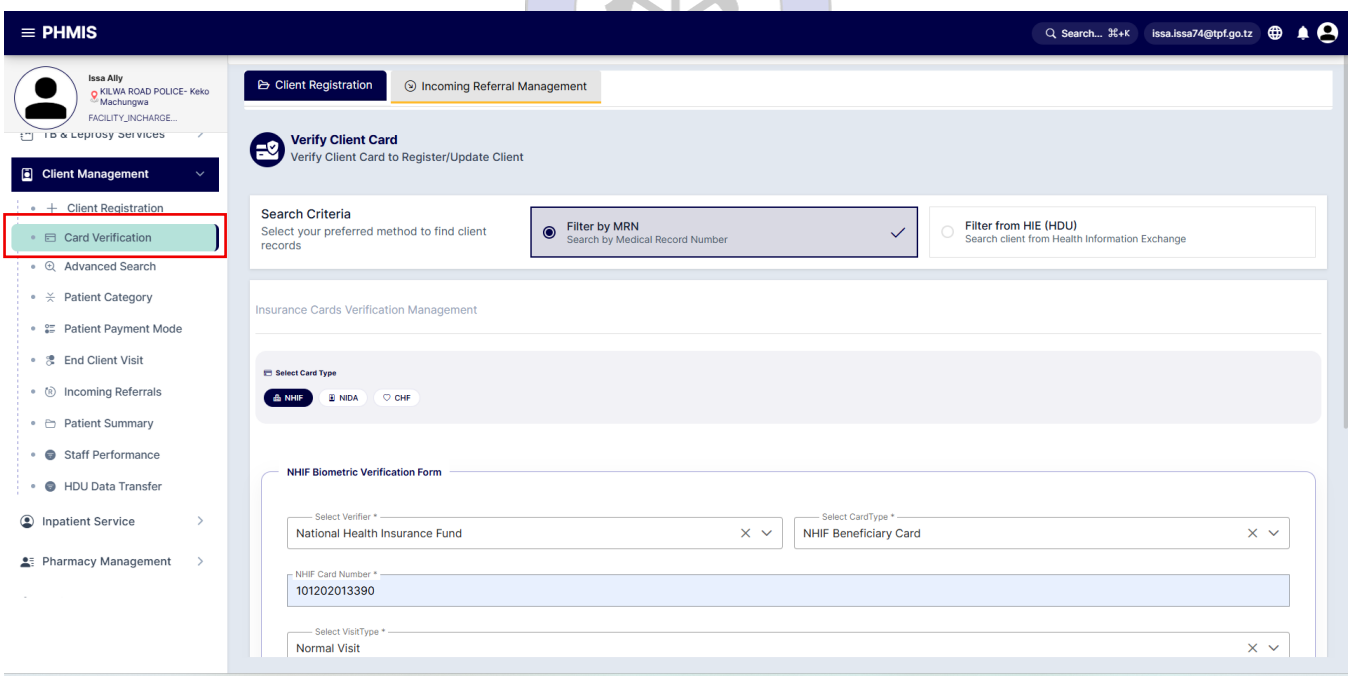
Enter Check Number for if Client is Police Officer;



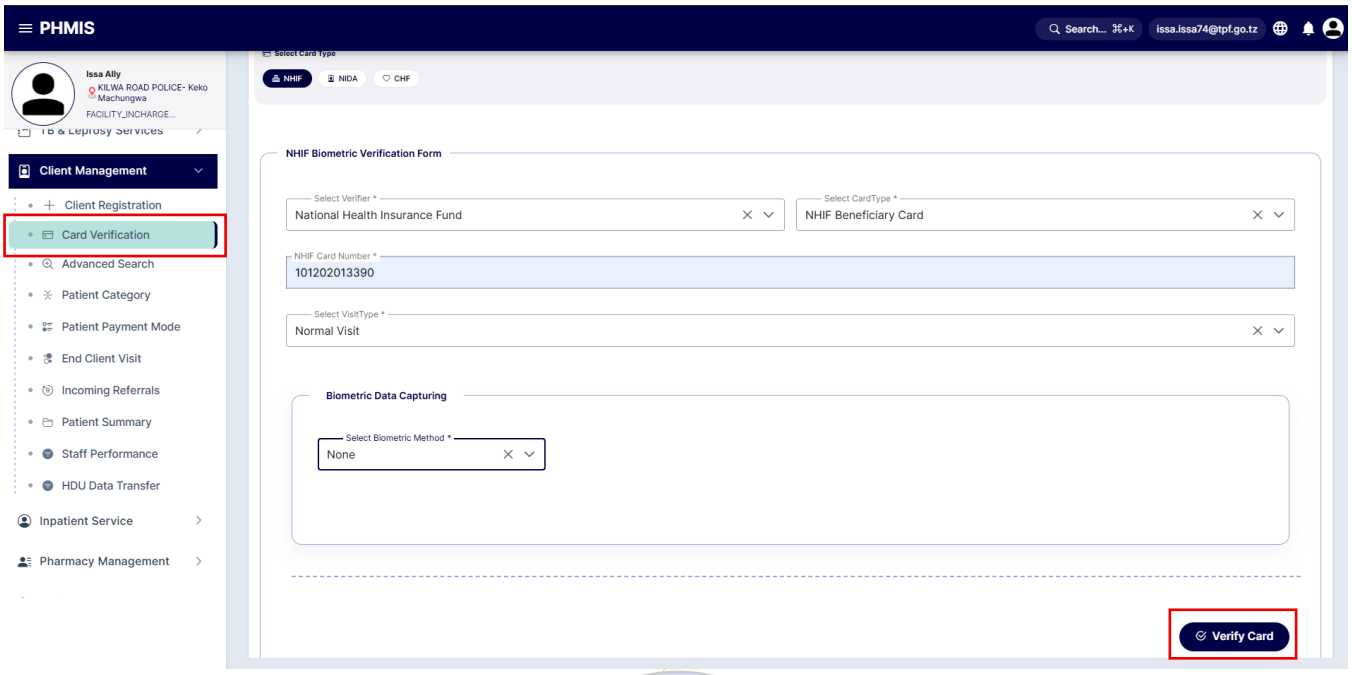
After filling in Residence Area then click Register Client;



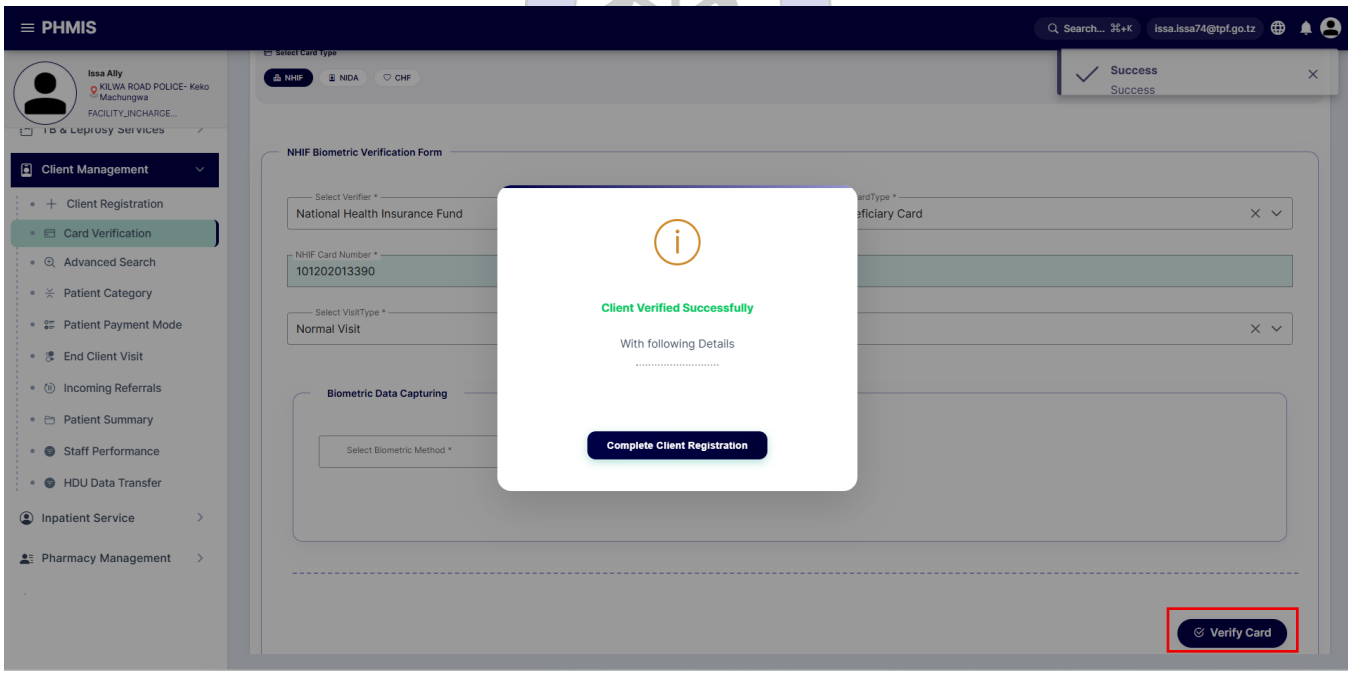
In Card Verification fill in required details through NHIF, NIDA or CHF



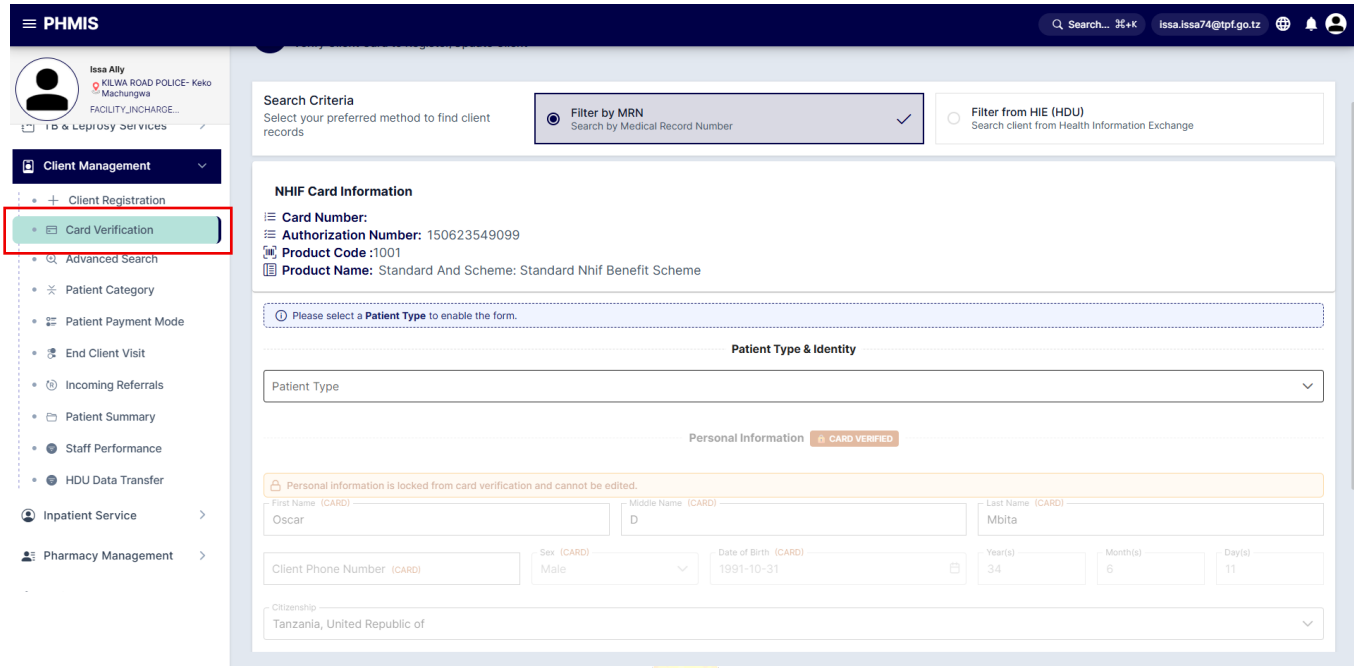
Then click verify card;



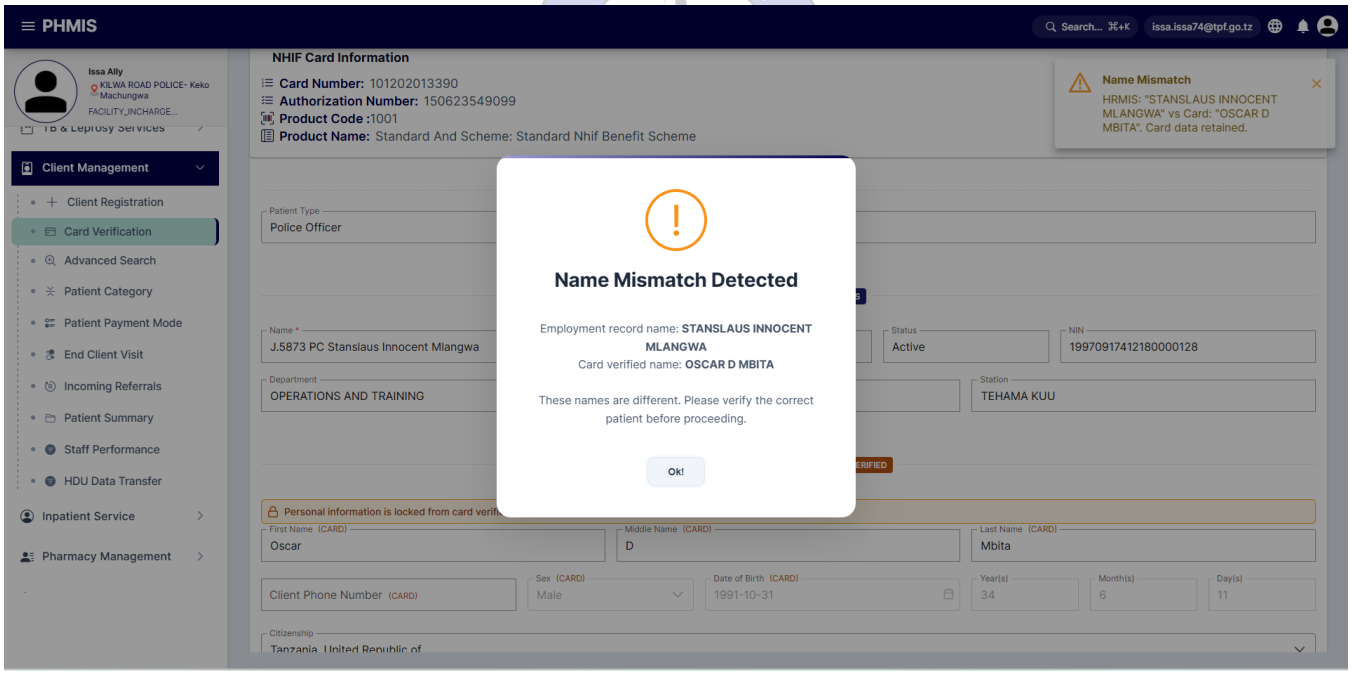
Complete registration message will pop-up;



Select Patient type and Identity after getting Authorization Number;

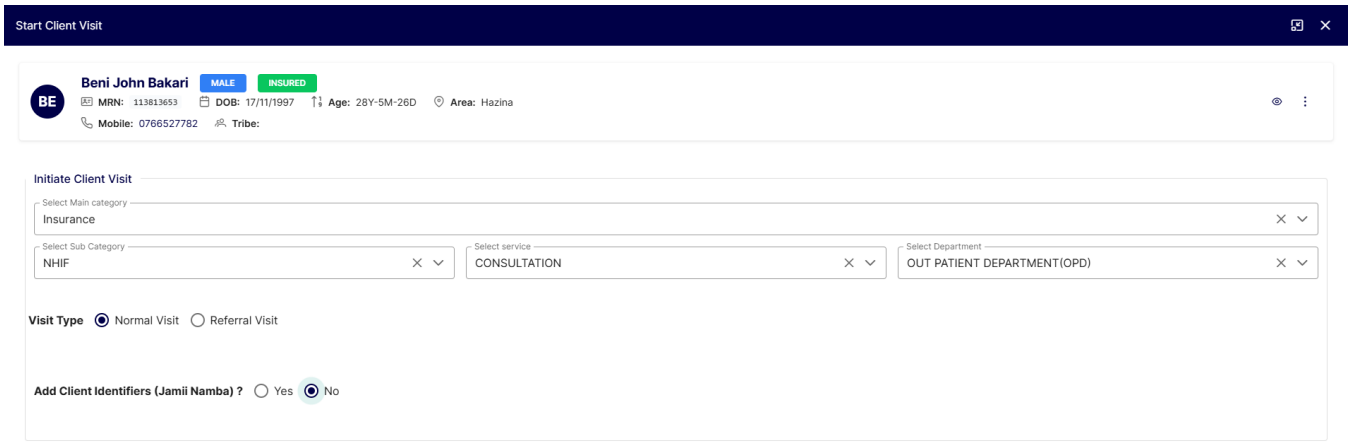


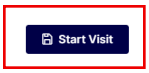
Card Verification is done here for Police Officer to match the records;



For Normal Client Visit:

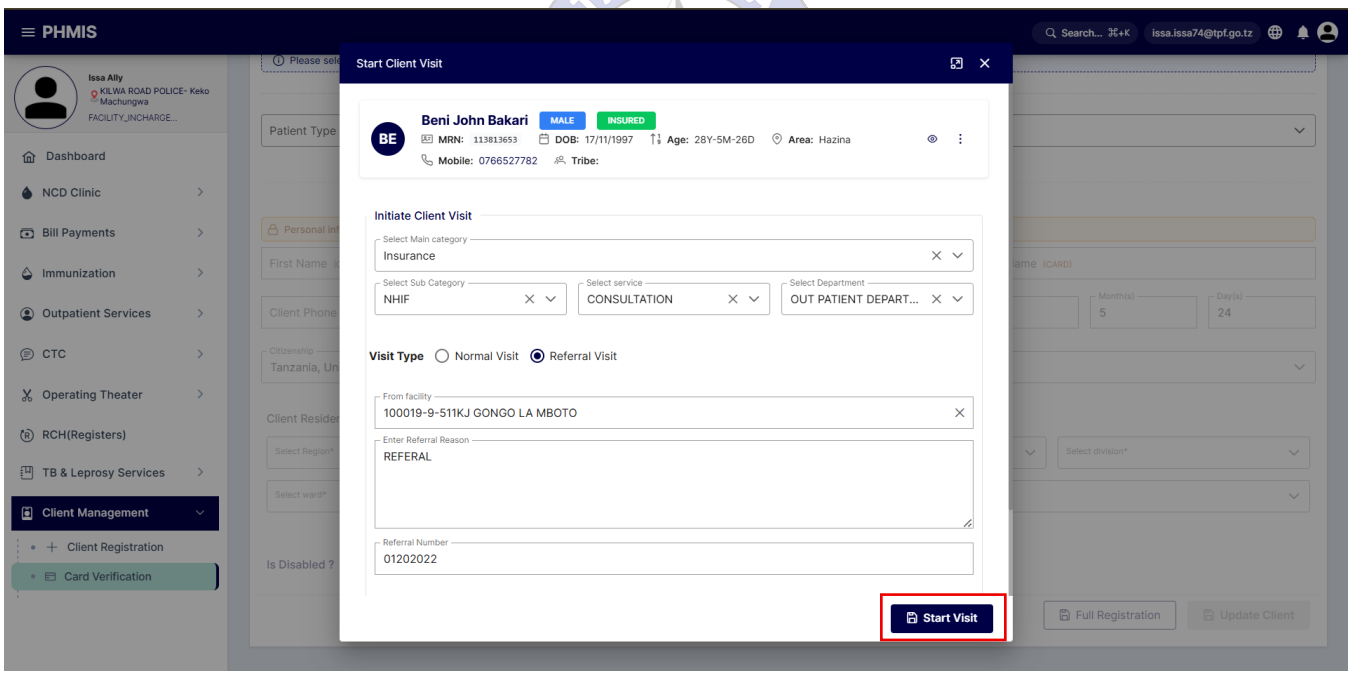
- After clicking Submit, a pop-up window labelled "Start Visit" will appear.
- In Initiate Client Visit, select the appropriate category, sub-category, service, and department.
- Select visit type, then click Start Visit when done.





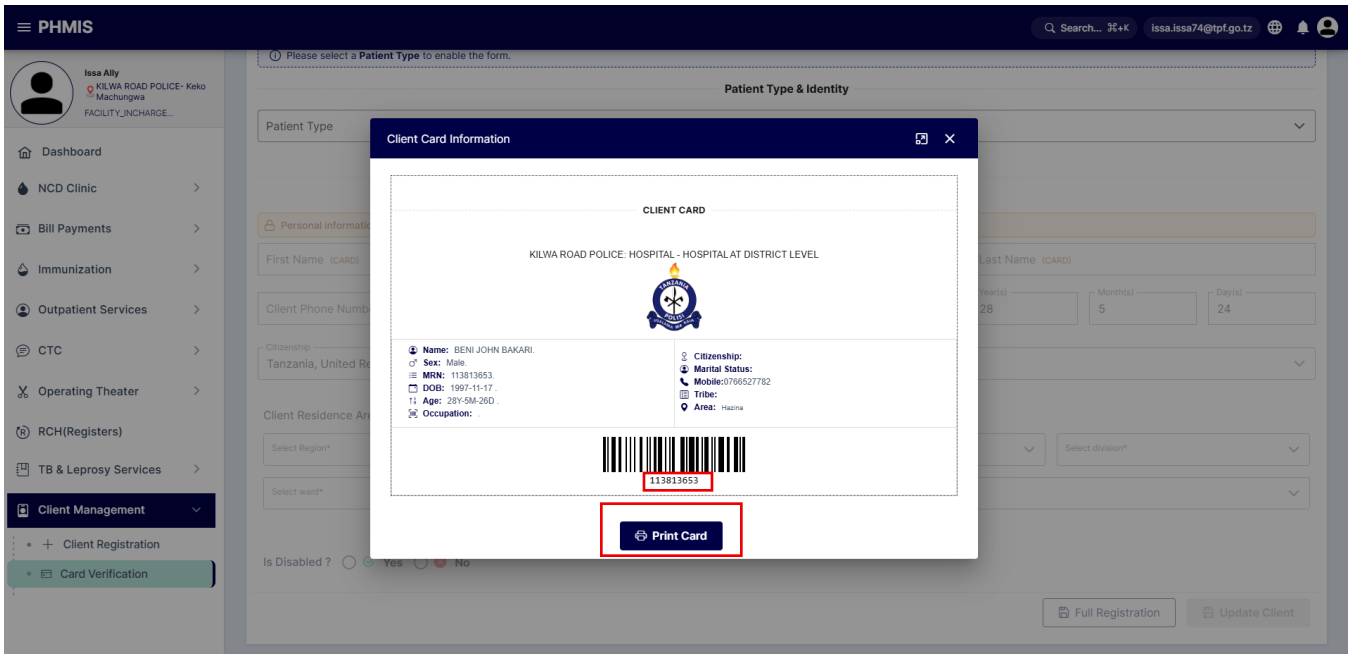
For Referral Visit:

- In the Initiate Client Visit form, select category, sub-category, service, and department, then select the Referral Visit radio button.
- Fill all required fields and then click Start Visit.



By clicking Start Visit, a client card will be generated with all patient information including the Patient Identity Number (MRN).

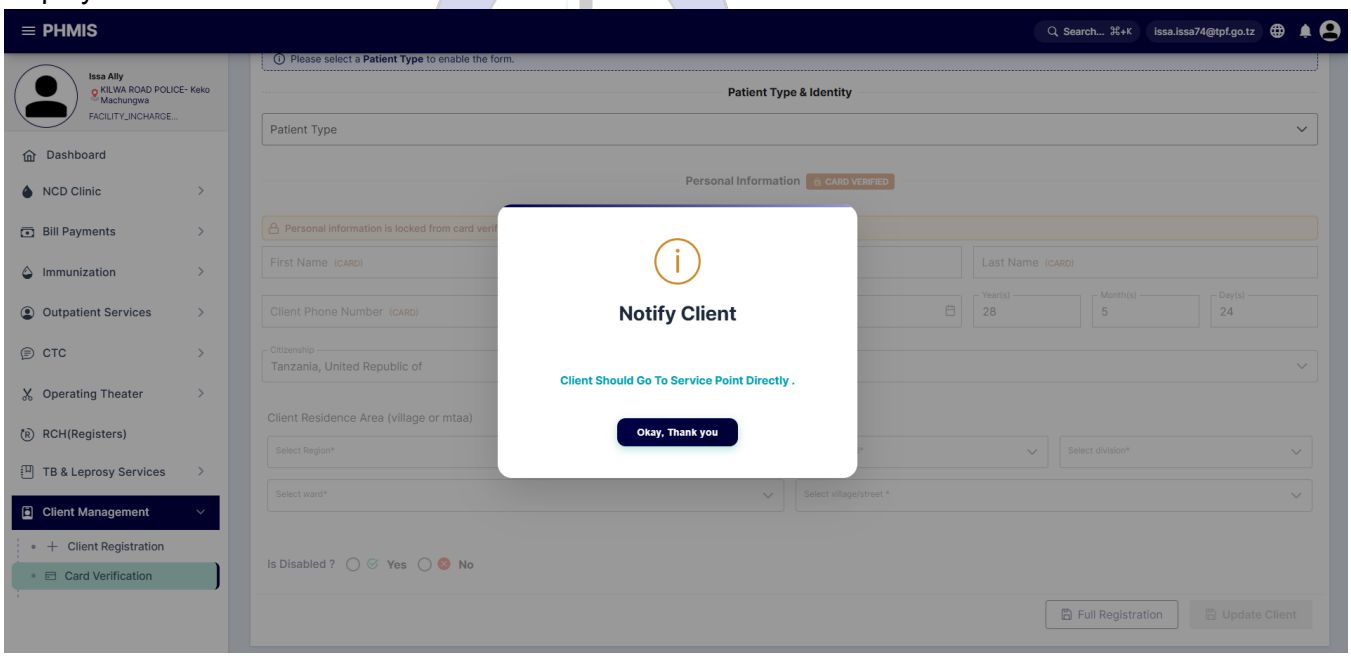
Click Print Card to get a hard copy if your device is connected to a printer.



4.2 Card Verification

For clients using insurance, card verification is required.

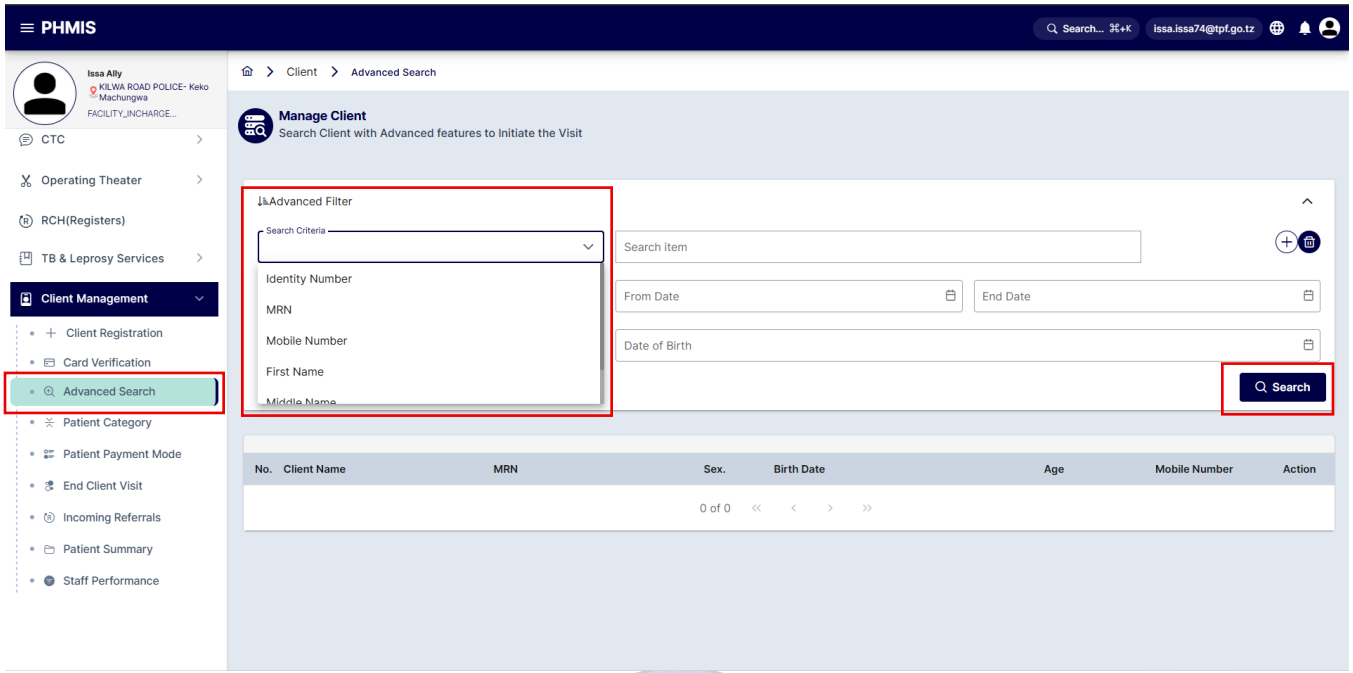
- Open Card Verification, then select the card type and enter the card number.
- Click Verify. If the card is valid, information related to that particular card will be retrieved and displayed.



4.3 Advanced Search

This module allows system users to search for client details using various criteria.

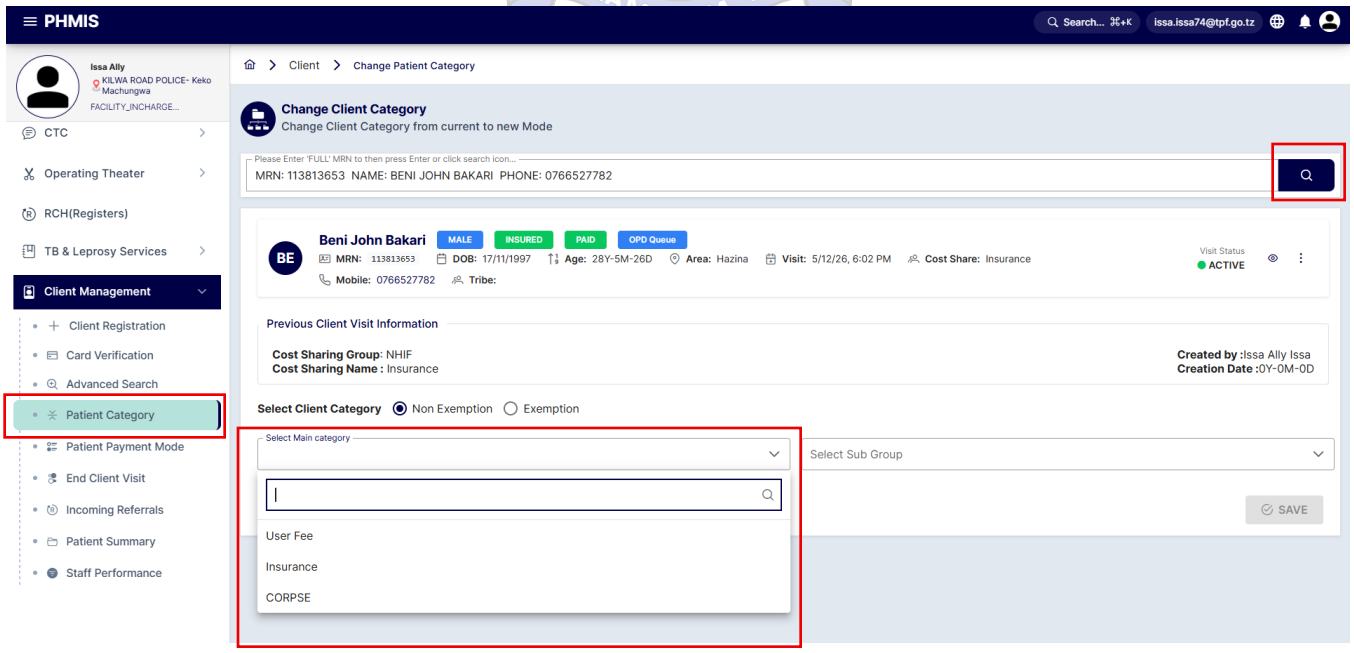
- Open Advanced Search, select a criterion, enter the search term, and click Search. The requested results will appear if available in the system.
- Users can also search by entering a date range showing when the patient last attended.



4.4 Patient Category

To change a patient's category:

- Click Patient Category and enter the patient MRN you want to change.
- Select the client category, main category, and sub-category from the list.
- Click Save. Note: The change will not affect previous bills, only bills generated after the change.

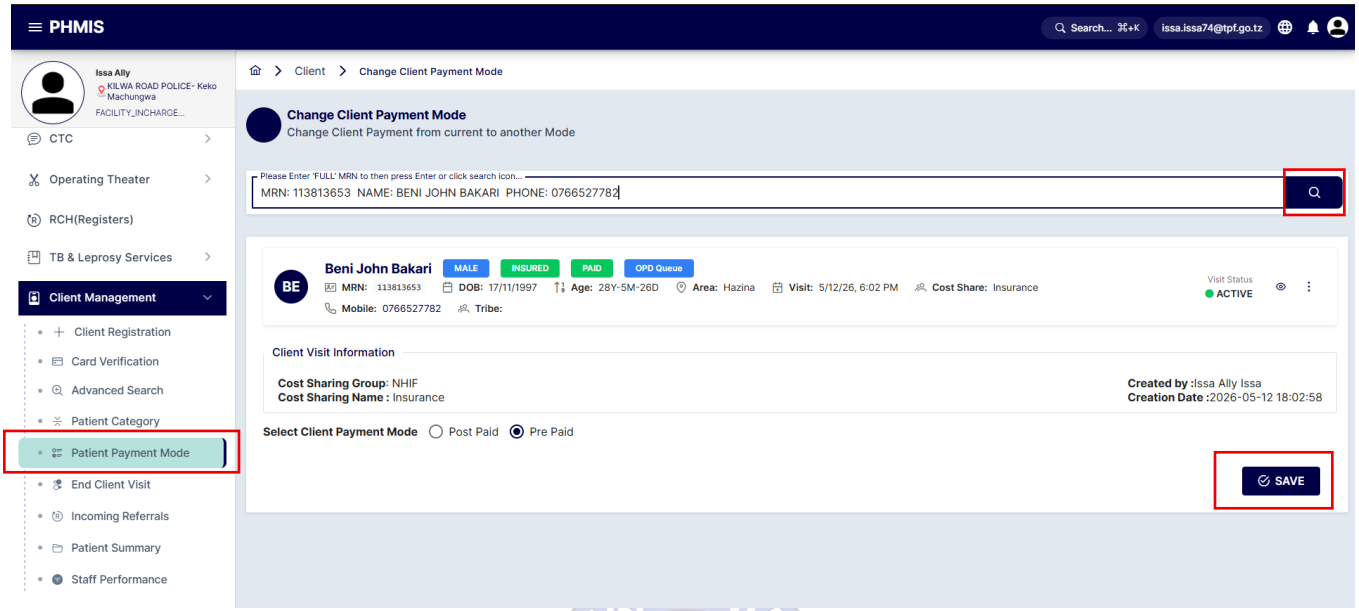


4.5 Patient Payment Mode

To change patient payment mode:

- Click Patient Payment Mode and enter the patient MRN.
- Select the client payment mode and click Save.

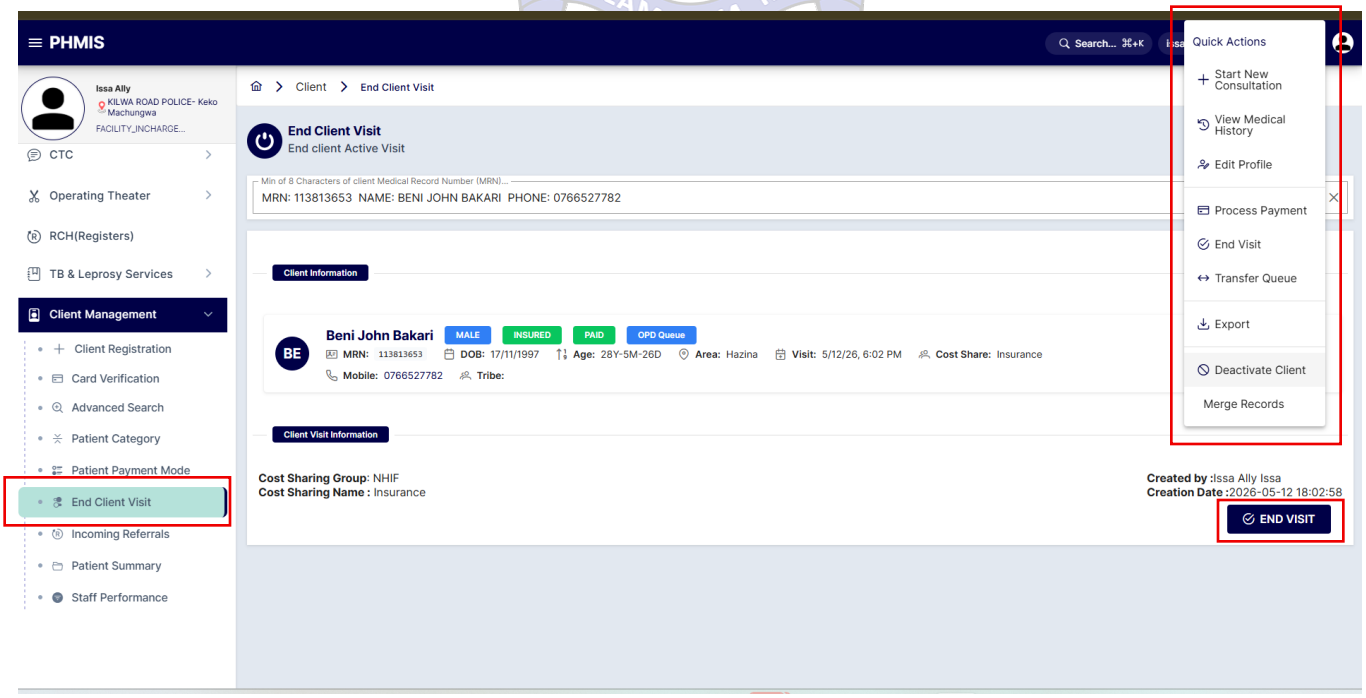
NOTE: *Postpaid mode is set to enable the patient to receive treatments and make payments later.*



4.6 End Client Visit

To end a client visit:

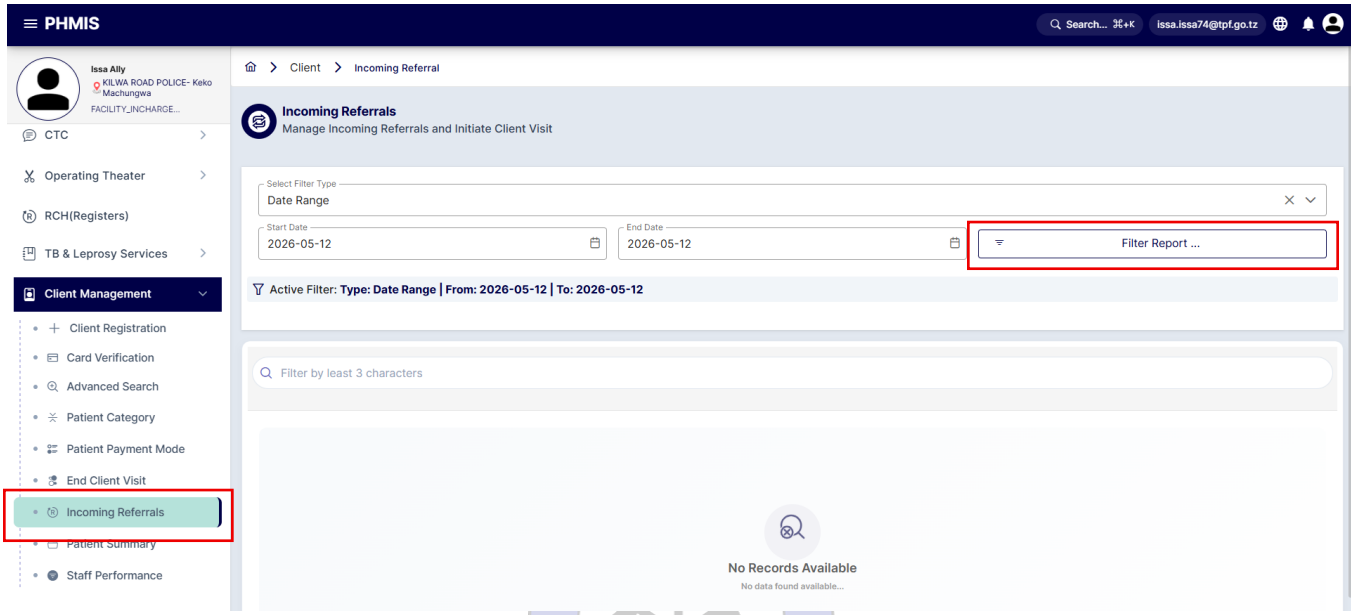
- Click End Client Visit and enter the patient MRN.
- Click END VISIT. For NHIF clients, a form to sign will appear.



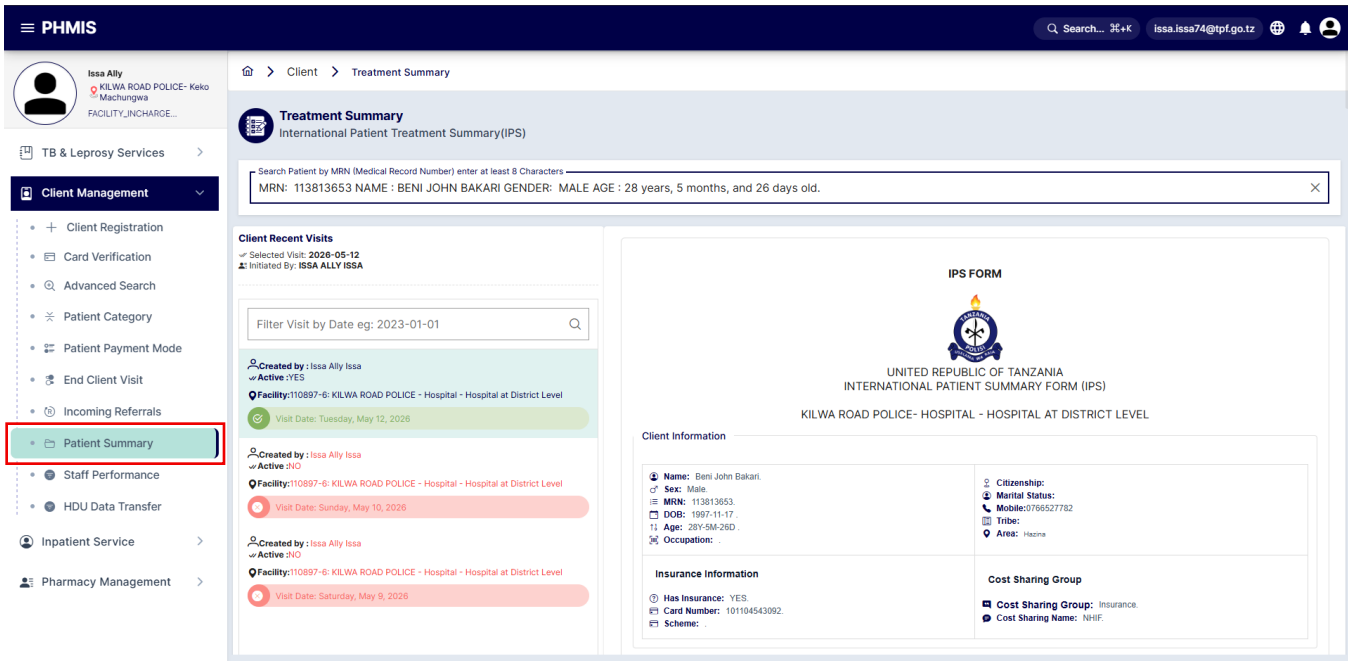
4.7 Incoming Referrals

This module allows users to see all clients referred to their facility.

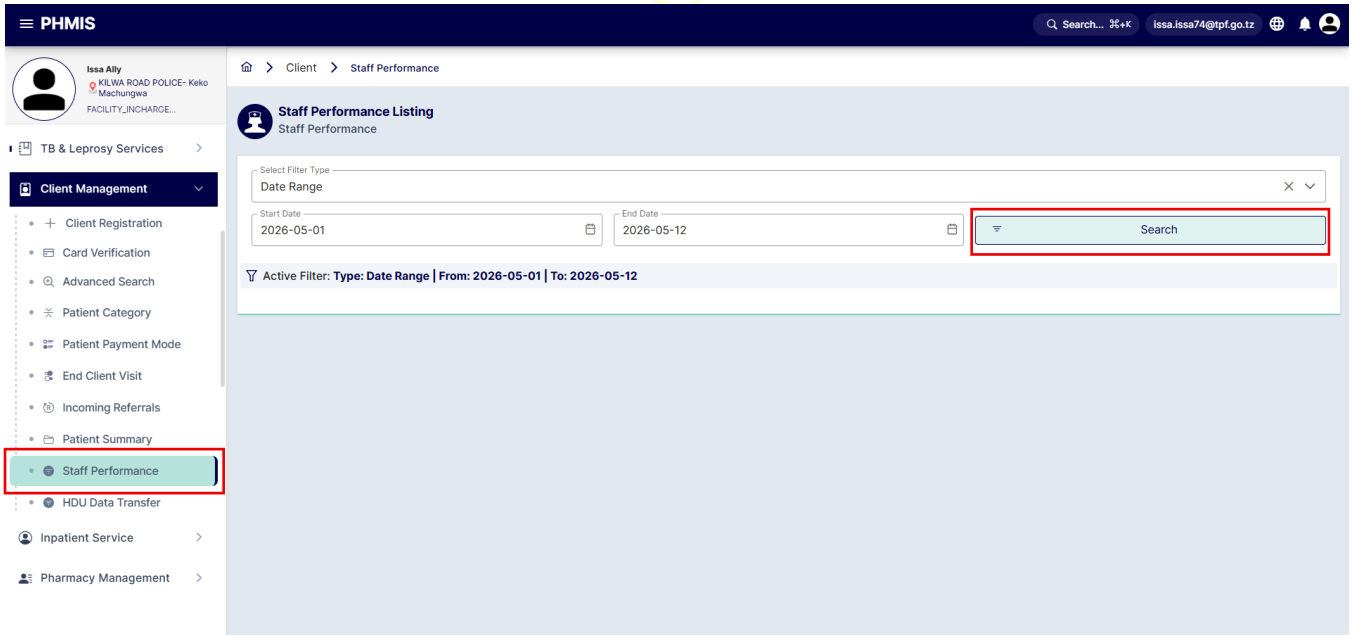
- Click Incoming Referrals, then select the patient and click the three dots under the Action column.
- Select the appropriate option based on the patient's payment mode, or select Cancel Referral if the referral is not valid.

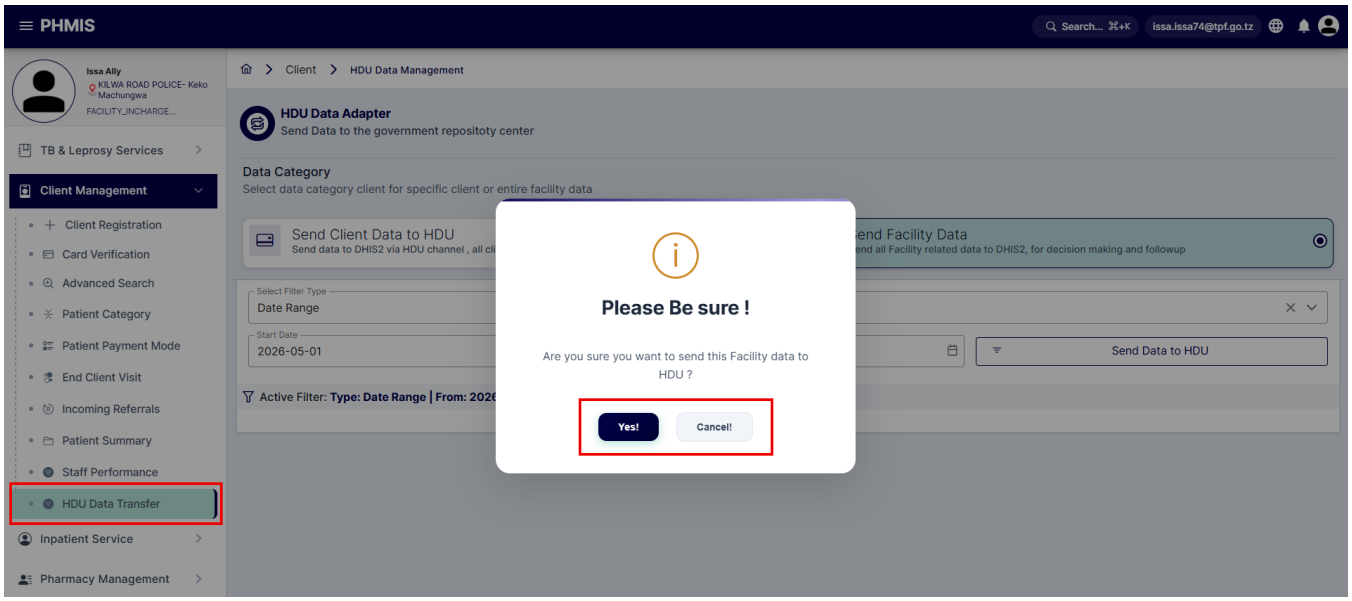


Patient summary Enter MRN then click Search;



Staff Performance select date range and click search;

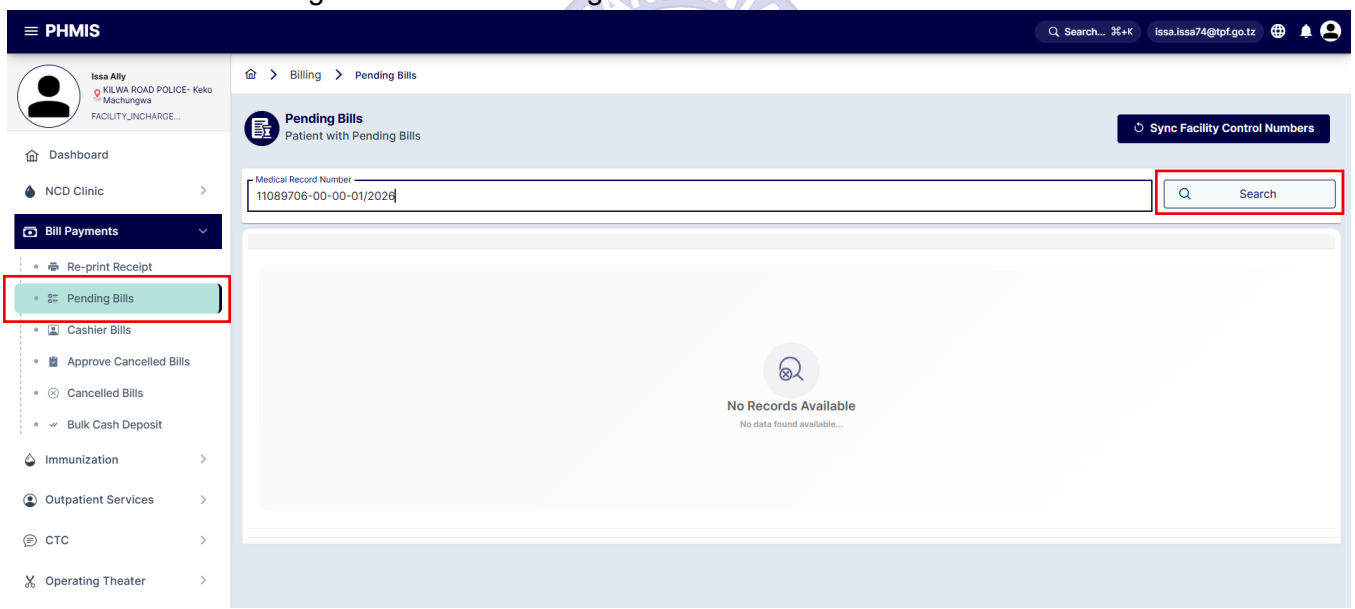




5.0 Bill Payments

This module shows all client bill information including pending bills.

- Click Bill Payments.
- Click Search to get a list of all Pending Bills.



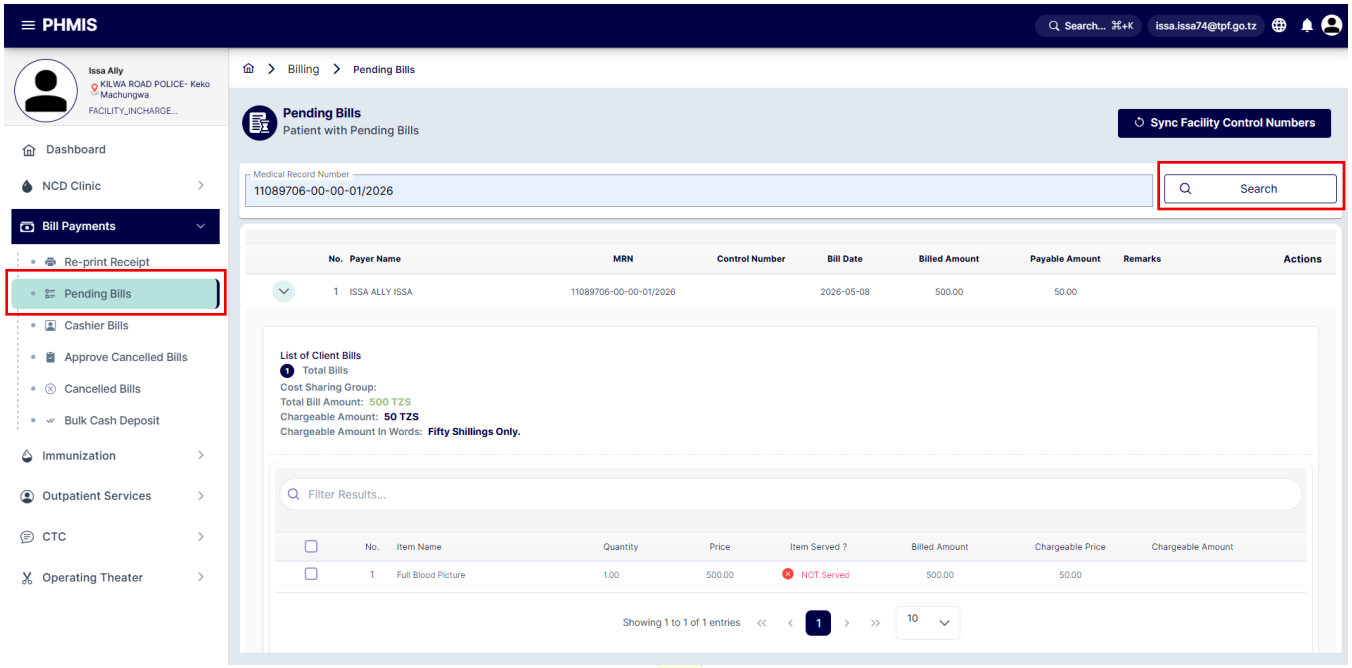
5.1 Pending Bills

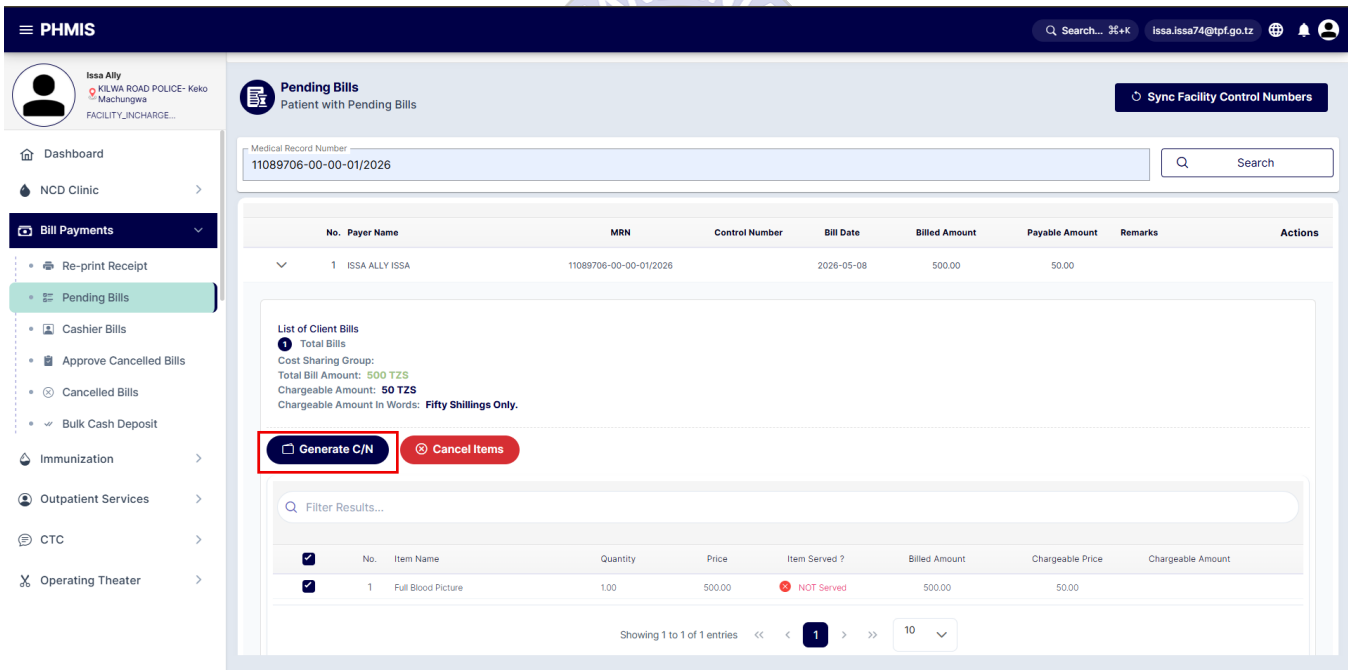
To attend to a specific patient:

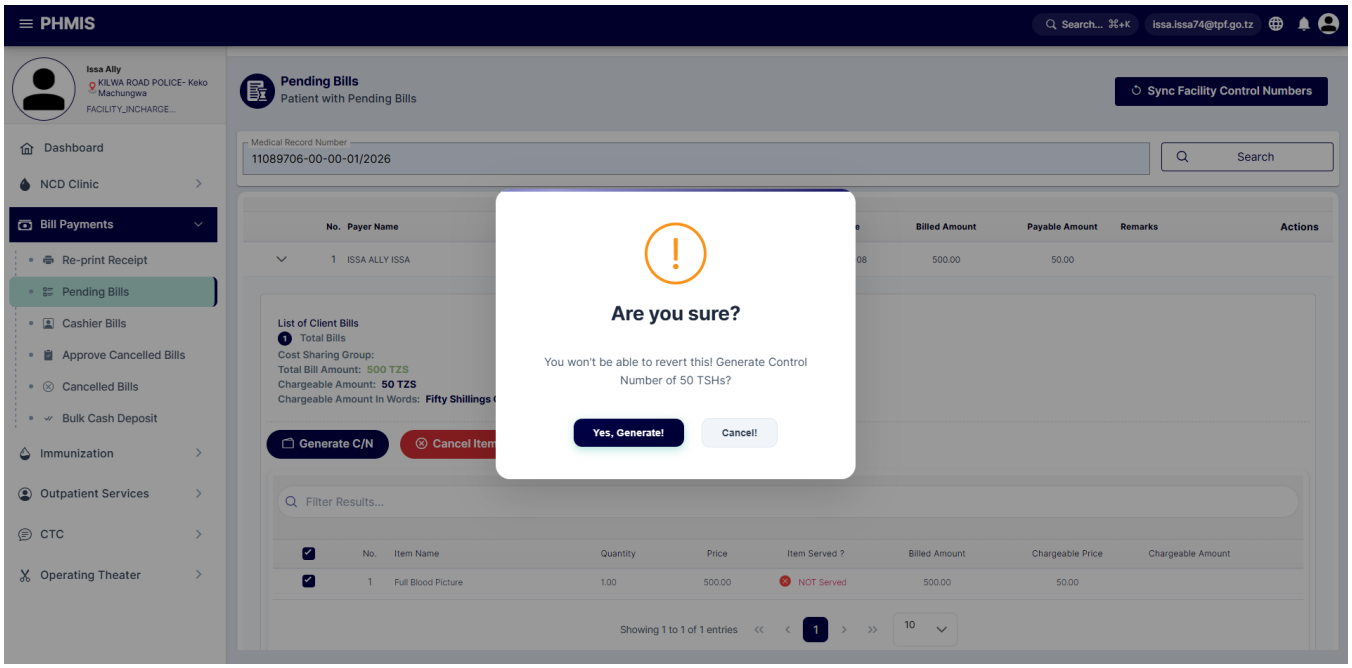
- Enter the patient MRN and click Search.
- From the patient's name, click the arrow to get the list of services.
- Select the services to pay by putting a tick in the checkbox.

- Click Collect Cash to process the bill.

To collect payment using a control number, click the Generate C/N button to request the patient's control number.

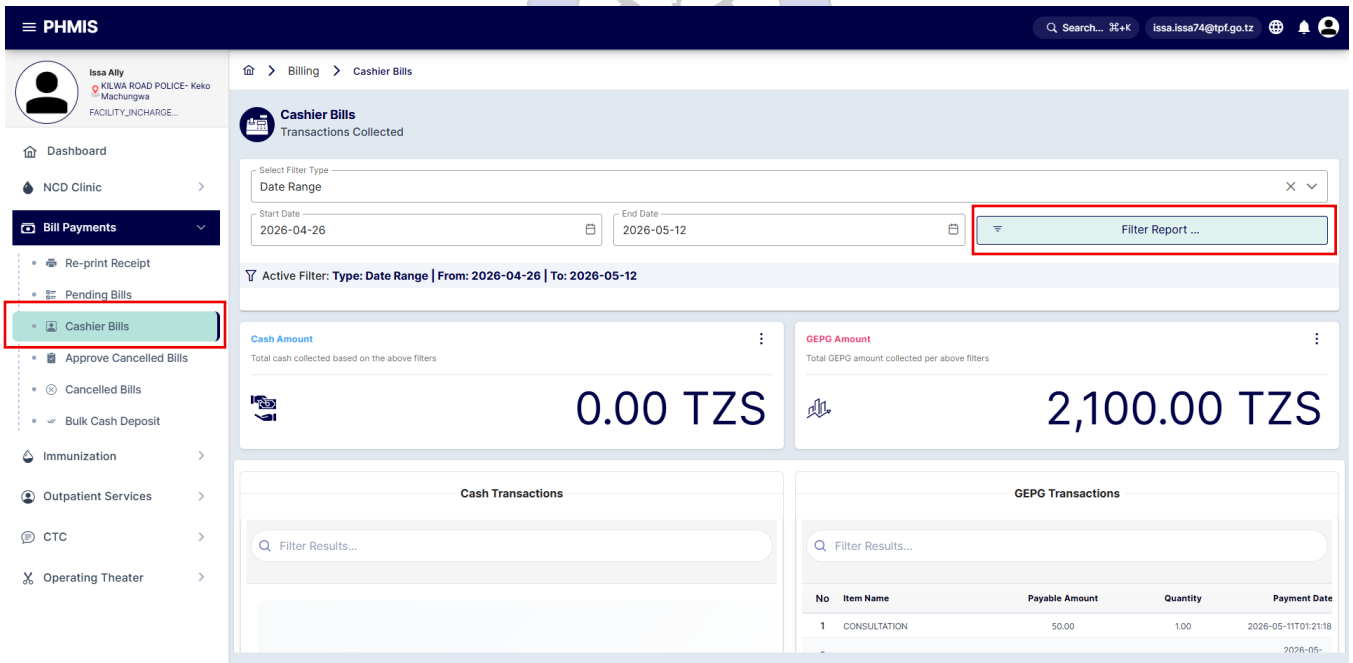






5.2 Cashier Bills

To view bills processed by a cashier, navigate to Bill Payments, open Cashier Bills, then enter date ranges and click Search. All bills processed by the cashier within the specified date range will be displayed.

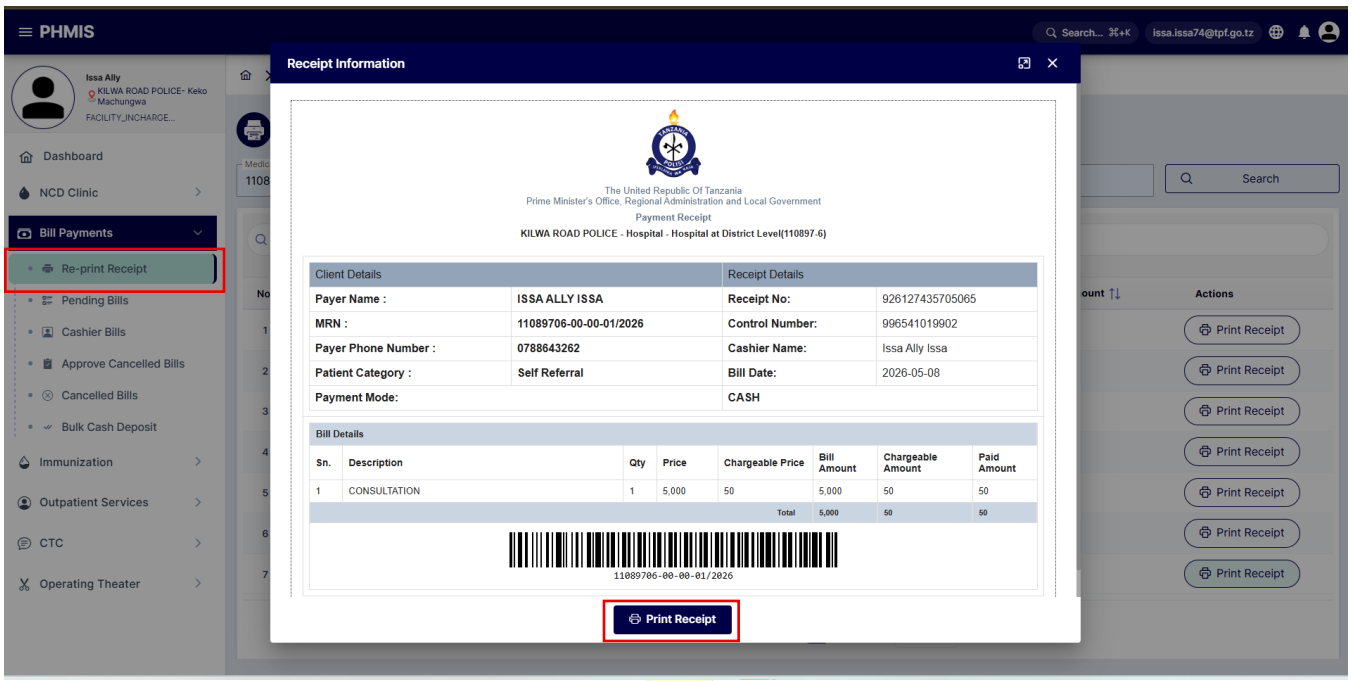


5.3 Reprint Receipt

This module allows system users with access to re-print payment receipts.

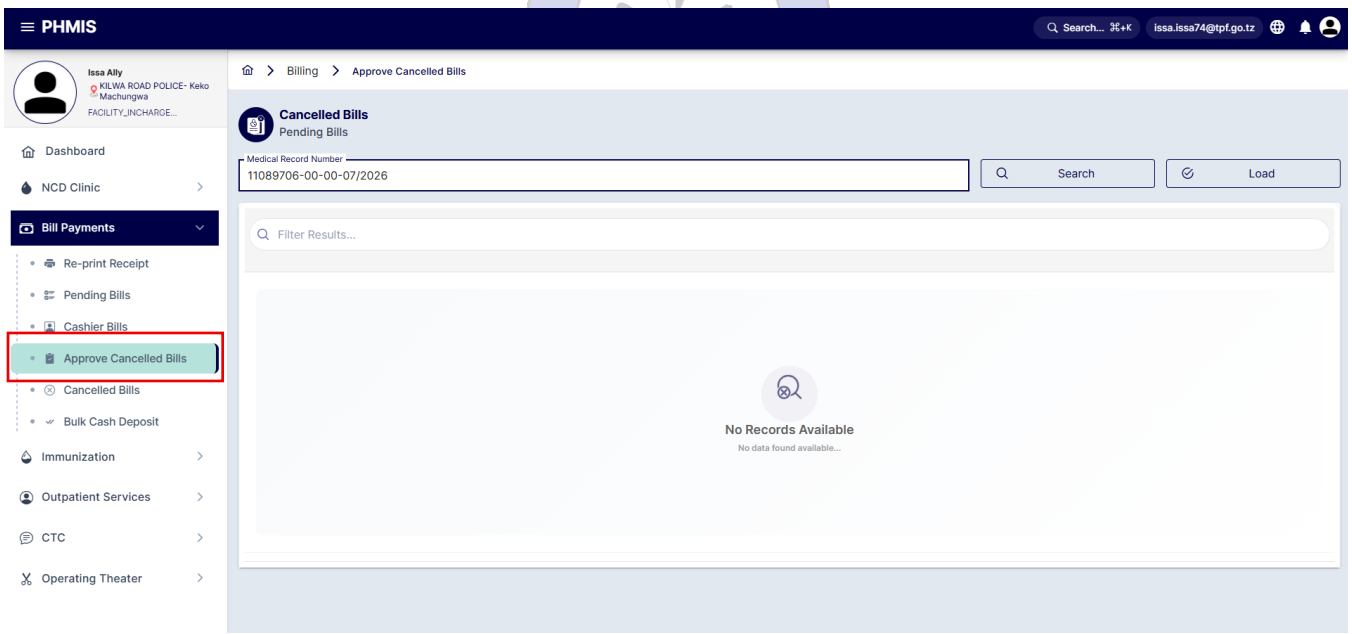
- Navigate to Bill Payment, then go to Reprint Receipt and enter the client's MRN and search.

- After the client appears, click the Print button to print a copy of the receipt.



5.4 Approve Cancelled Bills

Click Approve Cancelled Bills to view and process bill cancellation requests.



5.5 Cancelled Bills

Click Cancelled Bills to view all cancelled bills.

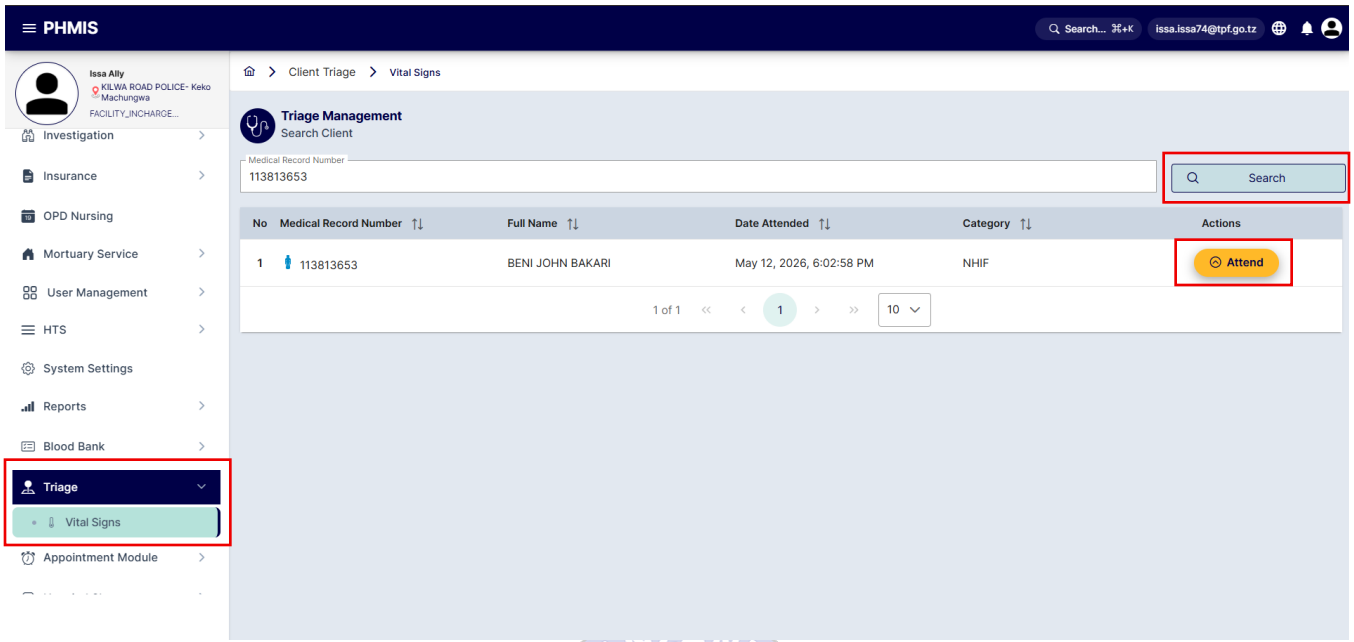
6.0 Triage

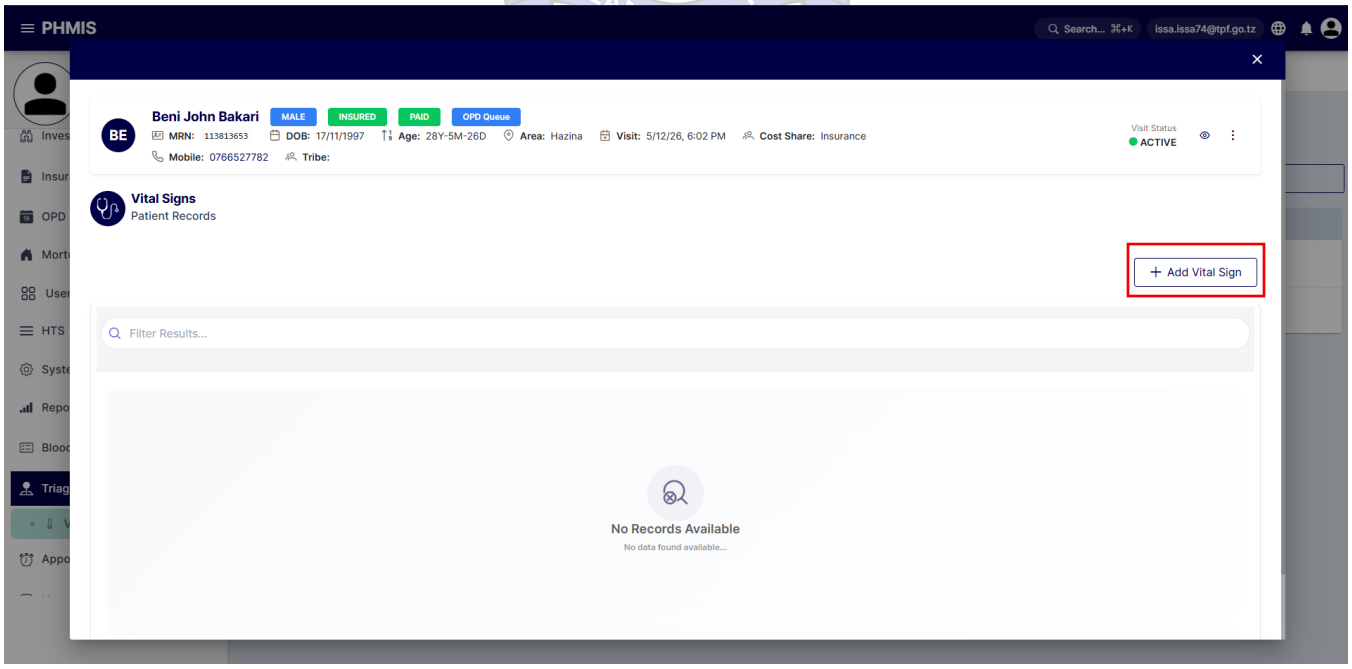
This module enables the user to take initial assessments of a patient before consultation. Initial assessments include blood pressure, body weight, height, oxygen saturation, pulse rate, temperature, respiratory rate, and more.

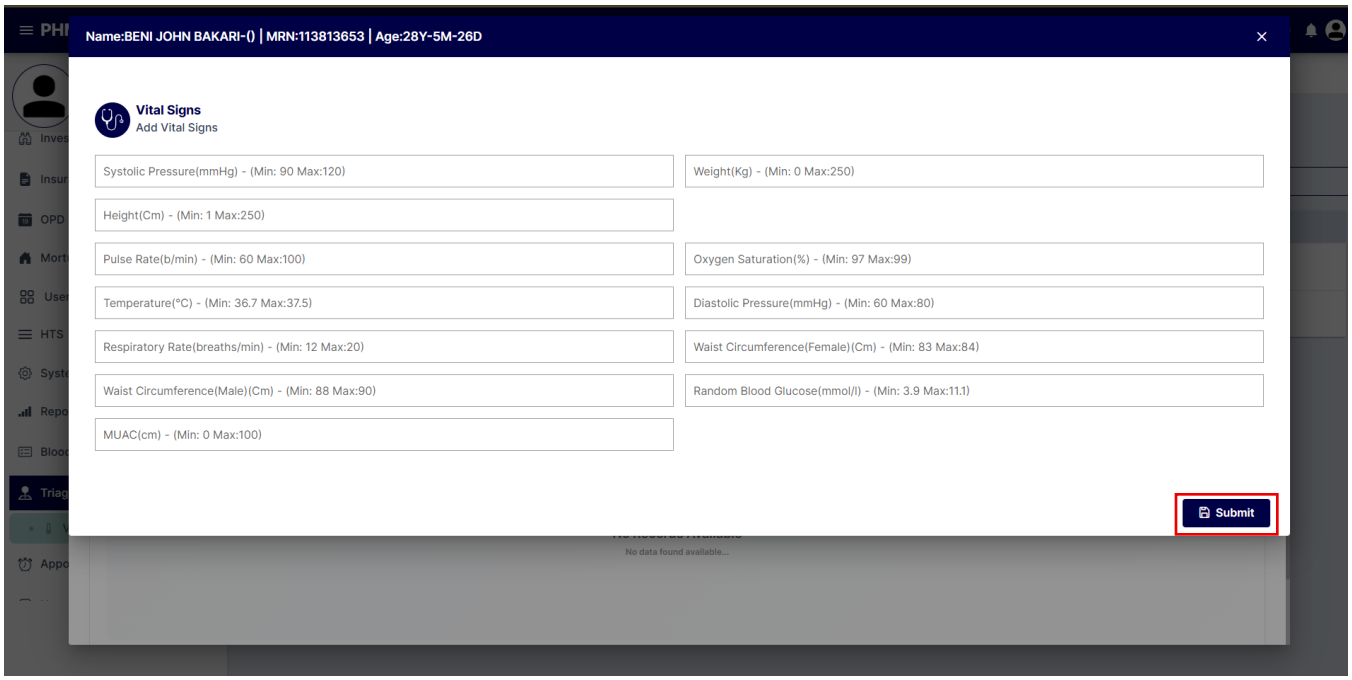


6.1 Vital Signs

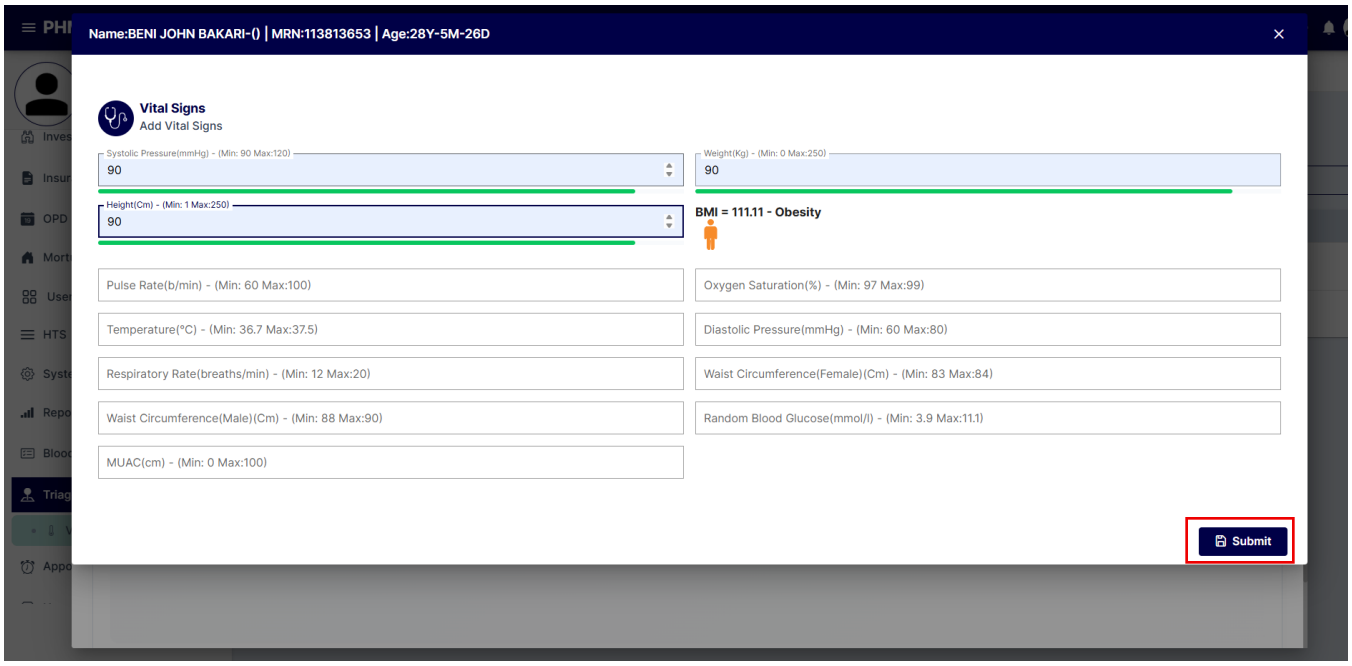
To capture the initial assessment:

- Navigate to Triage then open Vital Signs. A new window will appear requesting you to search the client by entering the Medical Record Number (MRN).
- Enter the MRN and then click the Attend button to add the assessments.





Name:BENI JOHN BAKARI-() | MRN:113813653 | Age:28Y-5M-26D
Vital Signs
Add Vital Signs
Systolic Pressure(mmHg) - (Min: 90 Max:120)
Weight(Kg) - (Min: 0 Max:250)
Height(Cm) - (Min: 1 Max:250)
Pulse Rate(b/min) - (Min: 60 Max:100)
Oxygen Saturation(%) - (Min: 97 Max:99)
Temperature(°C) - (Min: 36.7 Max:37.5)
Diastolic Pressure(mmHg) - (Min: 60 Max:80)
Respiratory Rate(breaths/min) - (Min: 12 Max:20)
Waist Circumference(Female)(Cm) - (Min: 83 Max:84)
Waist Circumference(Male)(Cm) - (Min: 88 Max:90)
Random Blood Glucose(mmol/l) - (Min: 3.9 Max:11.1)
MUAC(cm) - (Min: 0 Max:100)
Submit



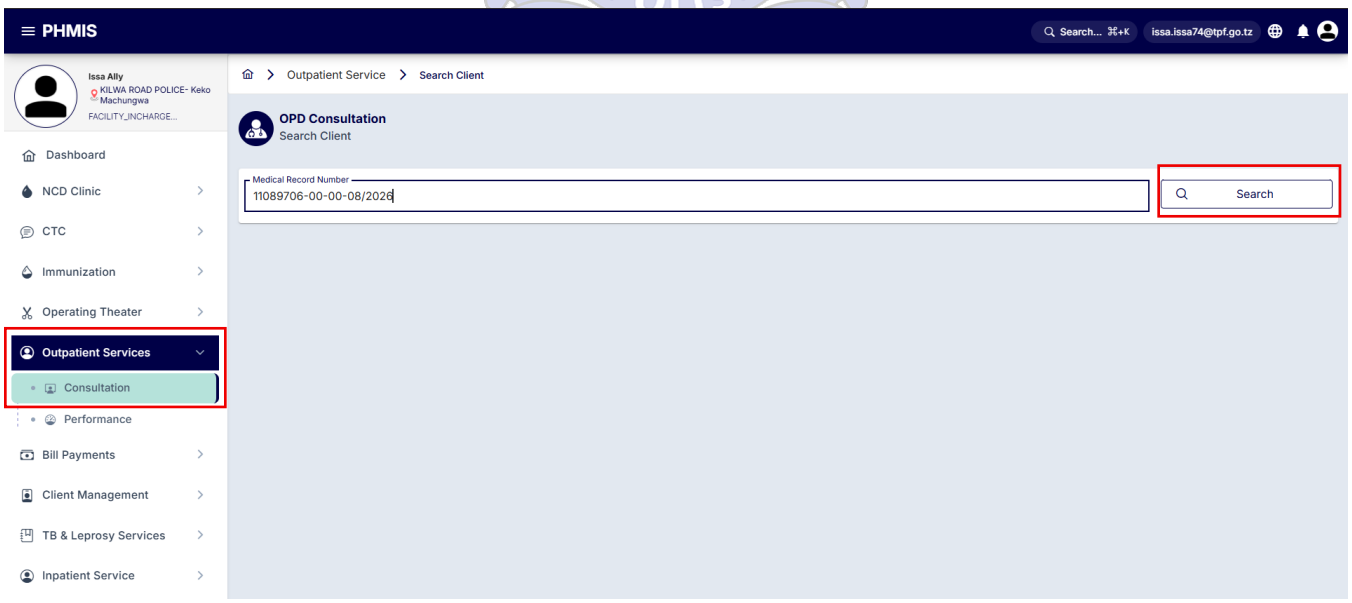
7.0 Outpatient Services

This module is used for attending outpatients and viewing the performance of health workers.

7.1 Consultation

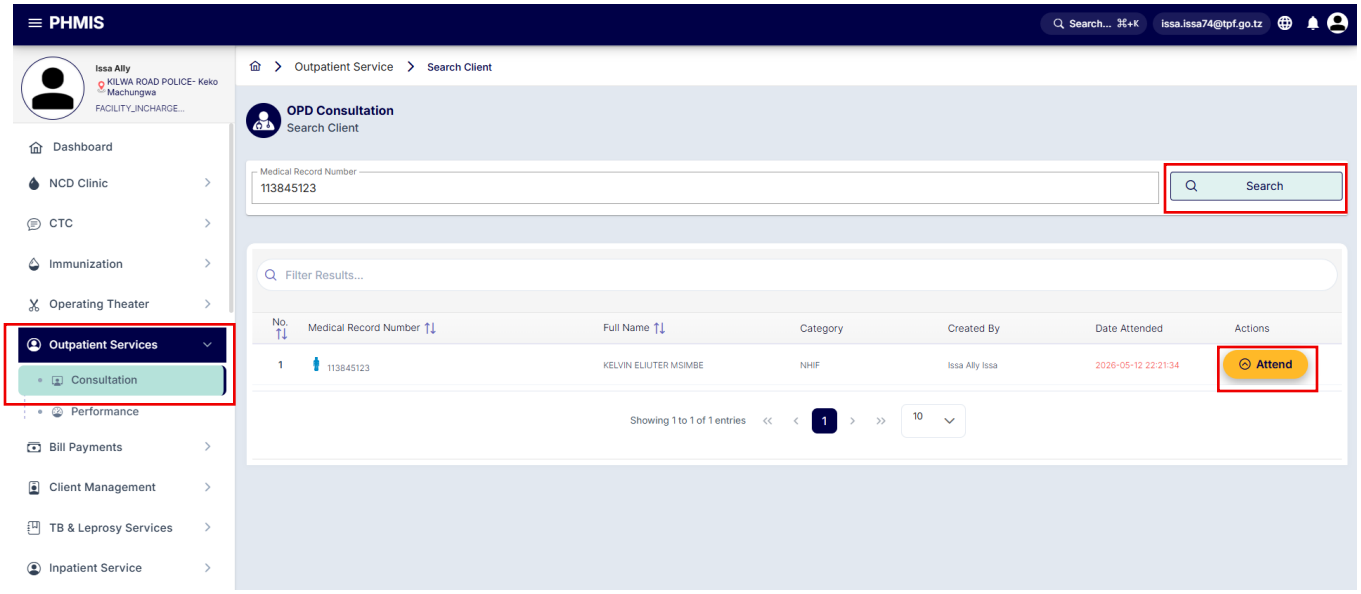
To attend a client:

- Enter the patient Medical Record Number (MRN) and click the Search button. The client will appear.



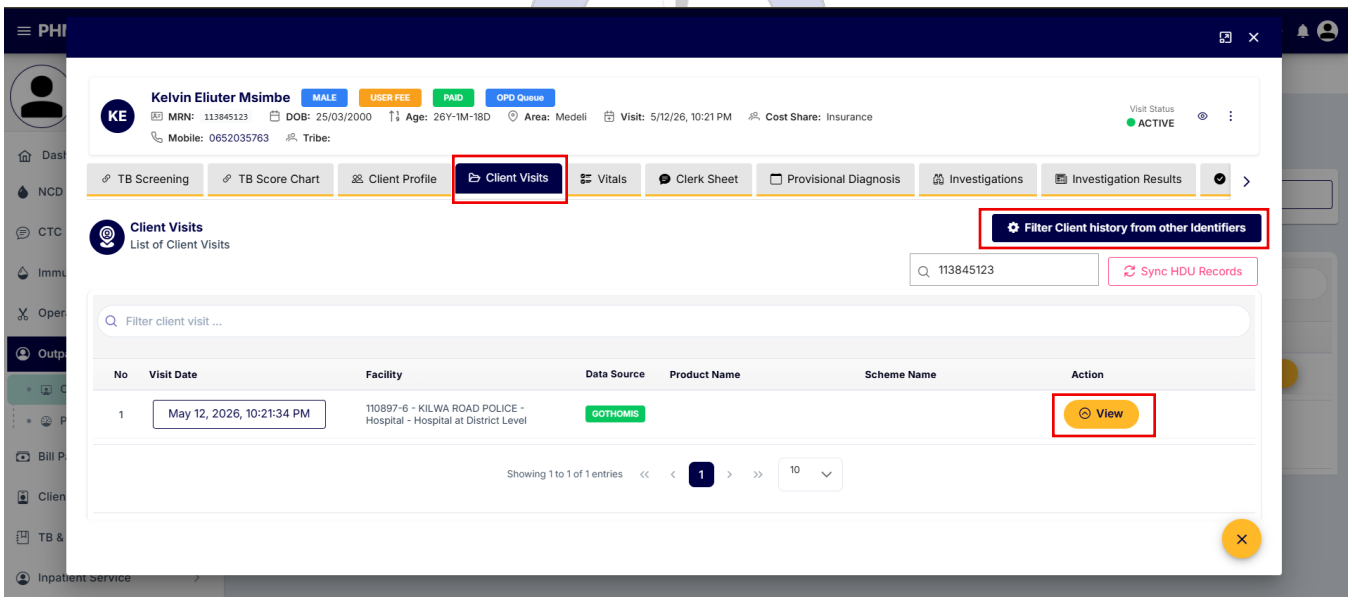
If the client has not settled the bill, the bill status will show as Pending. Advise the client with a pending bill to pay before proceeding.

If the client has settled the bills, the Attend button will appear. Click Attend to proceed and the consultation window will be displayed.



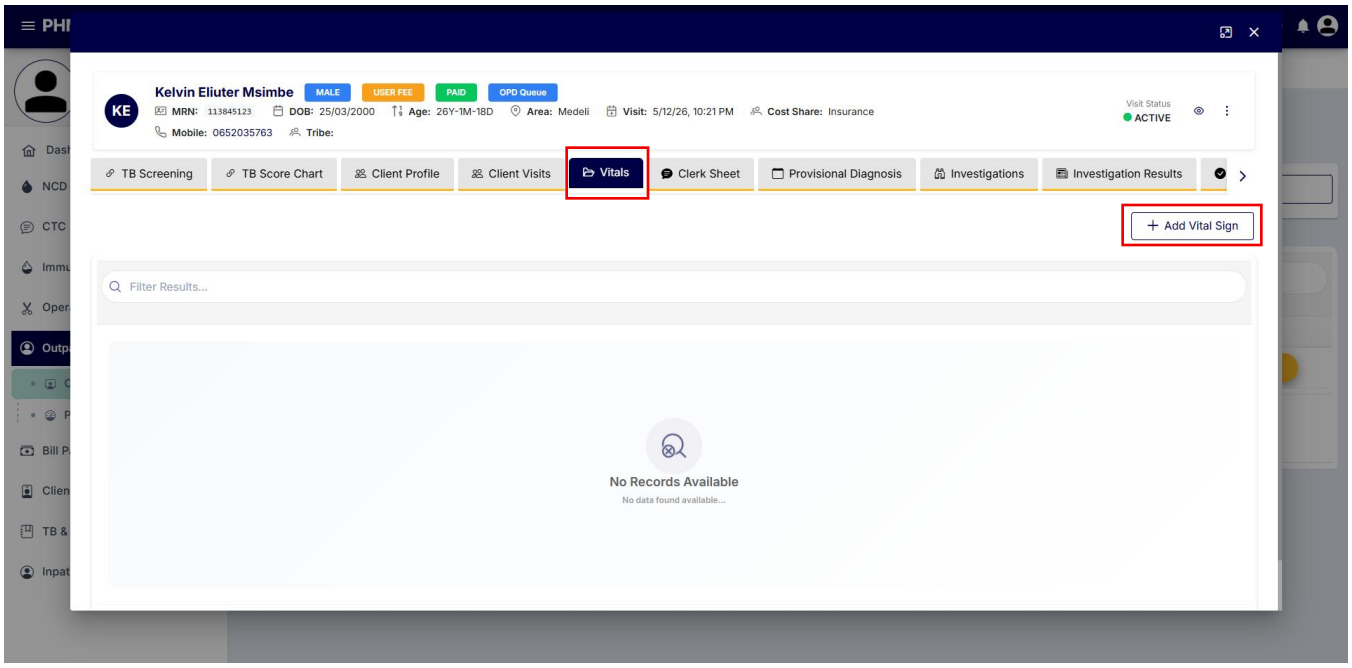
7.2 Client Visits

To view the previous patient treatment or attendance history, click Client Visits. The history will be displayed.



7.3 Vitals

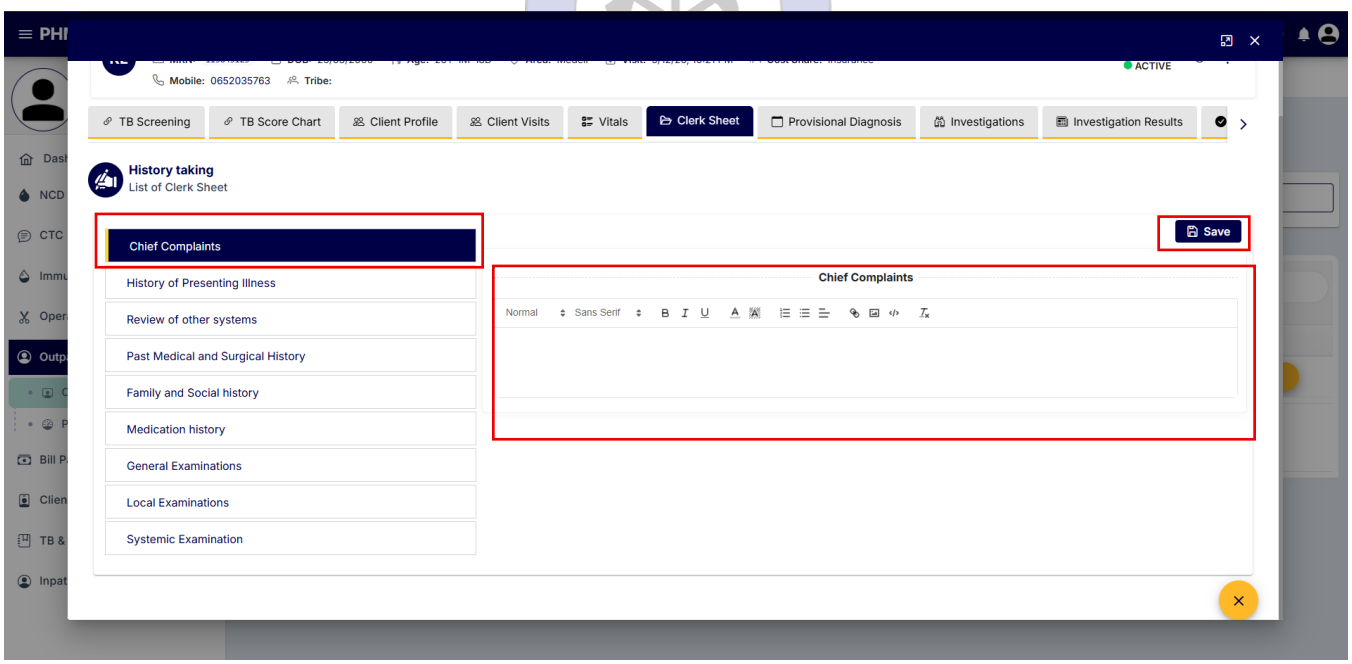
To capture vitals for the patient, click Vitals and then click the Add Vital Sign button.



7.4 Clerk Sheet

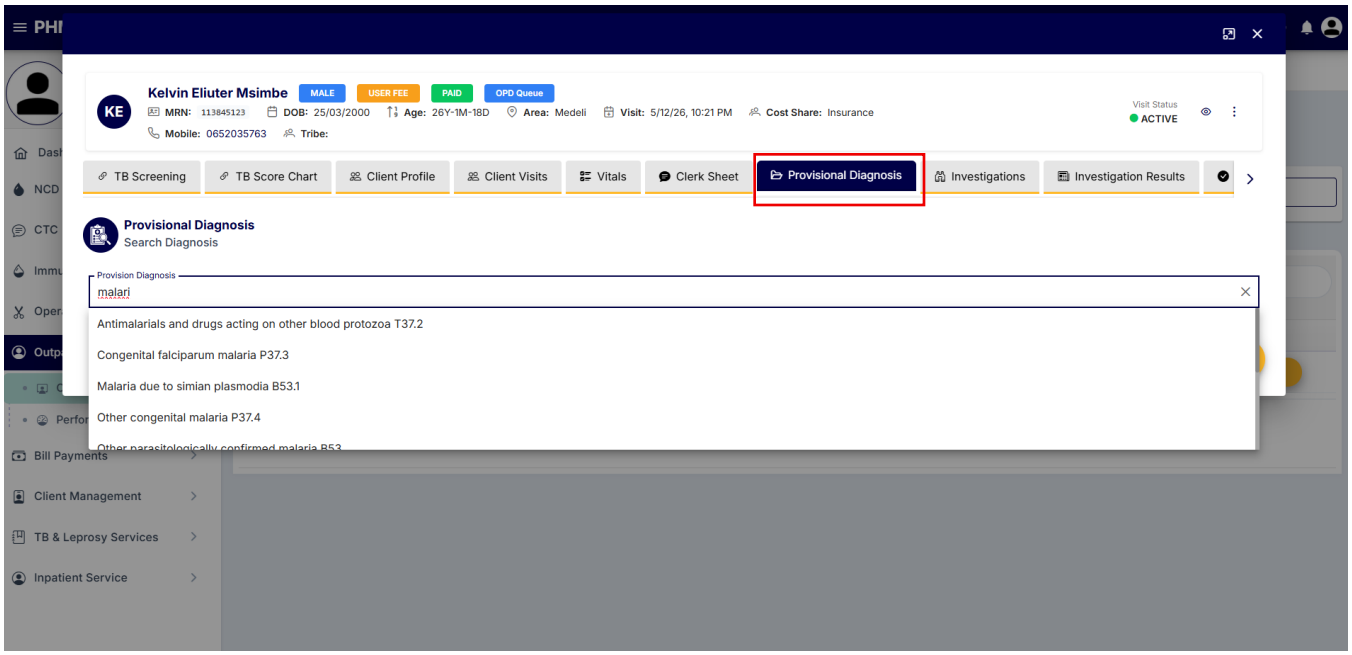
To start attending to a patient:

- Click Clerk Sheet and select the clerk sheet form to enter patient information.
- A pop-up box will appear. Enter complaints and click Save.

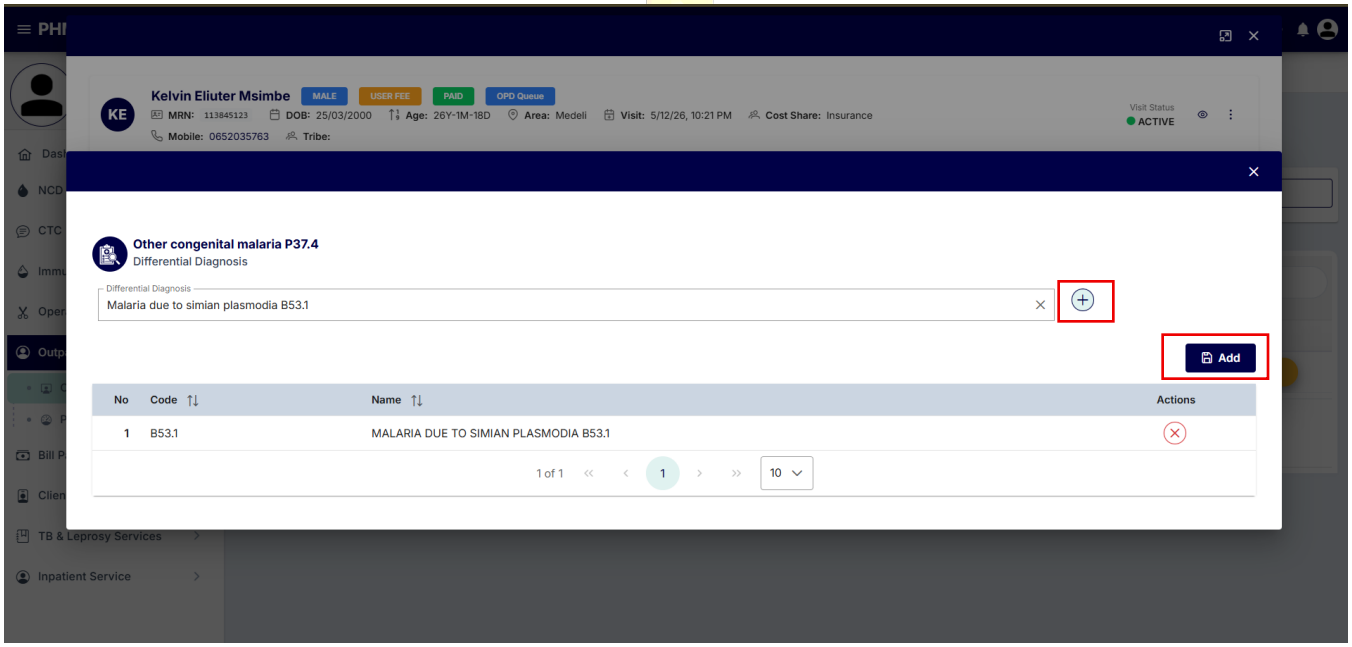


7.5 Provisional Diagnosis

Click Diagnosis and search for the patient diagnosis using an ICD-10 code or by typing a keyword.



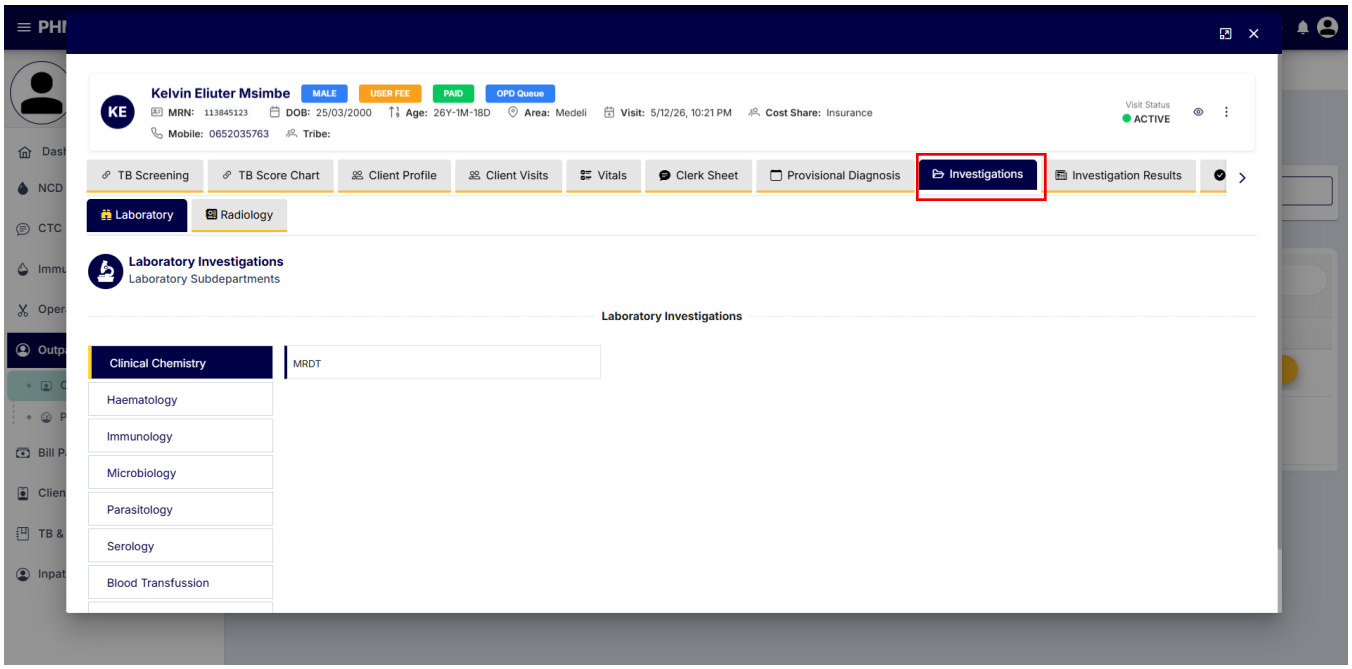
Then add differential diagnosis



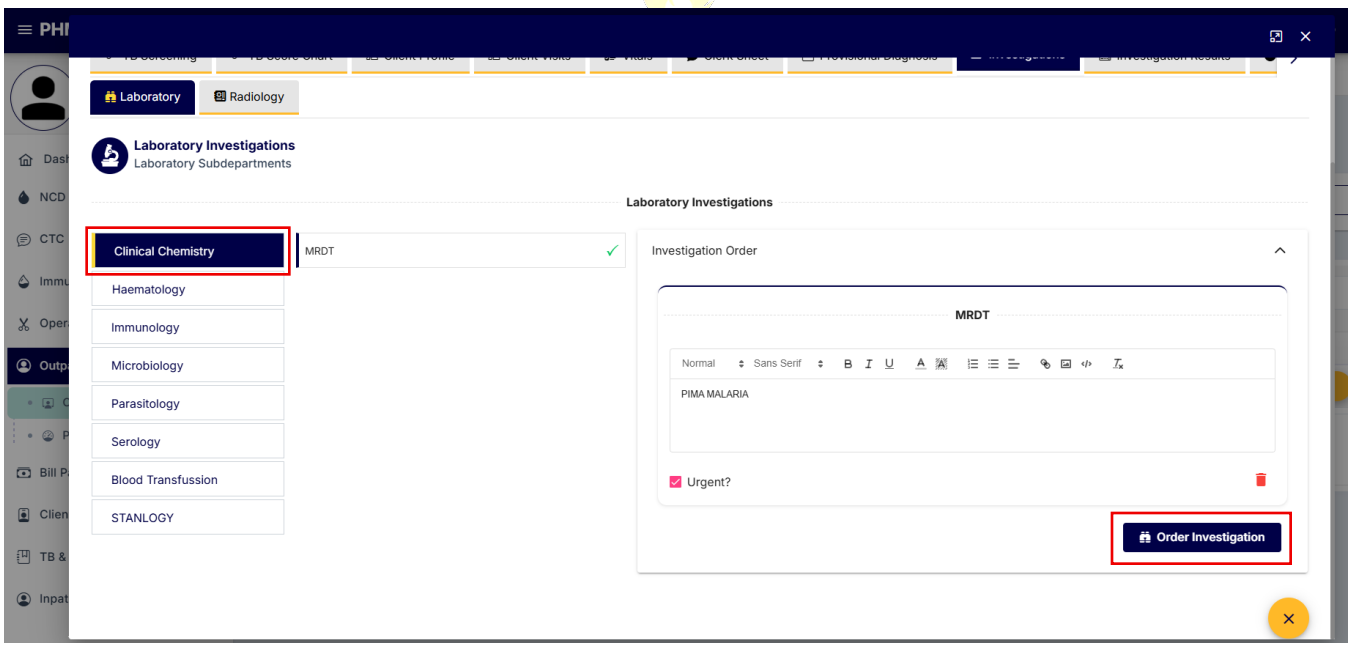
7.6 Investigation

To order laboratory investigations for the patient:

- Click Investigations, then select Laboratory. From the list, select the laboratory sub-department and choose the investigation items.
- If there is any comment, add it in the text box provided.

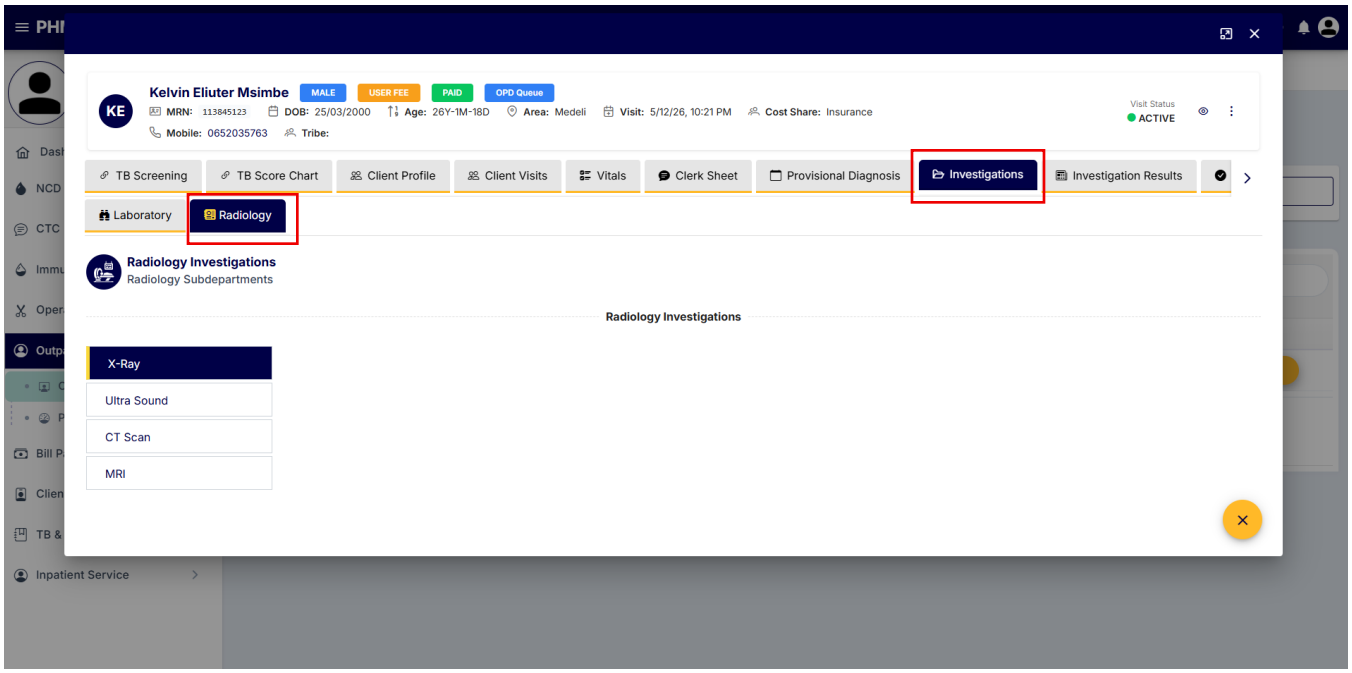


Then click Order Investigation and check Urgent box if needed



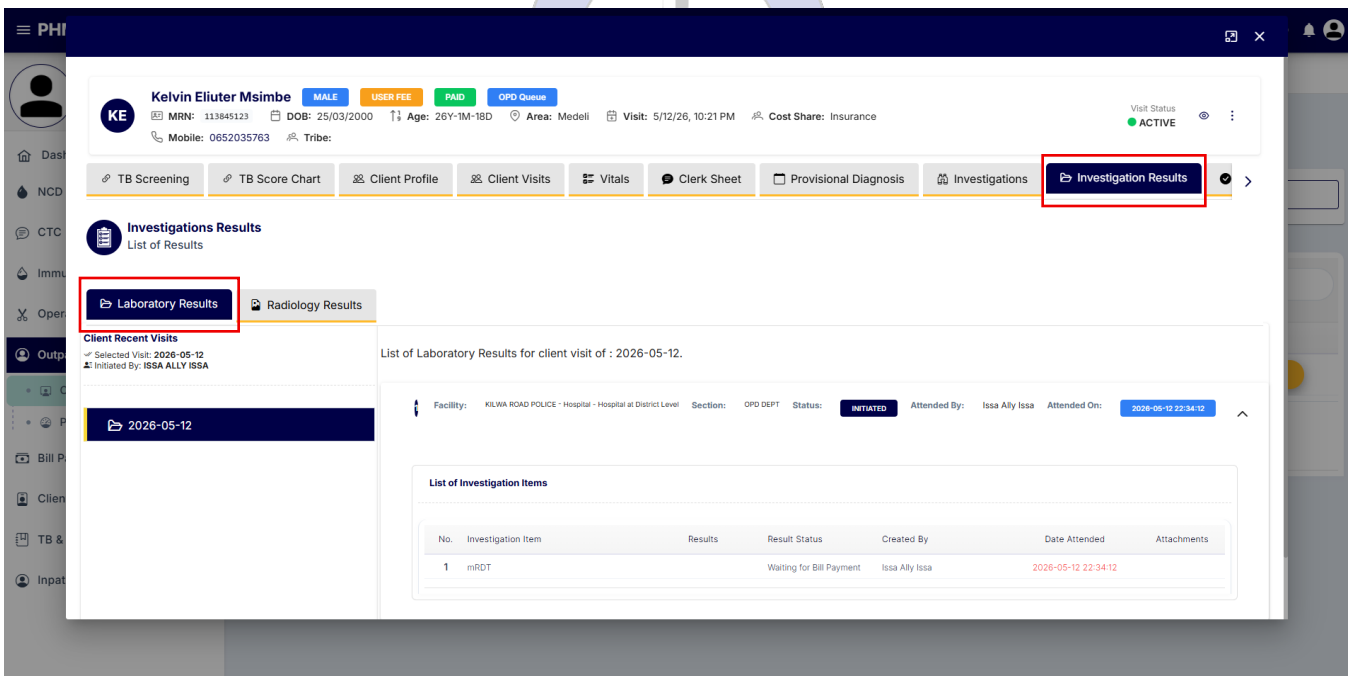
For radiology investigations:

- Click Investigation then select Radiology. From the list, select the Radiology sub-department. The investigation order will be sent to the Radiology Lab.



7.7 Investigation Results

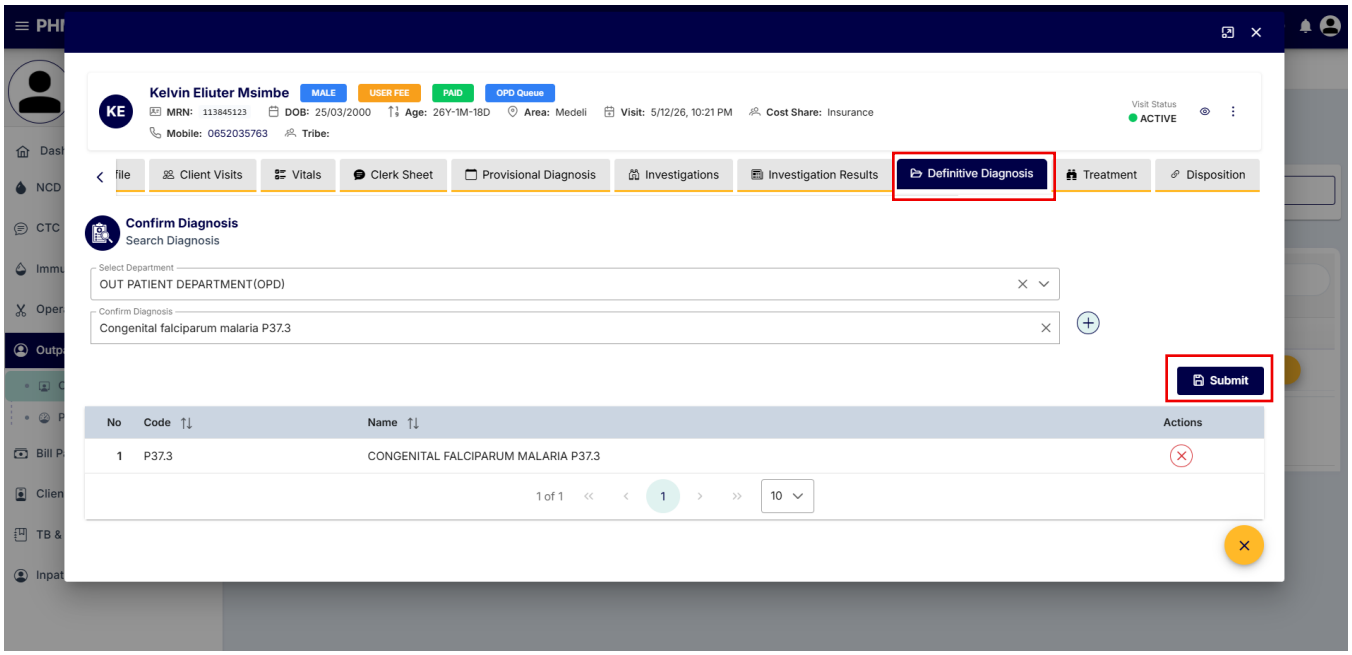
To view investigation results from the laboratory, click Investigation Results and then click Laboratory Results or Radiology Results to view approved results for the patient.



7.8 Confirm Diagnosis

After results have been received from the laboratory:

- Click Confirm Diagnosis and select the department.
- Search the patient's diagnosis using the ICD-10 code, then click Submit.

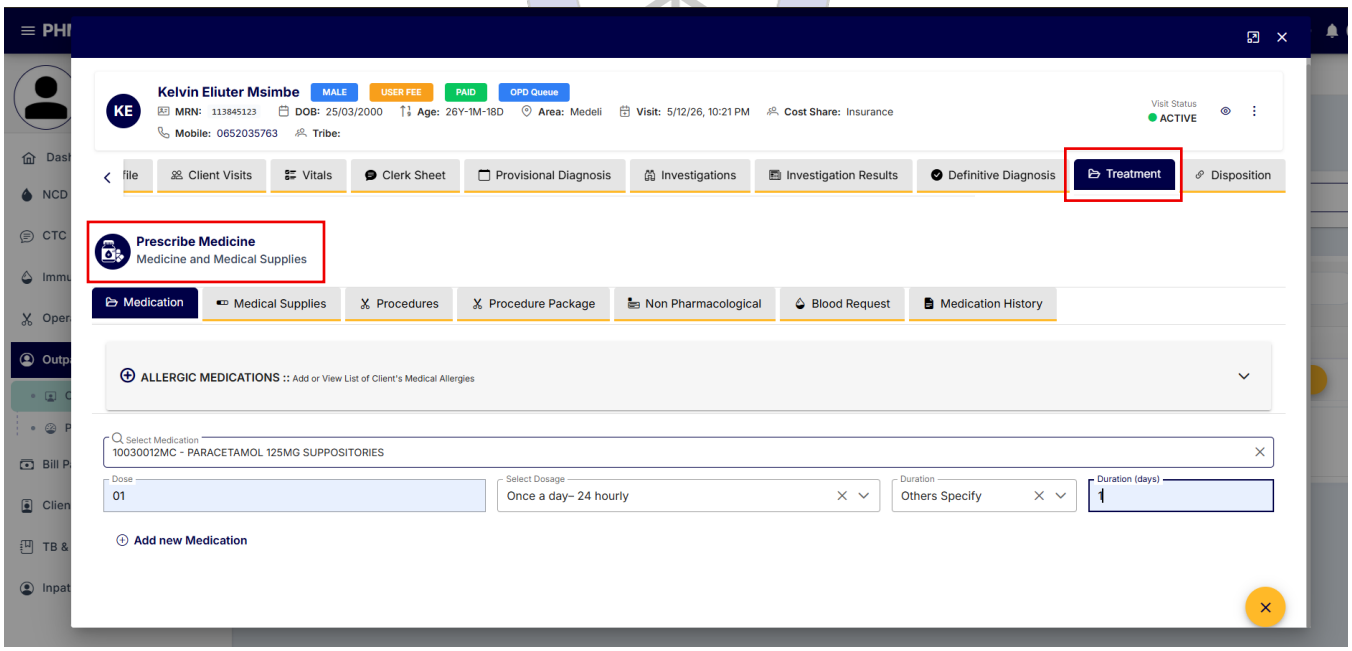


7.9 Treatment

To provide treatment to the client:

- Click Treatment and select Medication, then search for the appropriate medication.
- Write the dosage and duration, then click Prescribe to save the medications.

For prescription of consumables, click Medical Supplies and select the procedure to prescribe.

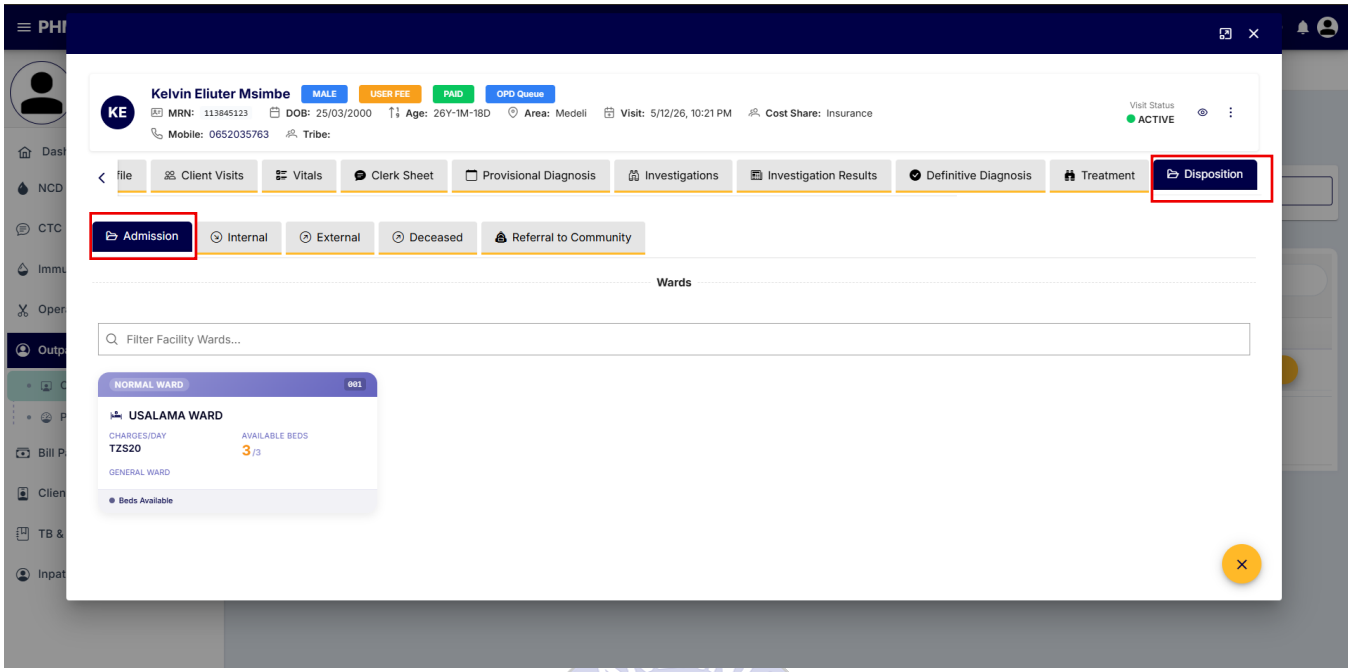


7.10 Disposition

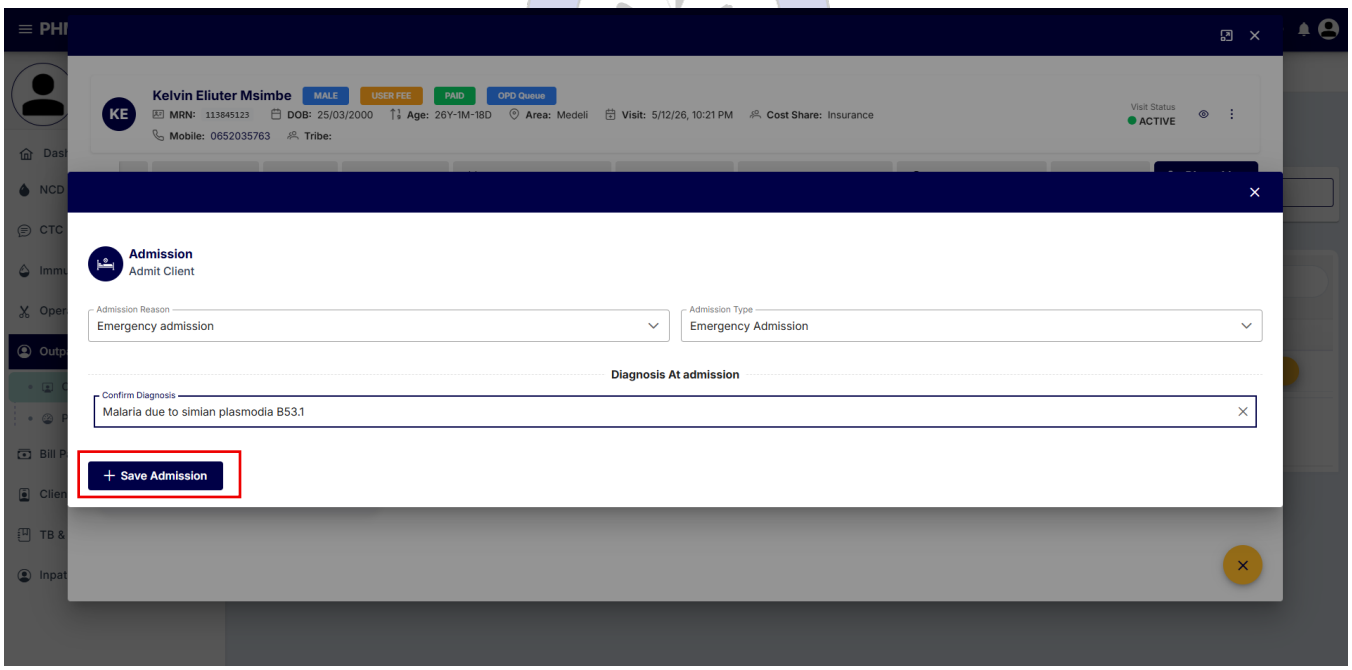
The Disposition module is used to determine the next step for the patient after consultation.

Admission to Ward:

Click Disposition and select Admission. The system will provide a list of wards in your facility. Choose the appropriate ward for the patient.

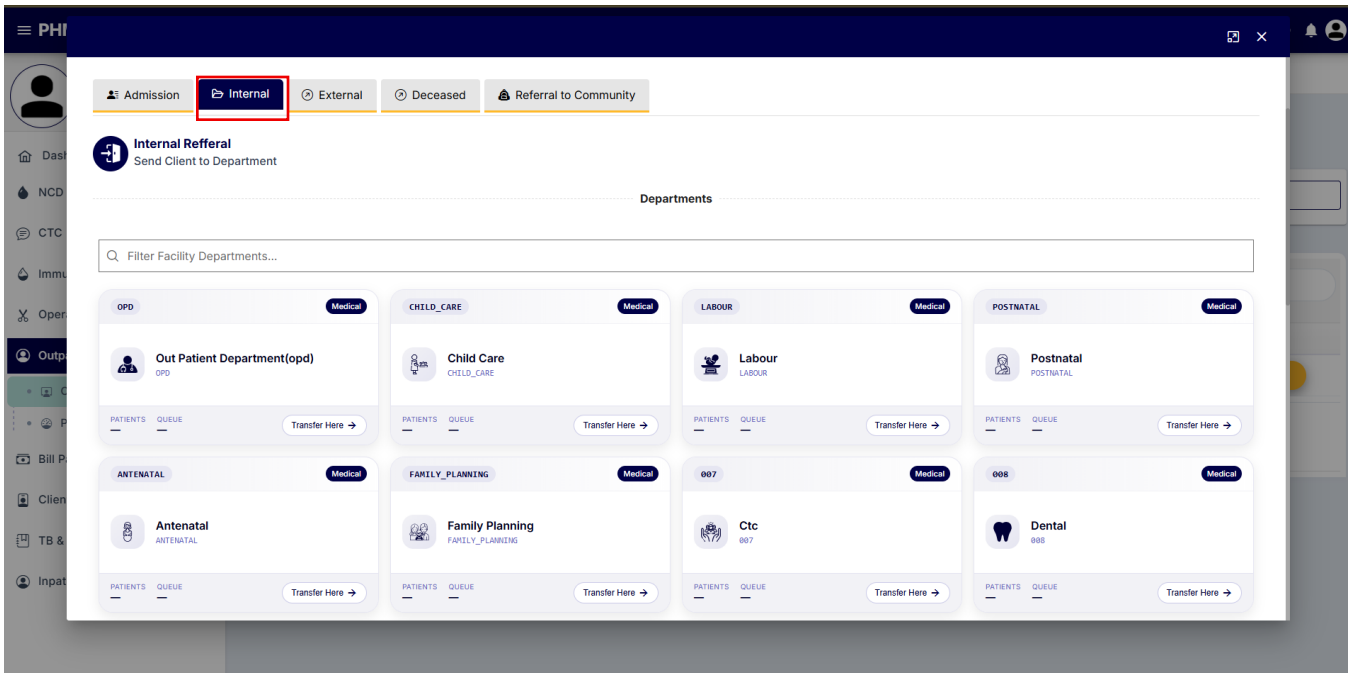


Then fill in all admission requirements and click save admission;



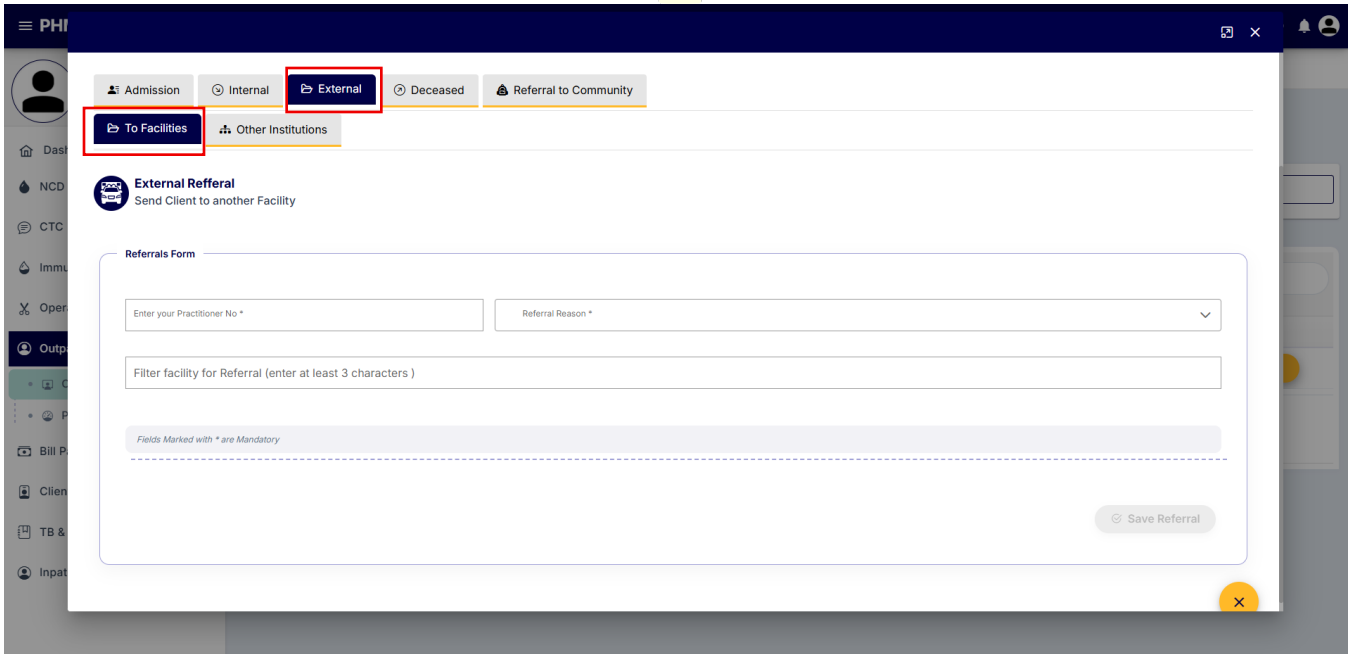
Internal Referral:

Click Disposition and select Internal. The departments within your facility will be displayed. Choose the department to refer the client to.



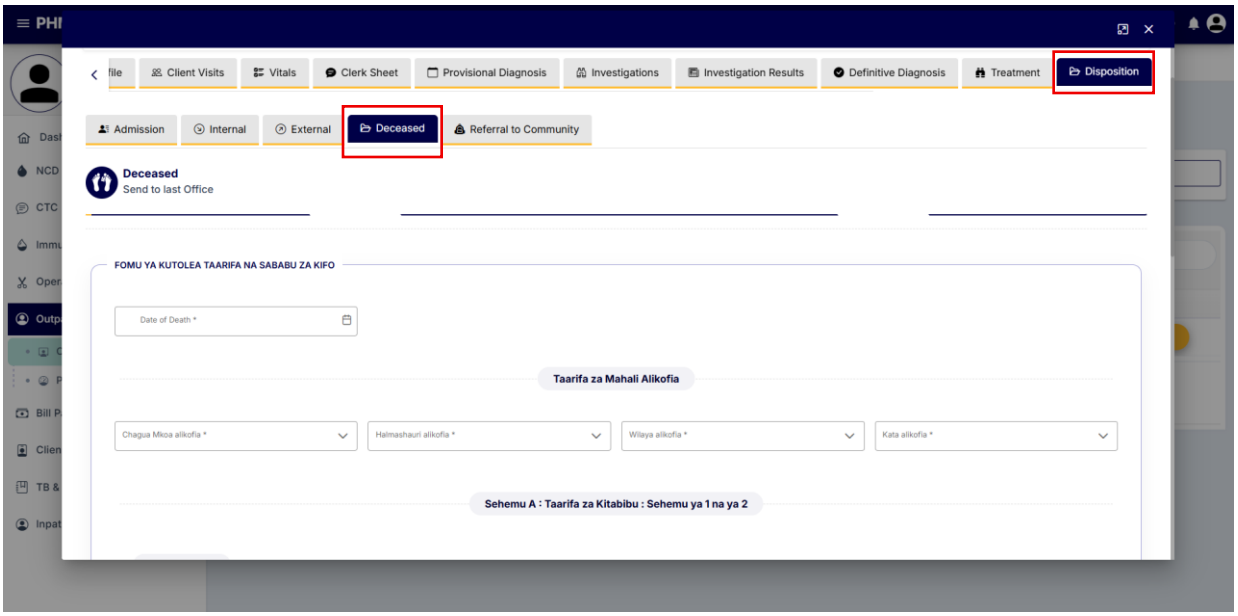
External Referral:

Click Disposition and select External to refer the patient to an external facility.

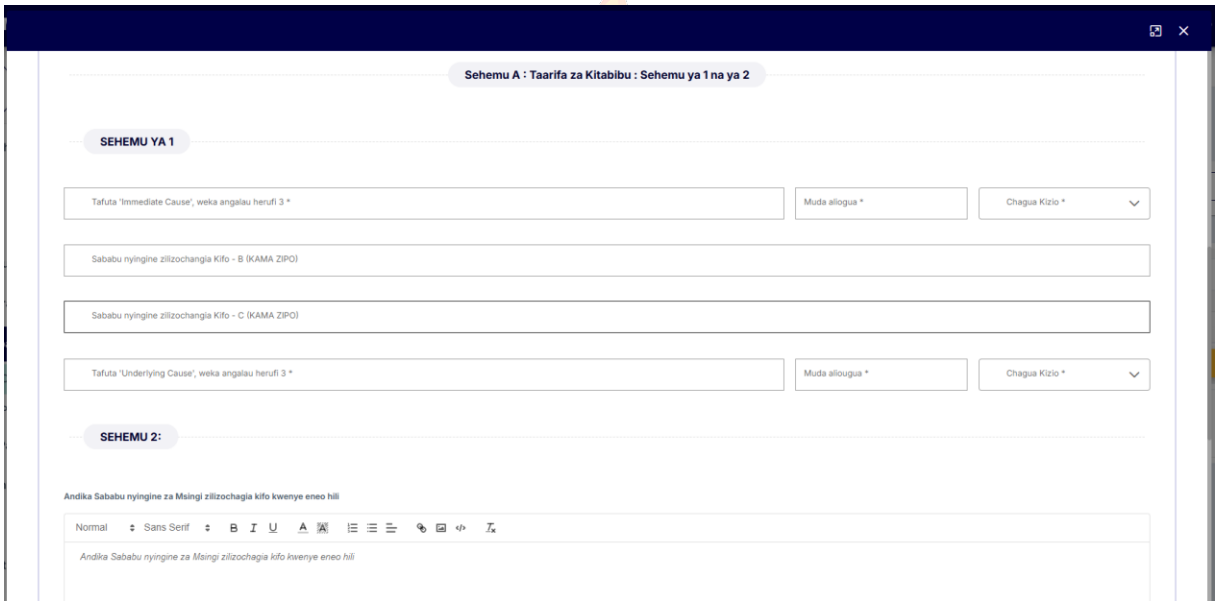


Deceased:

For a deceased client, click Disposition and select Deceased to certify the death. A window will appear to fill in the required information.

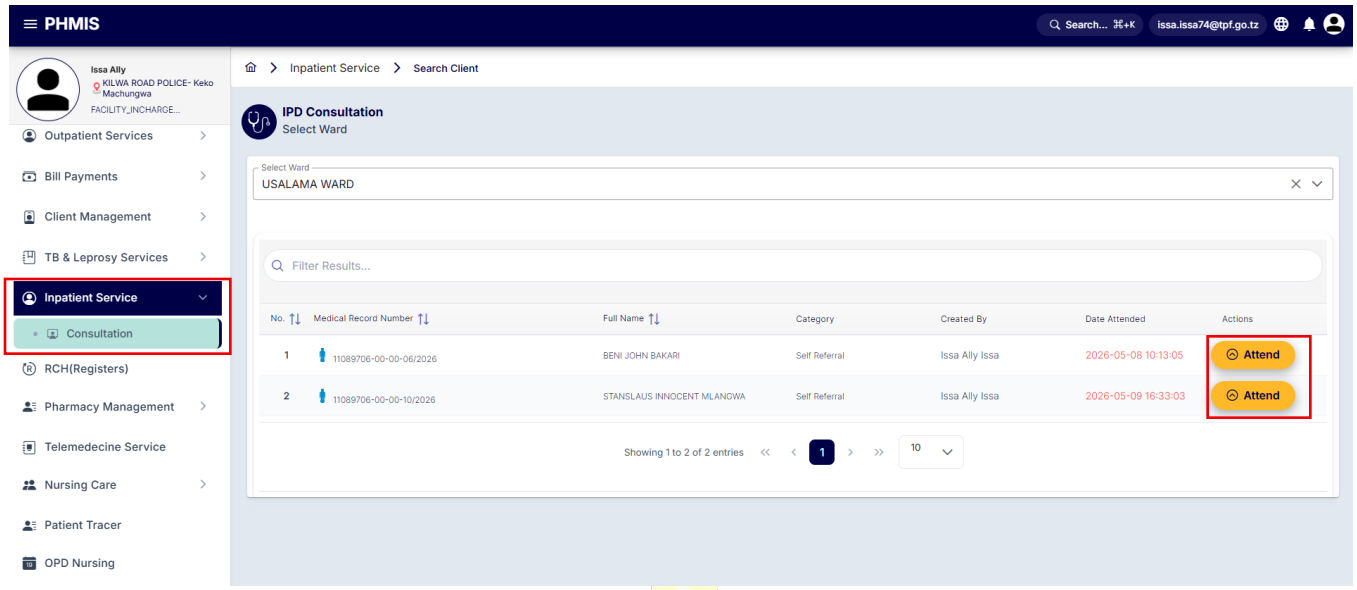


Add more details accordingly and click save



8.0 Inpatient Services

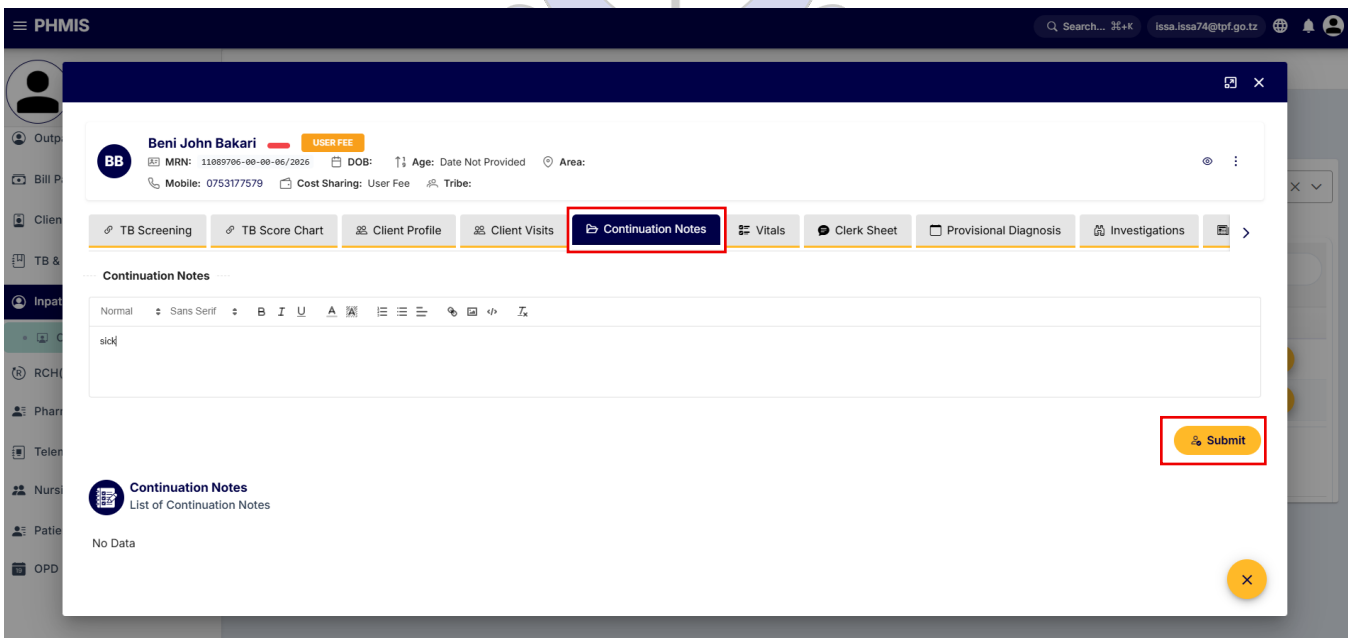
This module is designed to attend to inpatient clients in the facility. To attend an inpatient client, open the Inpatient Service module, then select the ward to attend admitted patients.



8.1 Continuation Notes

When going on ward rounds and a doctor wants to take notes for a patient, click Continuation Notes. A pop-up will appear for the user to enter notes. Click Submit when done.

> **NOTE:** *Sub-modules like Vitals and Clerk Sheet are the same as those described in the Outpatient modules. Refer to the previous section for their descriptions.*



8.2 Nursing Care

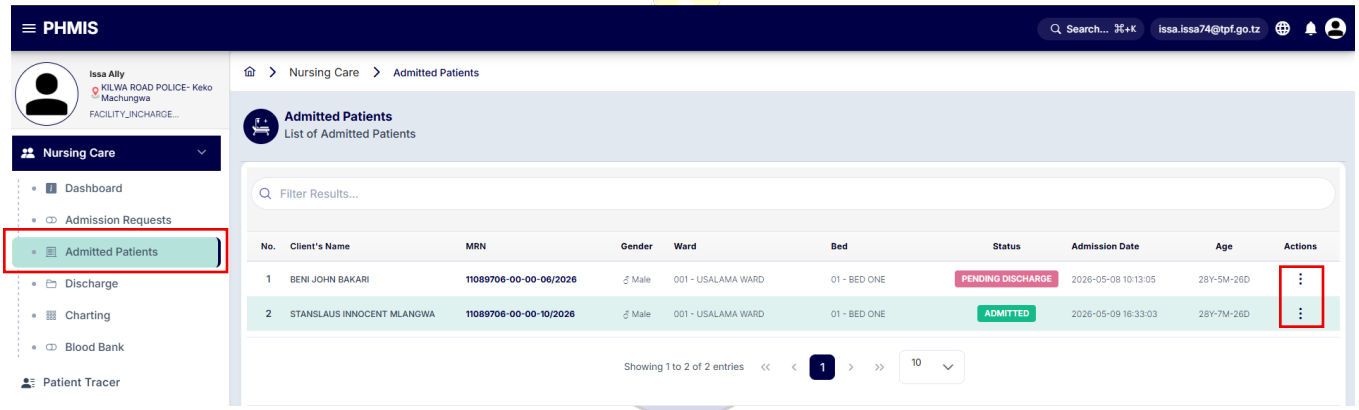
This module enables the user with access to Nursing Care to manage all inpatient clients.

- To attend admission requests, open Nursing Care, then click Admission Requests. A list of all patients with pending admission requests will be displayed.
- Click the three dots under the Action column. Options will appear.
- To admit a patient to a specific ward, click Admit Patient.
- To move a patient to another ward, click Transfer to Another Ward.

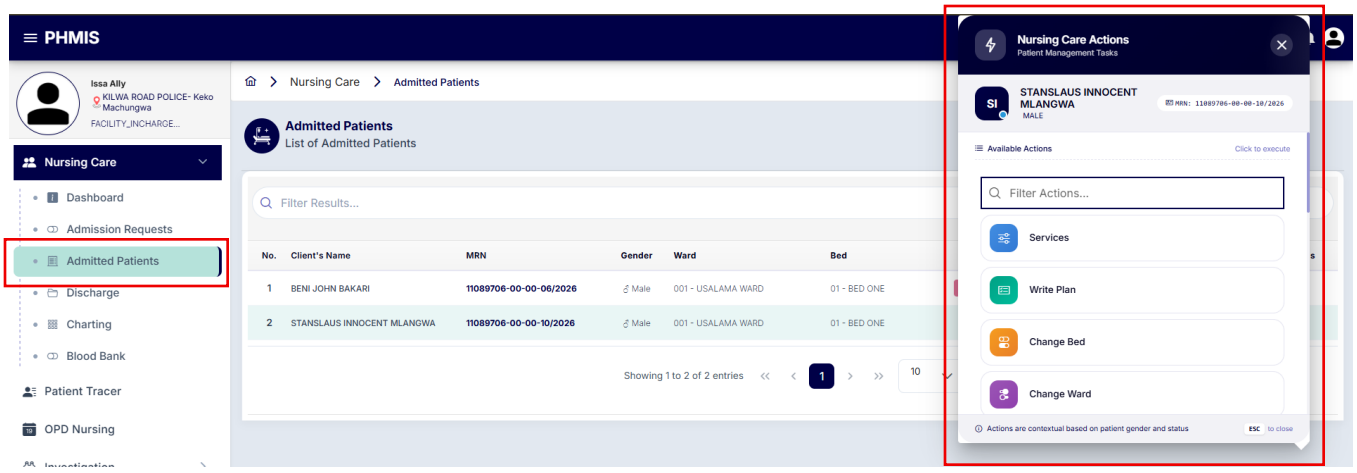
8.3 Manage Admitted Patients

To view or attend an admitted patient:

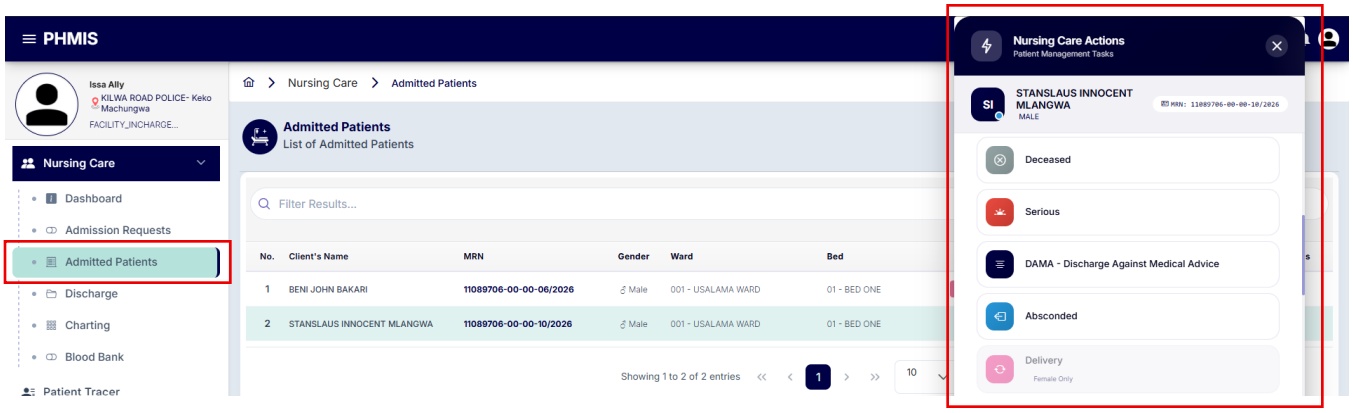
- Click Admitted Patients, then click the three dots on the right side. A list of available actions will display.
- To add a service to the client, open Admitted Patients, then click Service under the Action column to view patient services.
- For any new service, click the Add New button to add patient service (procedures and services).
- To add a nursing care plan, click Write Plan and fill in the required details.
- Click View History to view the patient's history.



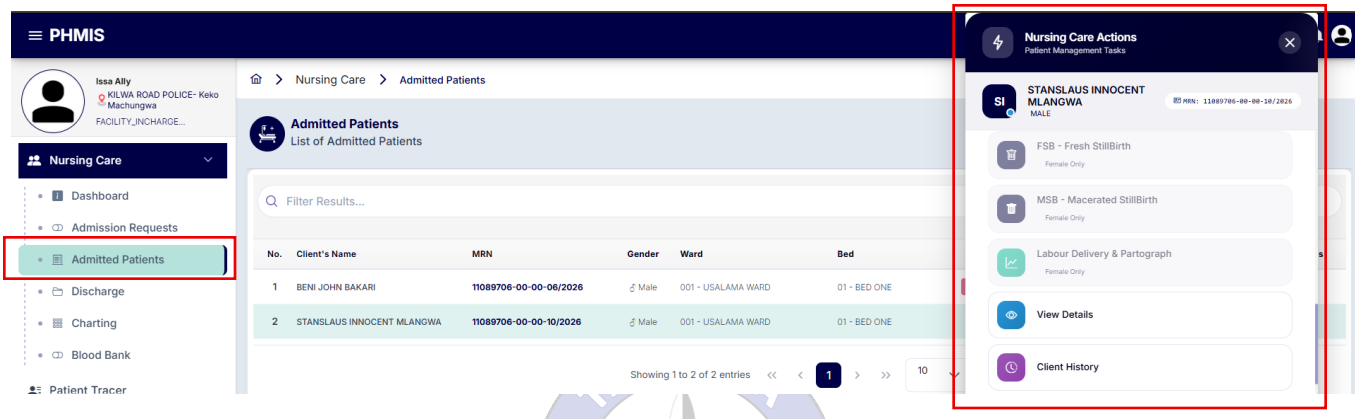
Then manage nurse services;



More actions for managing nurse services;

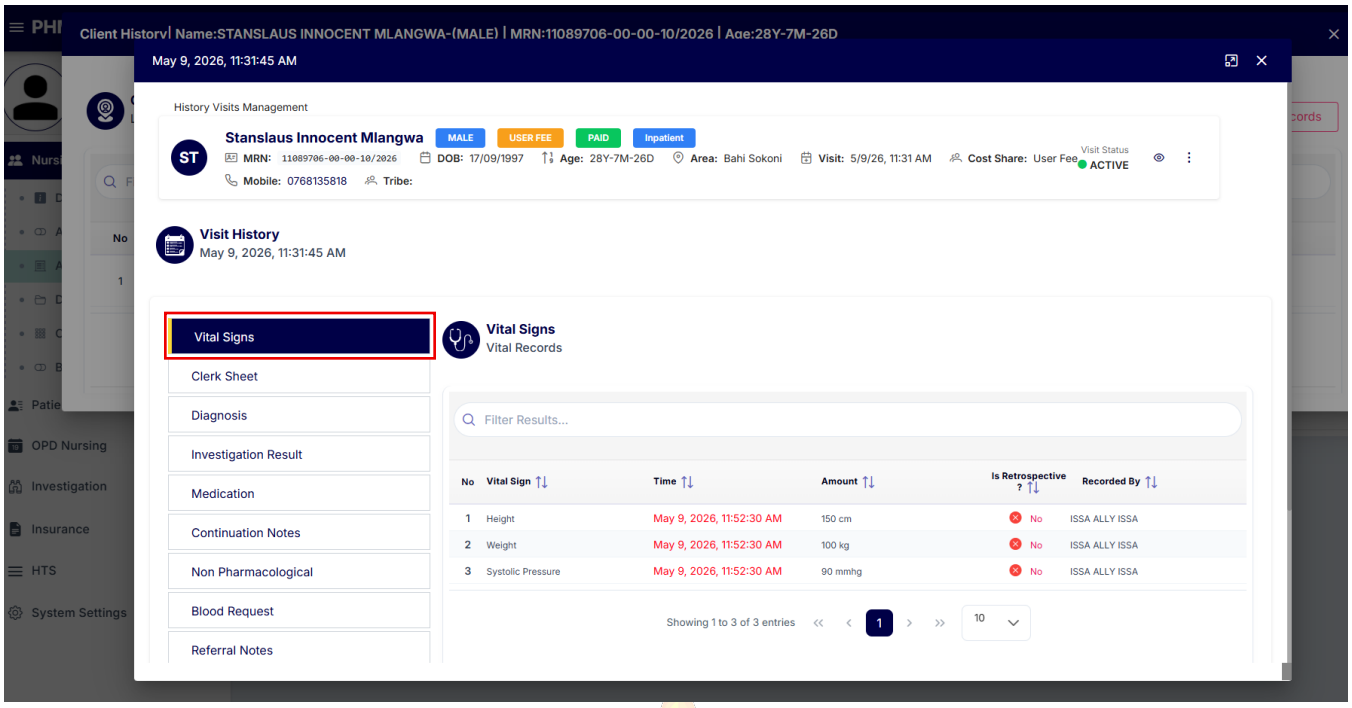


More nursing services;



8.4 Labour and Delivery

- Click Labour and Delivery. A pop-up will display recorded Labour and Delivery services.
- To add new details, click Add New. A pop-up will appear requiring you to fill in information.
- Click Save to store information. Scroll to the next section and repeat the process.

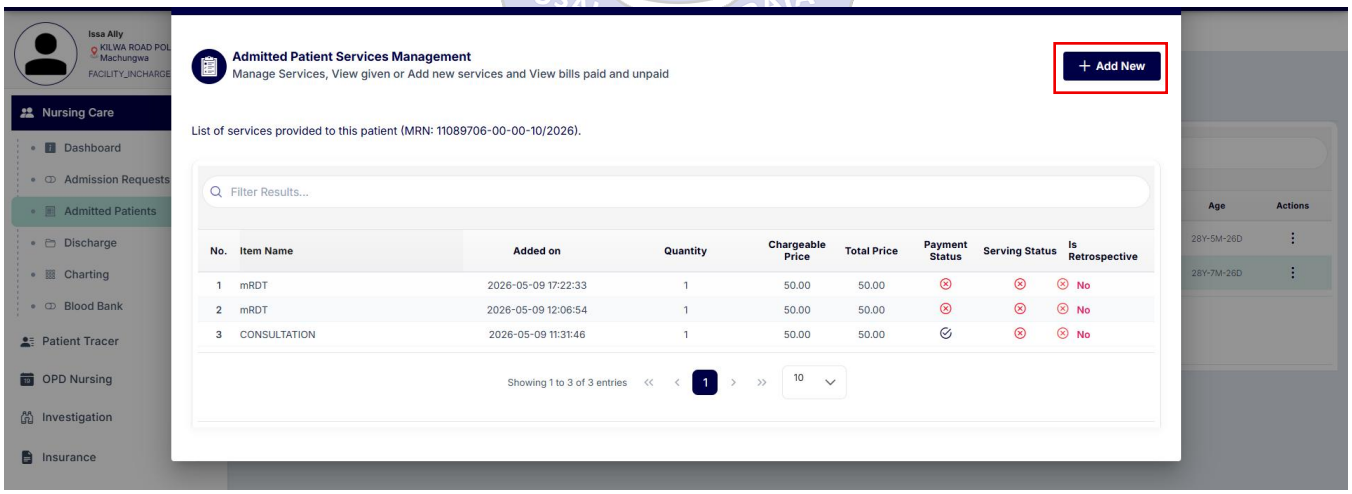


Partograph:

To view the partograph of a patient, click Partograph. A pop-up will appear showing a graph with the Partograph Line Chart.

To add a new measurement from a pregnant mother:

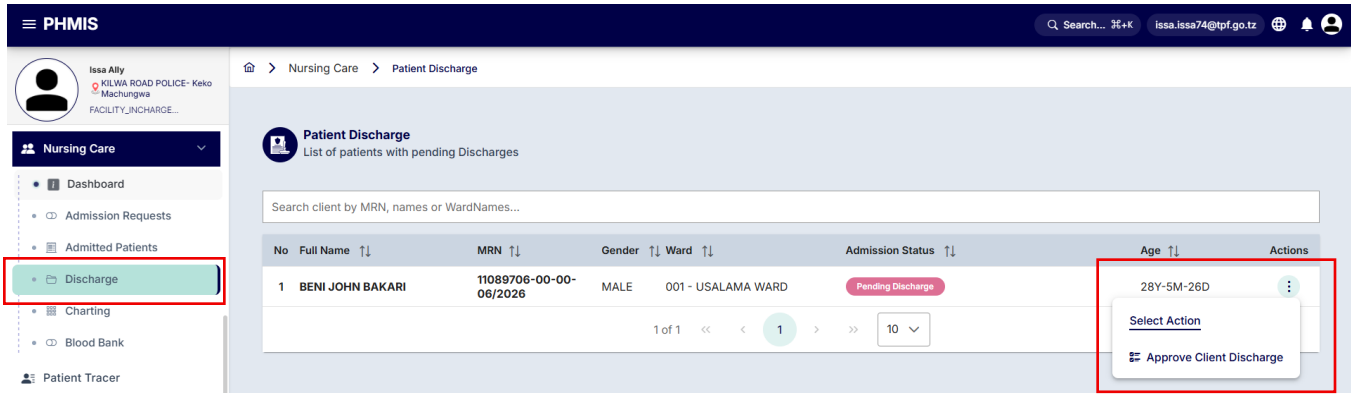
- Click Add New from the partograph view.
- Select the type using the dropdown, select hours, enter the value, and enter the recorded date and time.
- Click + Add Record. Repeat these steps for each additional type of measurement.
- When done, click Save to store the records.



To view Partograph History, click Partograph History. A list of all partograph history will be displayed, including the name of the person who recorded the data.

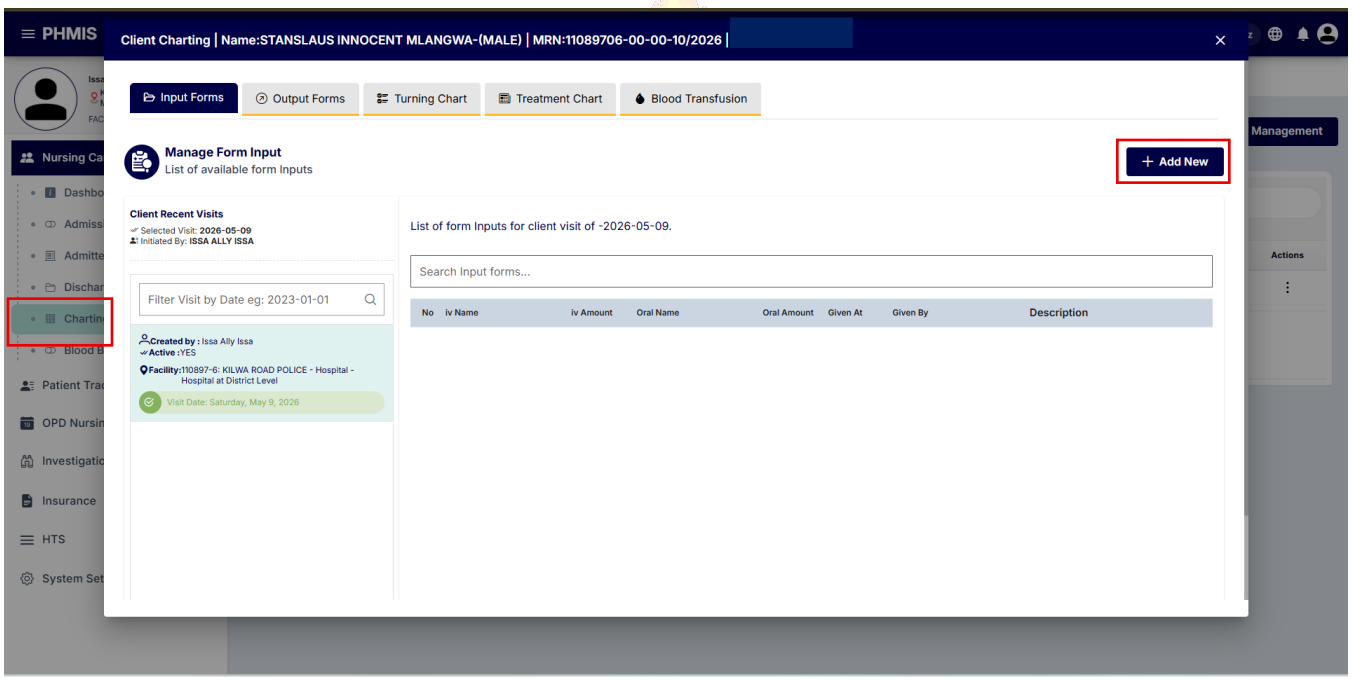
8.5 Discharge Patient

Click Discharge and select Approve Client Discharge to approve a patient's discharge.



8.6 Charting

Click Charts to add patient information into the input, output, turning, and treatment charts.
Click Vital Signs to add patient vital signs and submit.
Click Blood Bank to receive blood. Fill the required fields and then click Save.



9.0 Reproductive Child Health (RCH)

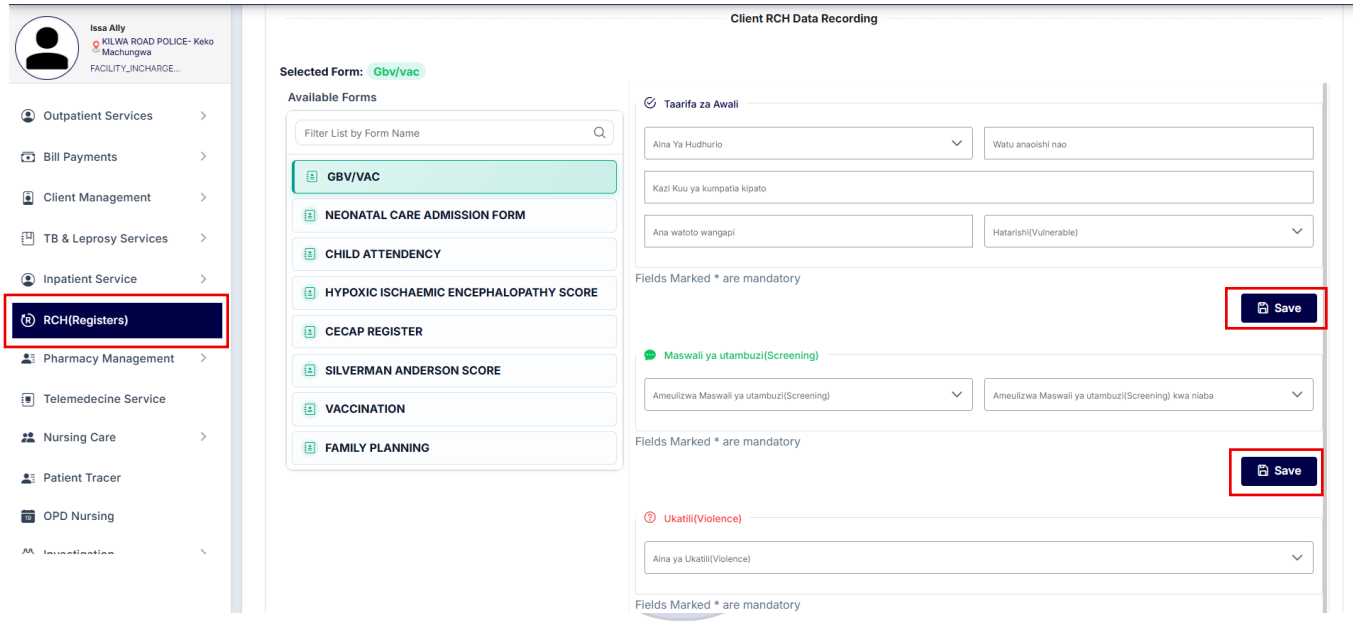
The RCH module provides access to seven sub-modules: Gender Based Violence/Violence Against Children (GBV/VAC), Children Attendance, Postnatal Form, Antenatal Form, Labour and Delivery, Vaccination, and Family Planning.

In each sub-module, the user must save the details entered for them to reflect on the specific report.

To operate this module:

- Enter the patient MRN. The client will be displayed. Select the client to attend.

After selecting a patient to attend, a number of forms will appear based on the gender of the client. For male patients, forms such as Antenatal, Labour and Delivery, Postnatal, and Vaccination will not appear.



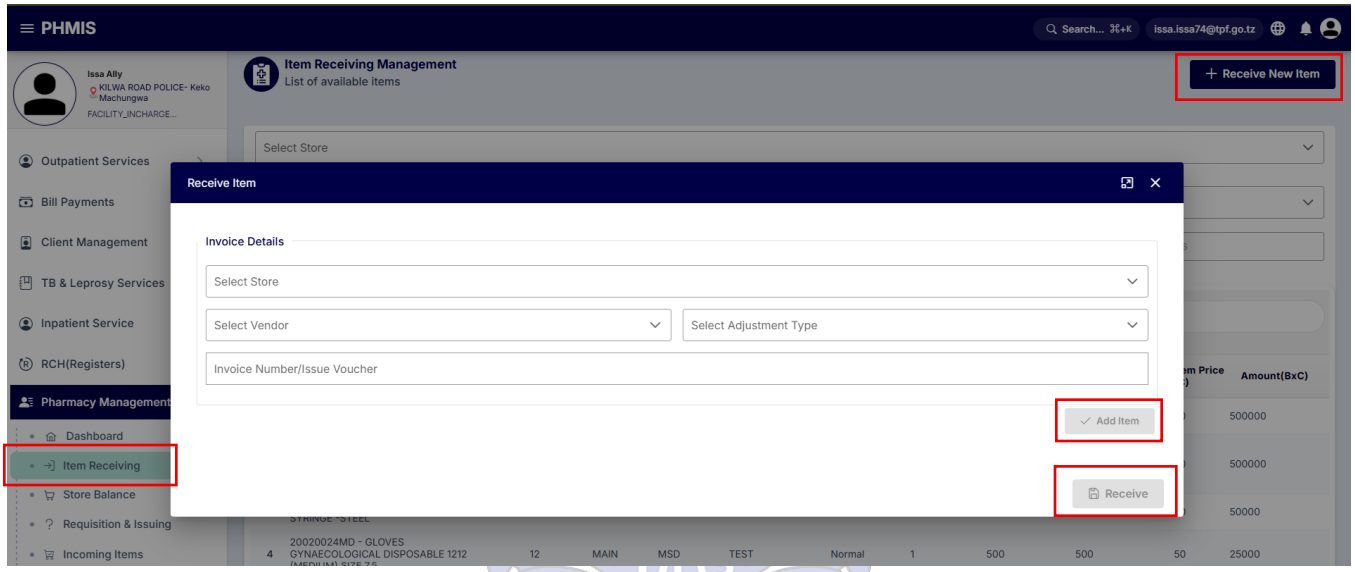
- Fill in the client information by selecting the specific form based on the patient's current visit.
- Each sub-section has a Save button. Click Save in every sub-section once filled.

10.0 Pharmacy Management

10.1 Item Receiving

To receive pharmacy items:

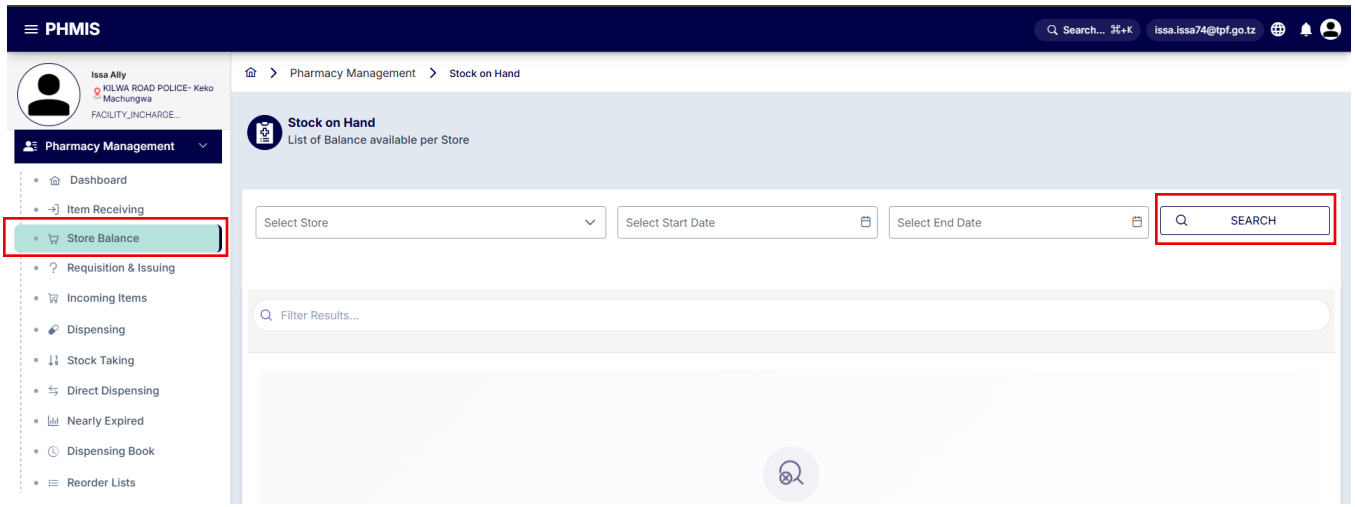
- Navigate to Pharmacy Management then click Item Receiving. A pop-up box will appear requiring some details.
- Enter the item name in the search option, then select the required item and click Add Item. Repeat for multiple items.
- Click Receive to save when done.



10.2 Store Balance

To check the item balance in your store:

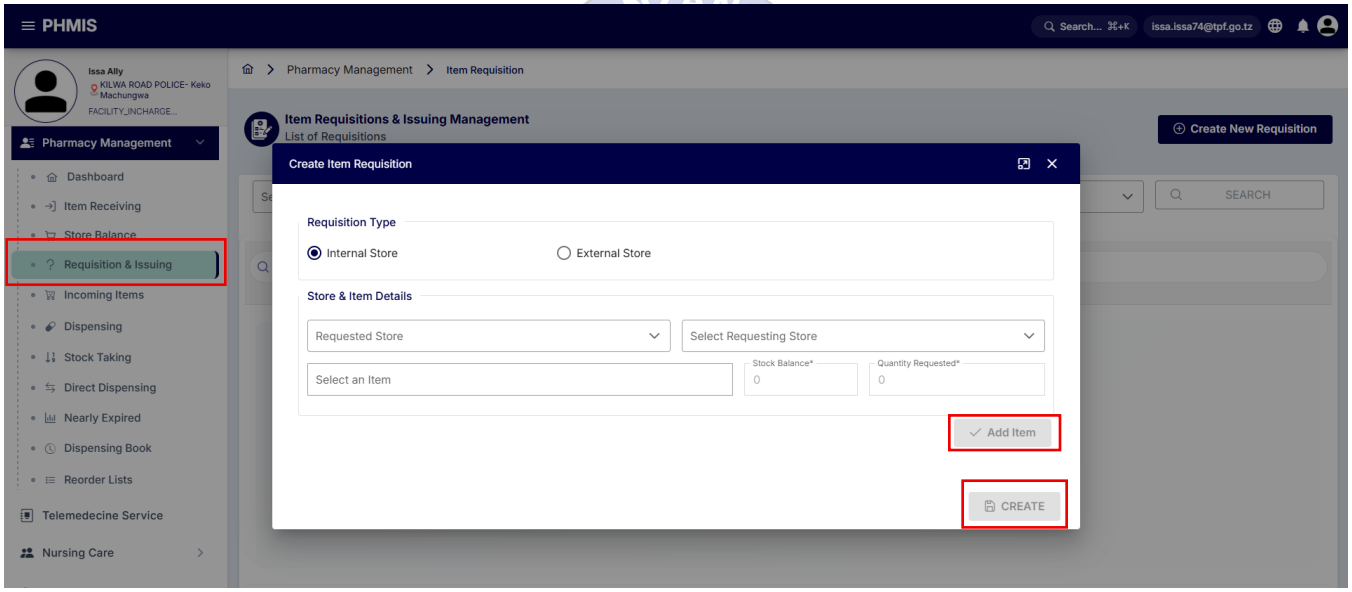
- Navigate to Store Balance, then select the store and add Start and End dates.
- Click Search to get results.



10.3 Requisition & Issuing

Requesting Items:

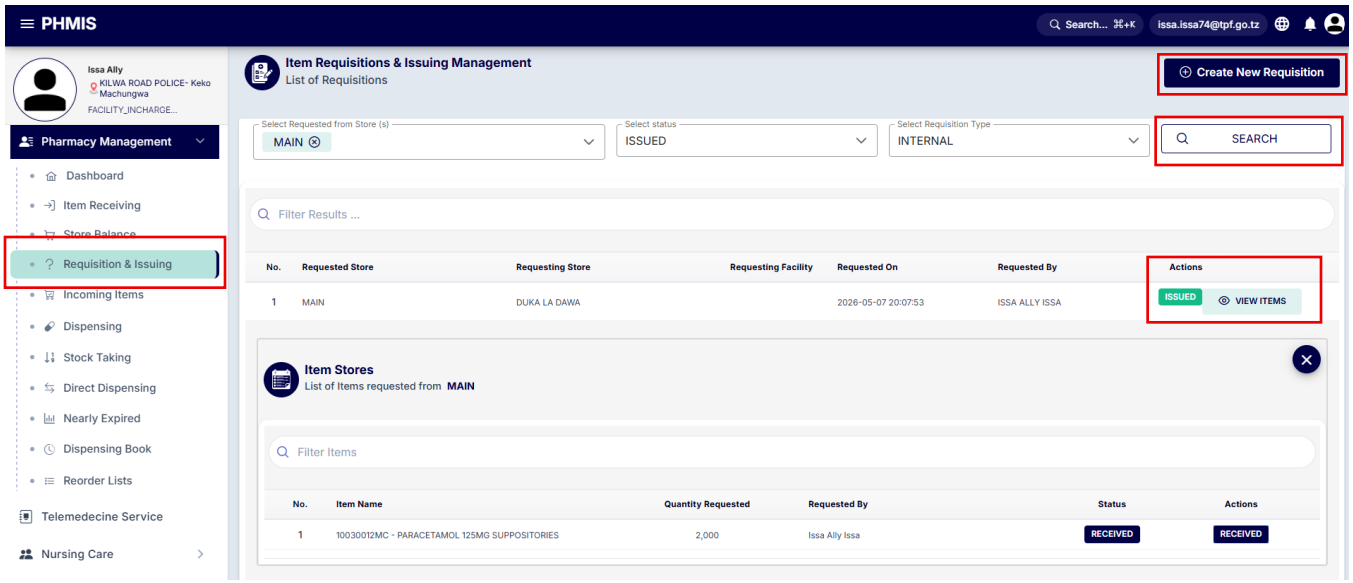
- Click Create New Requisition. A pop-up box will appear.
- Click Add Item when requiring more than one item.
- Click Create when done to save the order.



Issuing Items:

- To issue the requested items, select Store, Status, and Requisition Type, then click Search.
- Check the request you want to process and click ISSUE ITEMS. Click VIEW ITEMS to view the items requested before issuing.

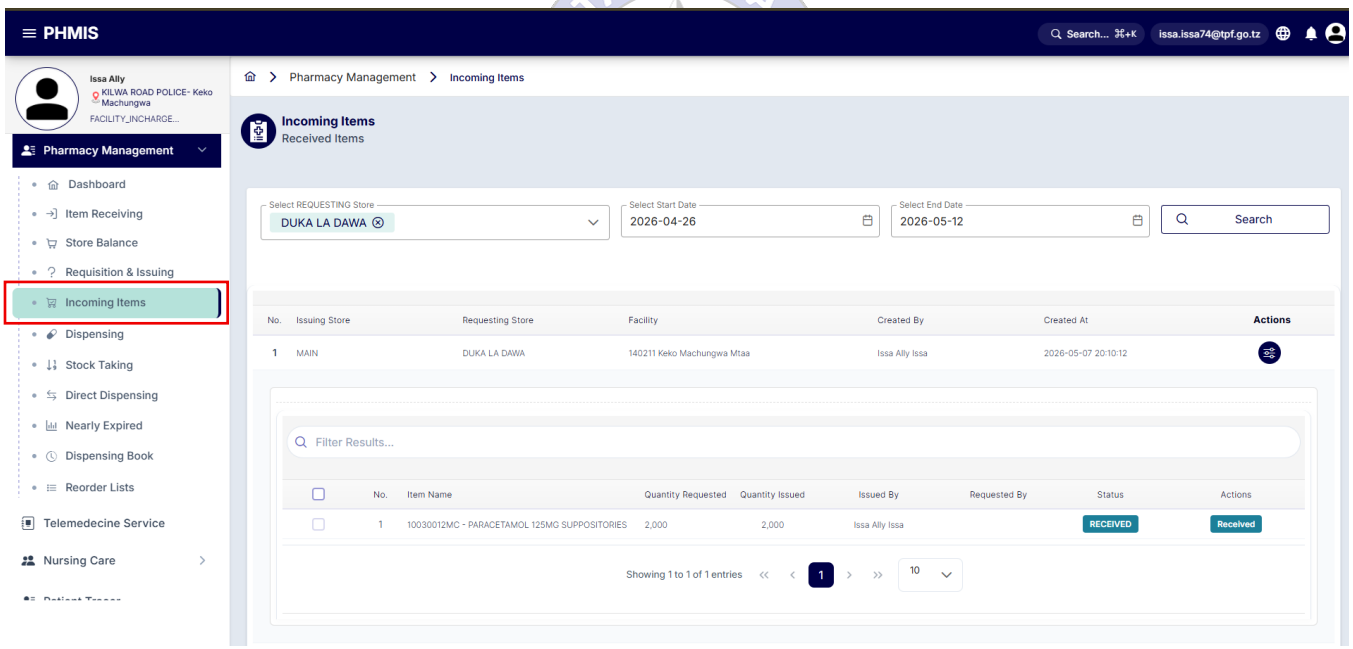
- Select the item name, batch, and enter the issuing quantity.
- Click Prepare Items. Repeat for multiple items.
- Click Save Item when done.



10.4 Incoming Items

To receive incoming items from another store:

- Select the requesting store, start date, and end date, then click Search.
- From the list generated, click RECEIVE ITEM for all items populated.

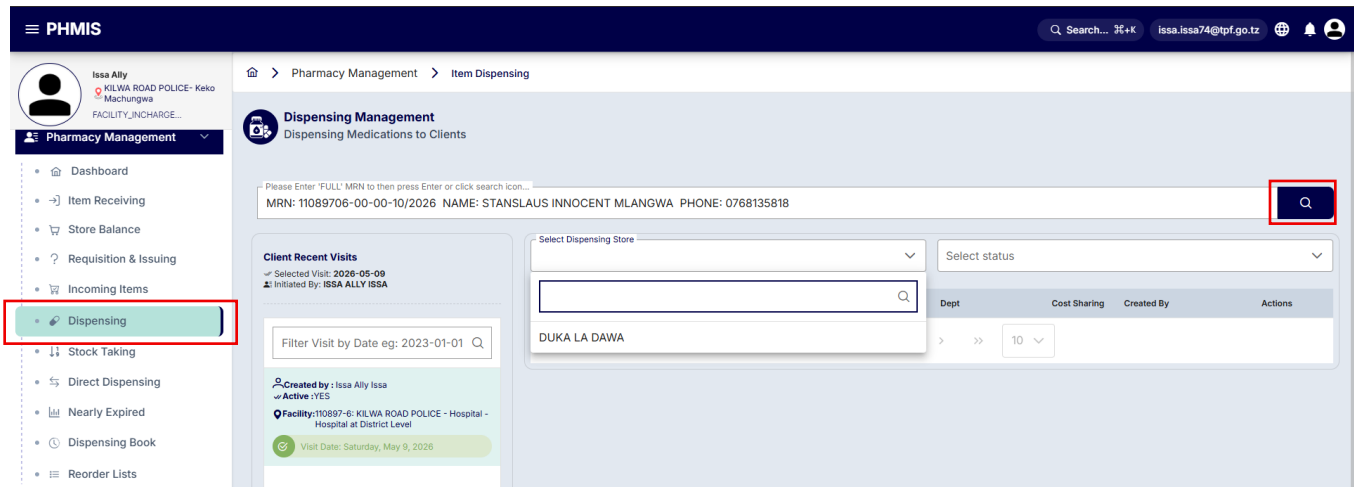


10.5 Dispensing

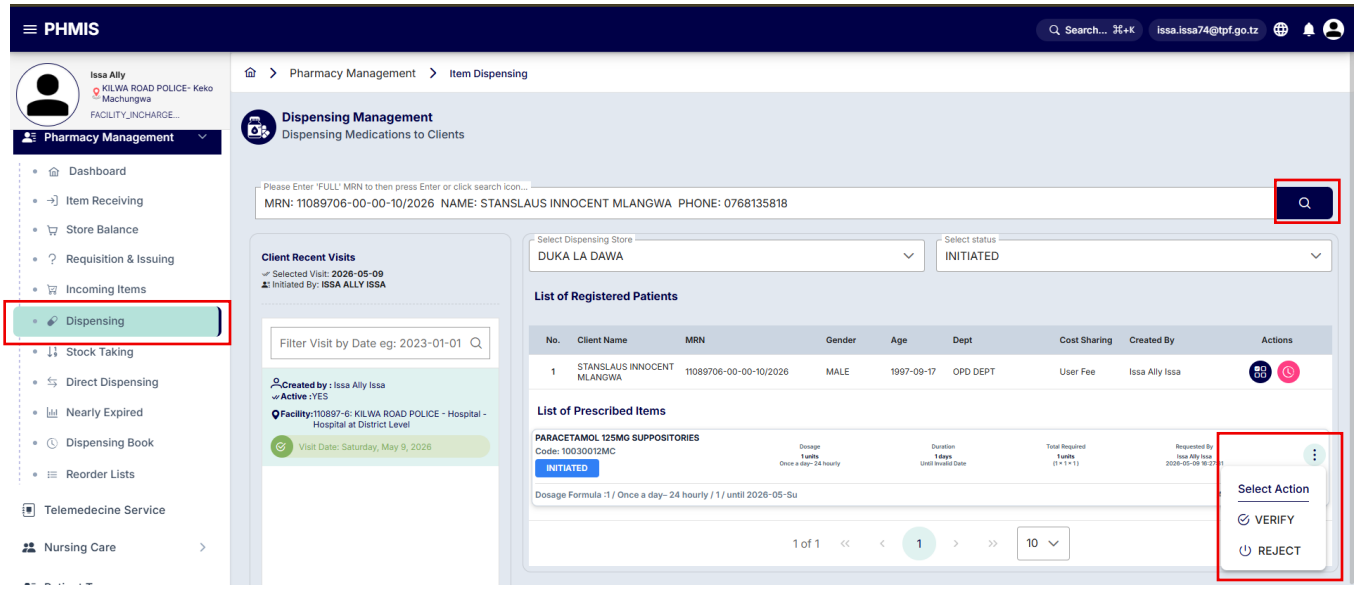
To dispense items to a client:

- Enter the patient MRN and select the patient, then select the store and status. A list of medications will appear.
- Click the Prescribed button. Medications will appear at the bottom.

- Click the three dots and either Verify (if the dosage is correct) or Reject (if incorrect).



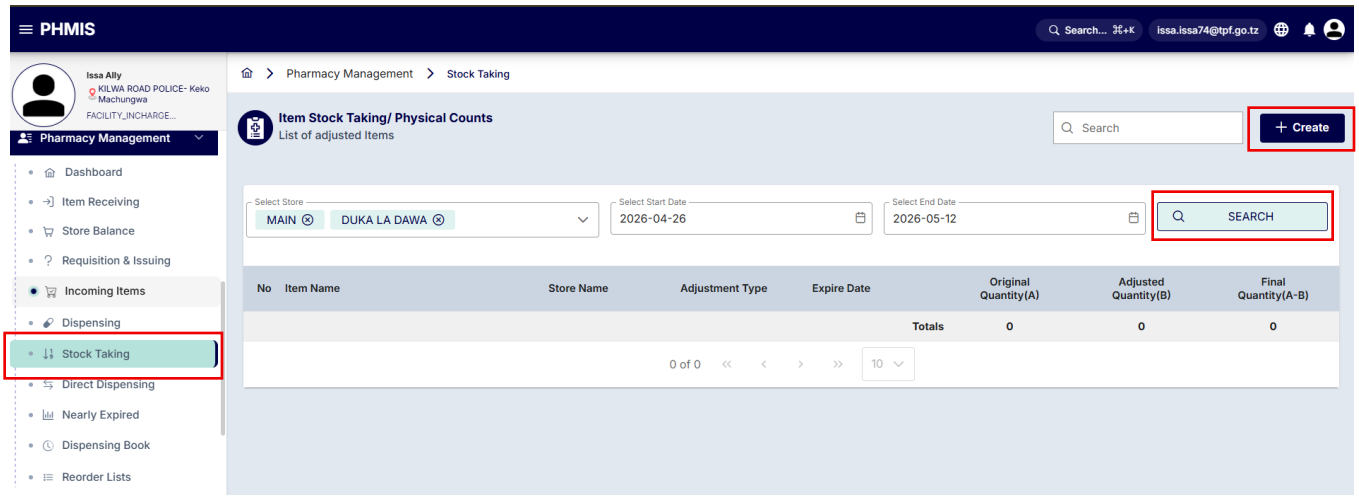
Then click verify or reject



10.6 Stock Taking

To perform stock taking:

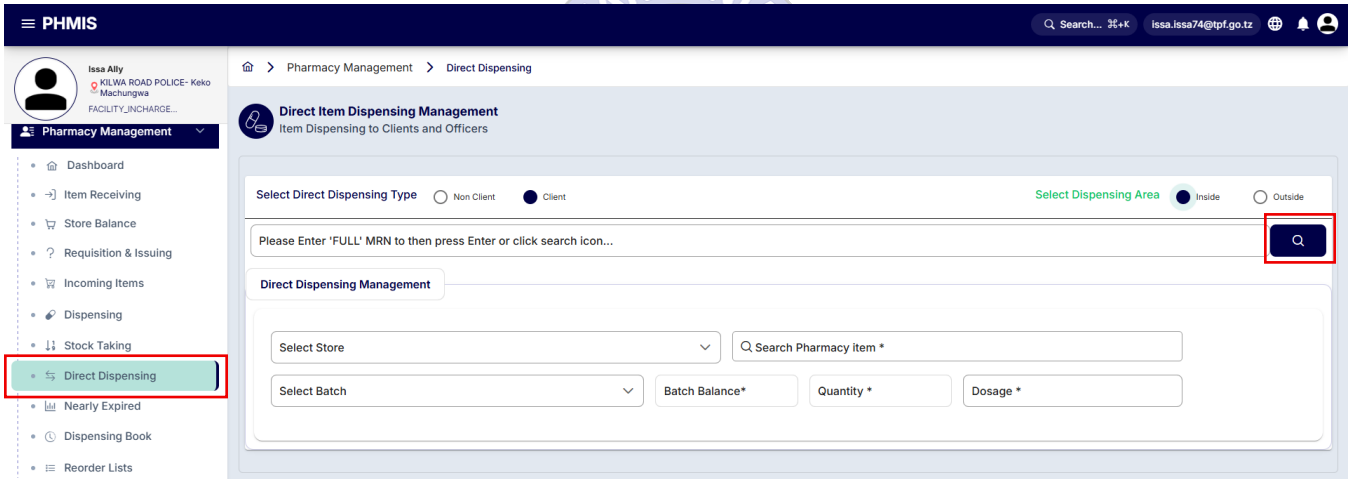
- Click Create. A pop-up box will appear.
- Search for the item and select it, fill in the adjusted quantity, select the adjustment type, and enter a description.
- Click Create when done to save.



10.7 Direct Dispensing

To perform direct dispensing:

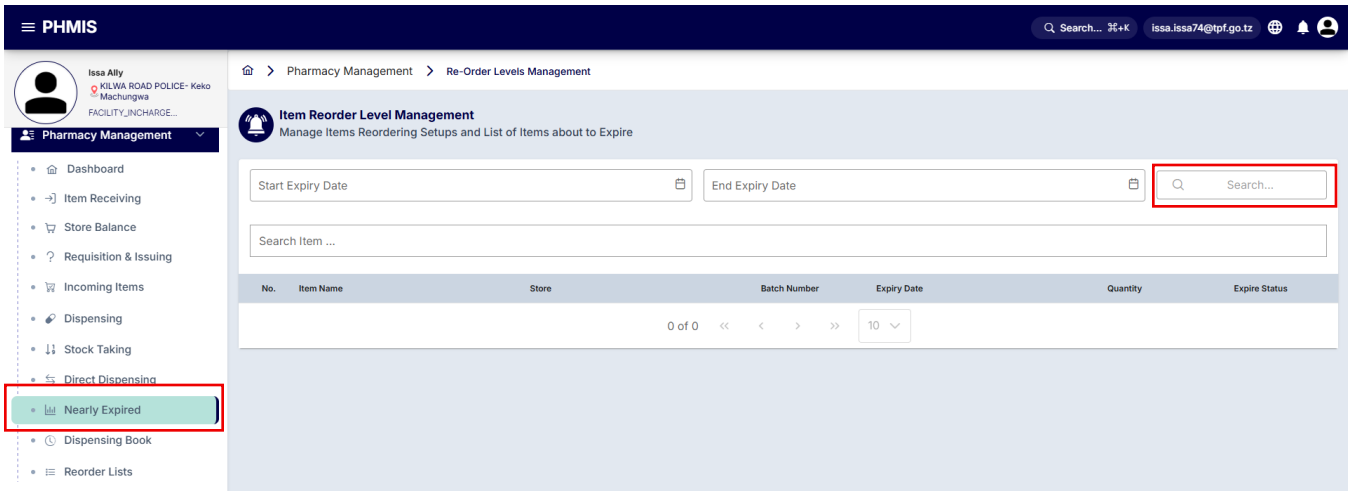
- Select dispensing type and dispensing area. For a client, a search box to enter MRN will appear.
- For non-Client dispensing, select the store, search for the item to dispense, select batch, enter quantity, and click Save when done.



10.8 Nearly Expired

To search for items that are nearing expiry:

- Enter the Start Date and End Date, then click the Search button.
- All near-expired items will be displayed.



10.9 Dispensing Book

To view prescriptions for a client:

- Enter the client MRN, Start Date, and End Date, then click Filter Data.
- Click Download to view the prescriptions for the client.

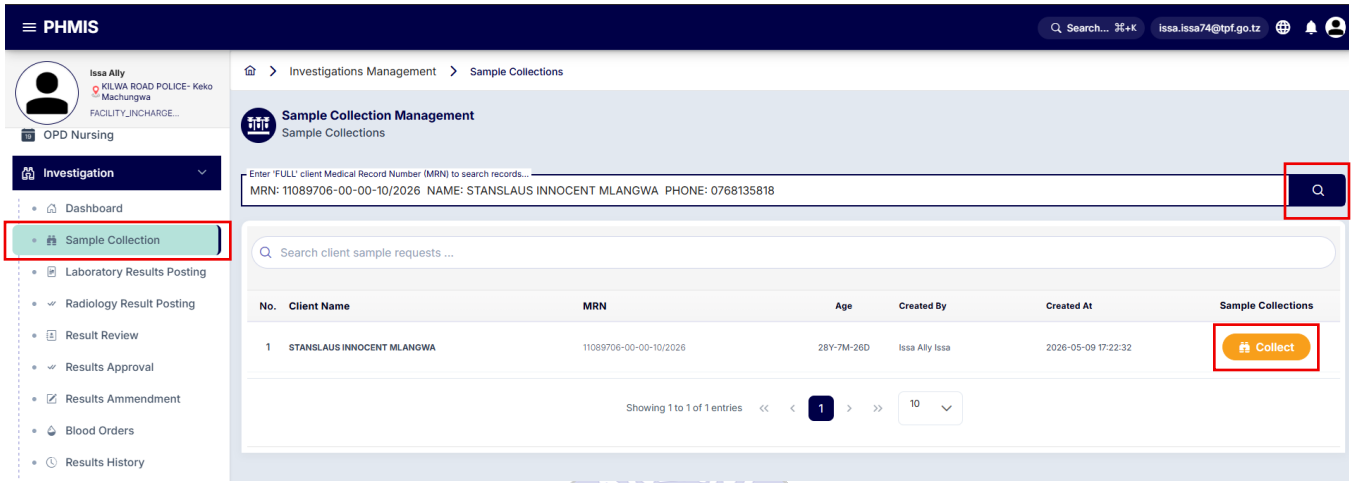
11.0 Investigation

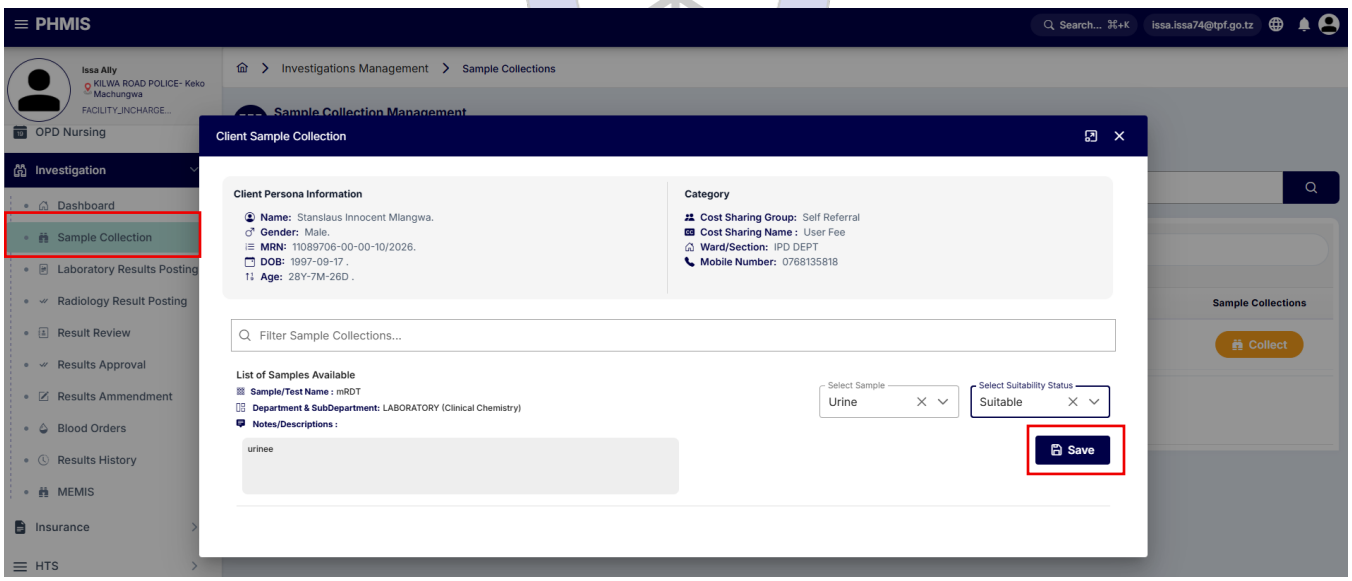
11.1 Sample Collection

To collect a sample:

- Navigate to Investigation, then click Sample Collection. Enter the patient MRN and select the patient.
- A list of tests to be performed will appear. Click the Collect button.
- A pop-up will appear. From the test list, select the Sample Type and click Save.



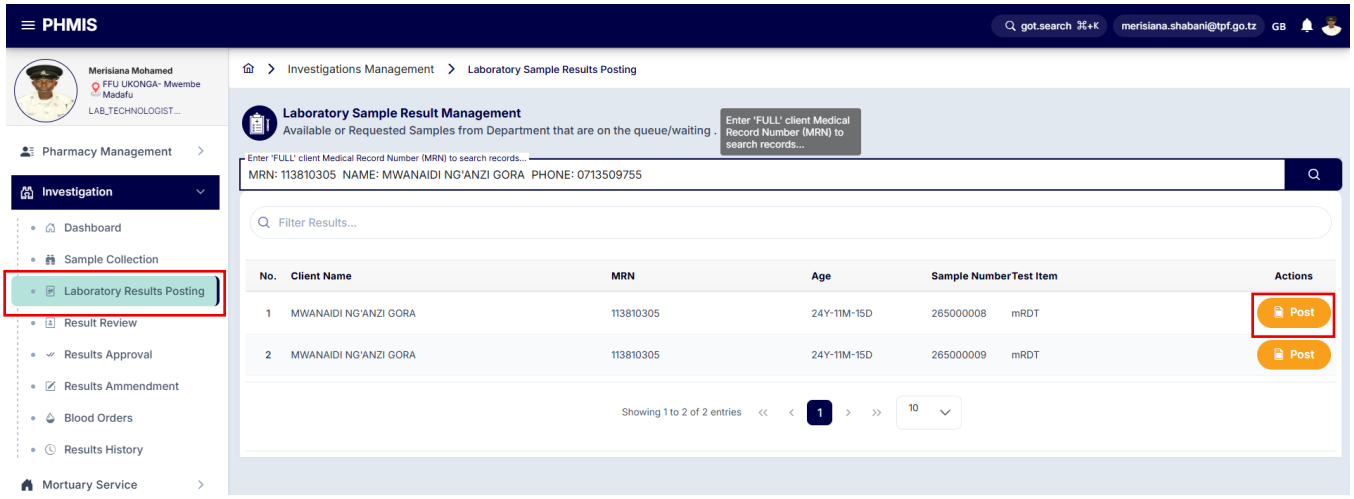
- From the test list, select the Sample Type and click Save.

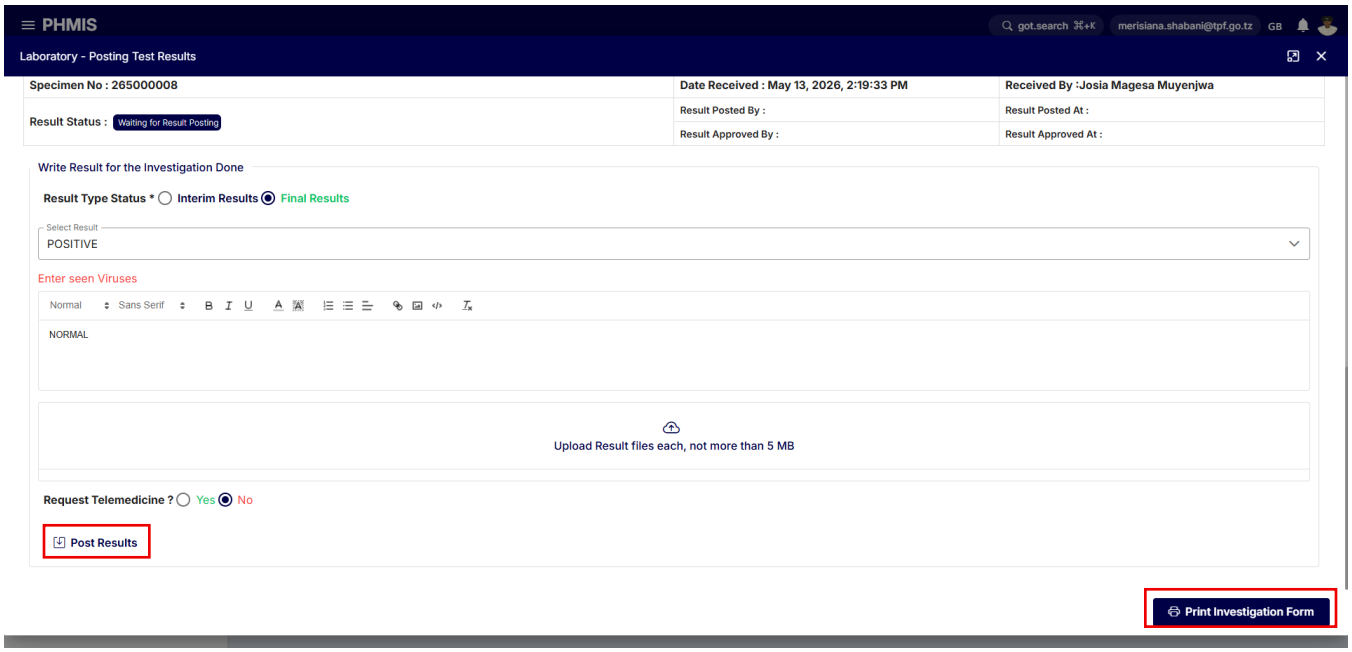


11.2 Laboratory Results Posting

- Click Sample Collection, enter the patient MRN, and select the patient.
- From the list, click Post. The investigation form will appear.

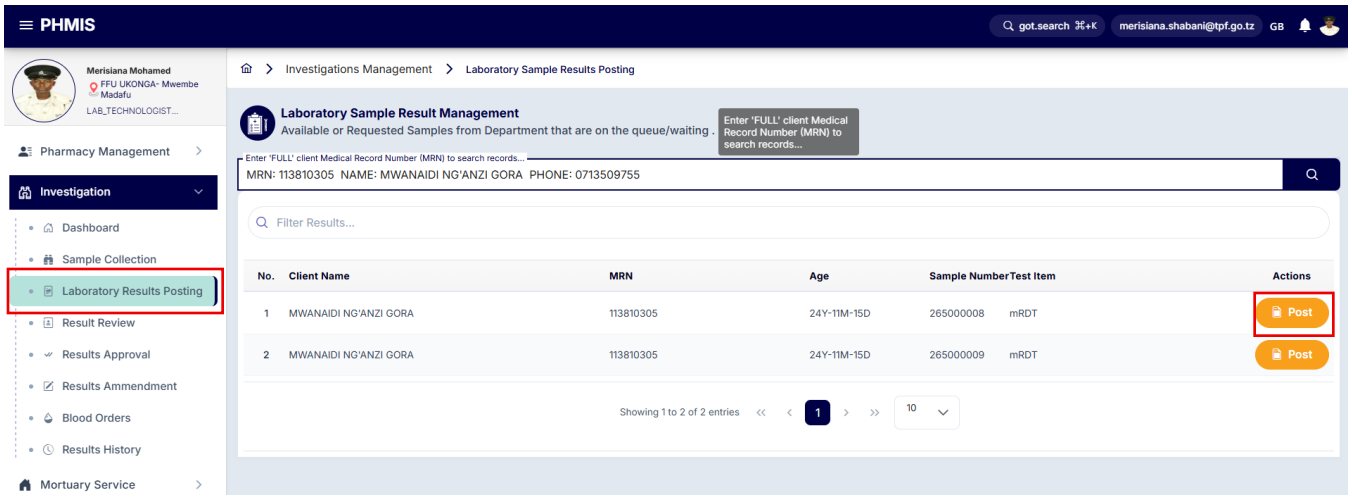
- From the pop-up box, enter your results in the textbox labeled "Enter Results".
- Click Post Results when done to save.



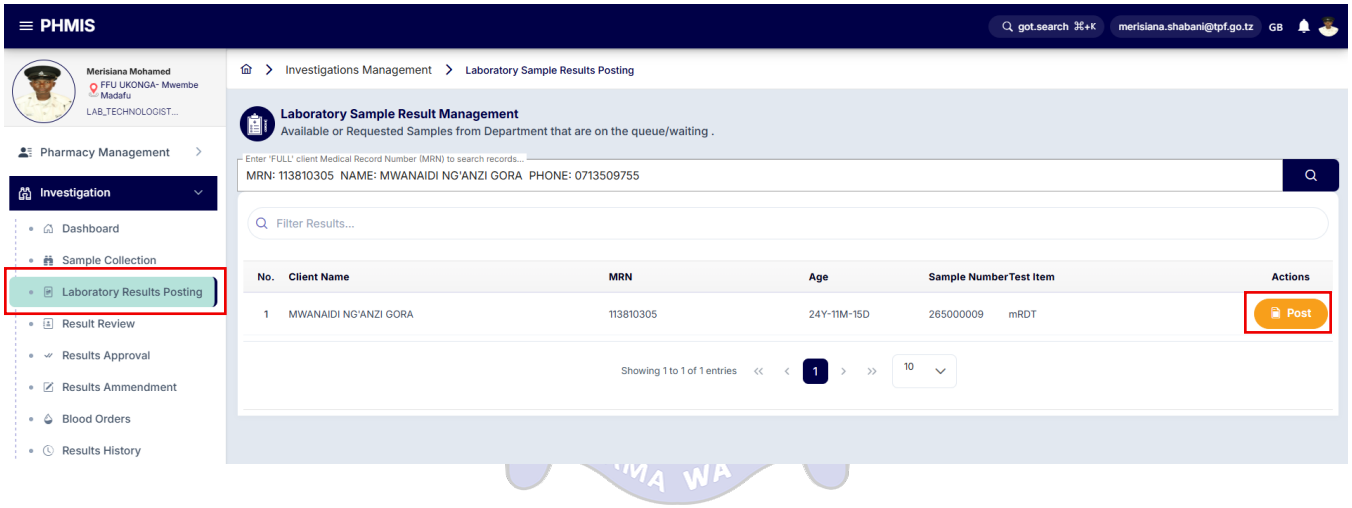


11.3 Radiology Results Posting

- Click Radiology Result Posting. Enter the patient MRN and select the patient.
- Click View Requisitions. A list of investigations will appear.
- Click Post Results. A pop-up form to enter results will appear.



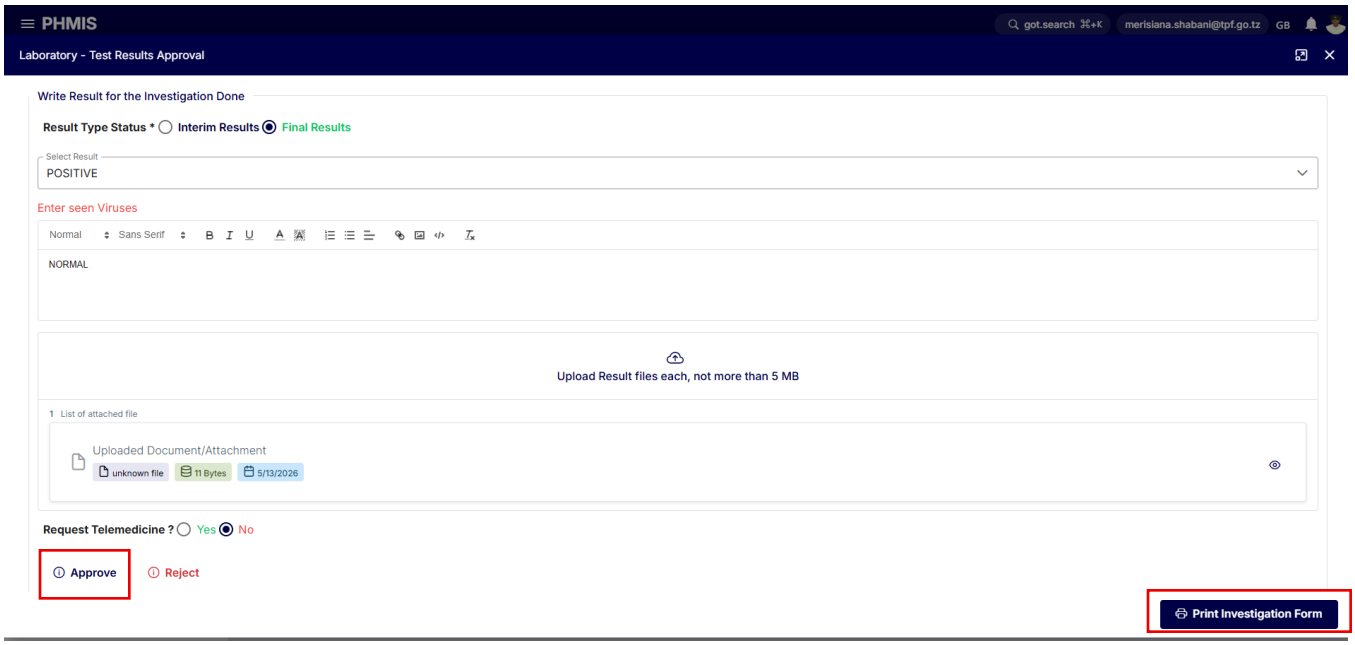
- Write the result description in the text box provided.
- Click Choose a PDF or Image File to upload an image. The image should not exceed 5MB.
- Click Post Results to save when done.



11.4 Results Approval

To approve results:

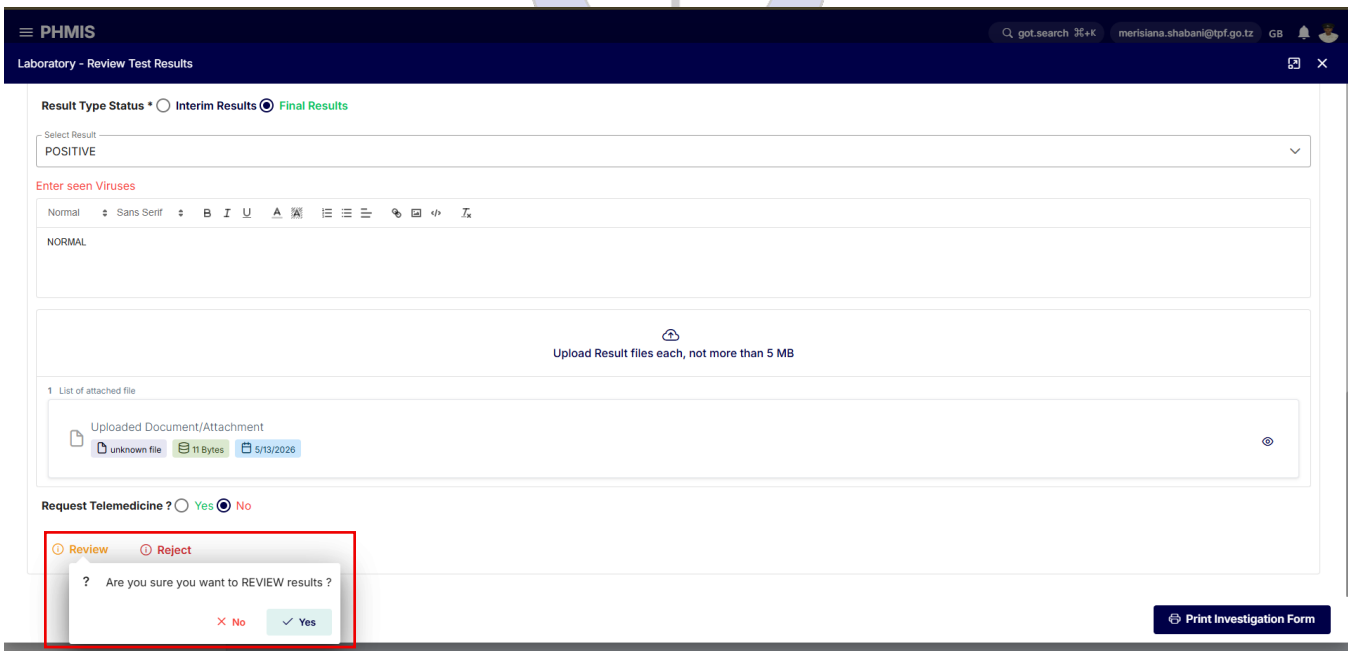
- Navigate to Investigation, then click Result Approval. Enter the patient MRN and select the patient.
- From the list, click the Approve button.
- Click Approve to send results to the doctor, or Click Reject to terminate, or upload PDF/Image for results that cannot be written.



11.5 Results Review

To review results:

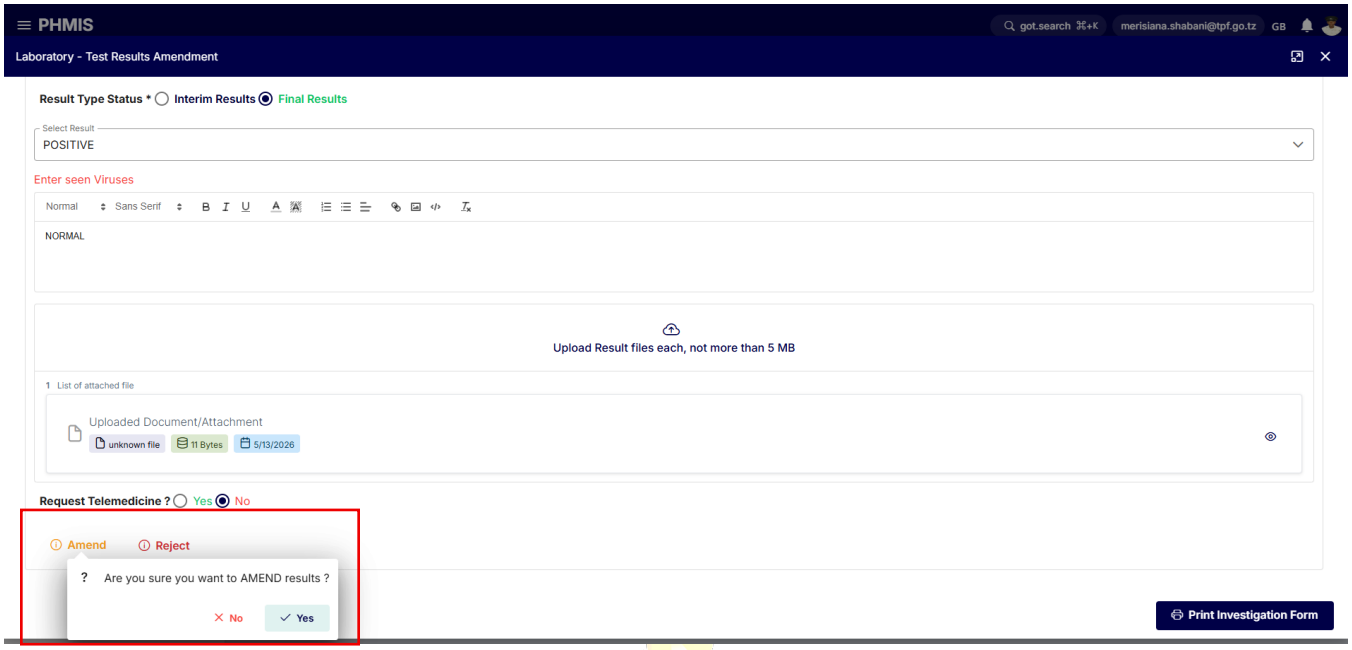
- Click Result Review, then enter the patient MRN and select the patient.
- From the list, click the Review button.
- To accept the results as posted, click Review. To reject the result, click Reject and the results will need to be re-posted.



11.6 Results Amendment

To amend results:

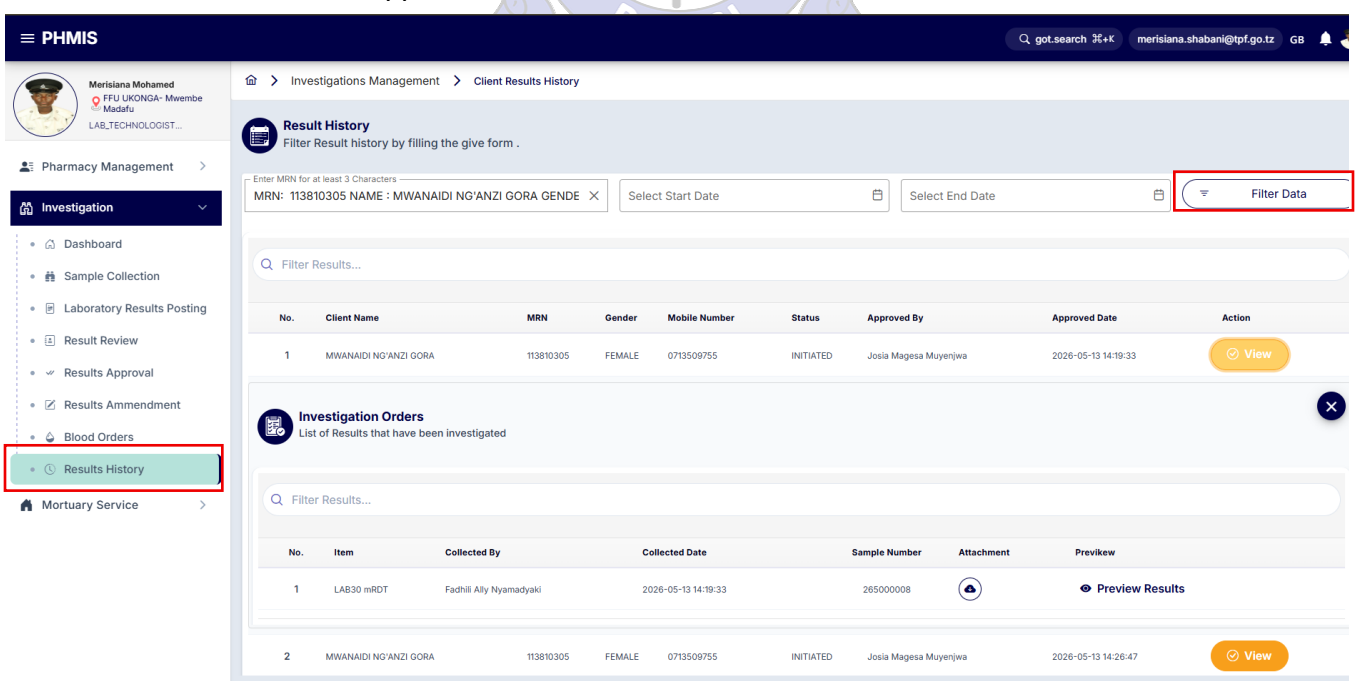
- Click Results Amendment, enter the patient MRN, and select the patient.
- From the list populated, click Amend and then proceed to amend the results.



11.7 Results History

To view result history:

- Open Results History, enter the patient MRN, Start Date, and End Date, then click Filter Data. The list will be populated.
- Select based on the approved date, then click View to see the results.



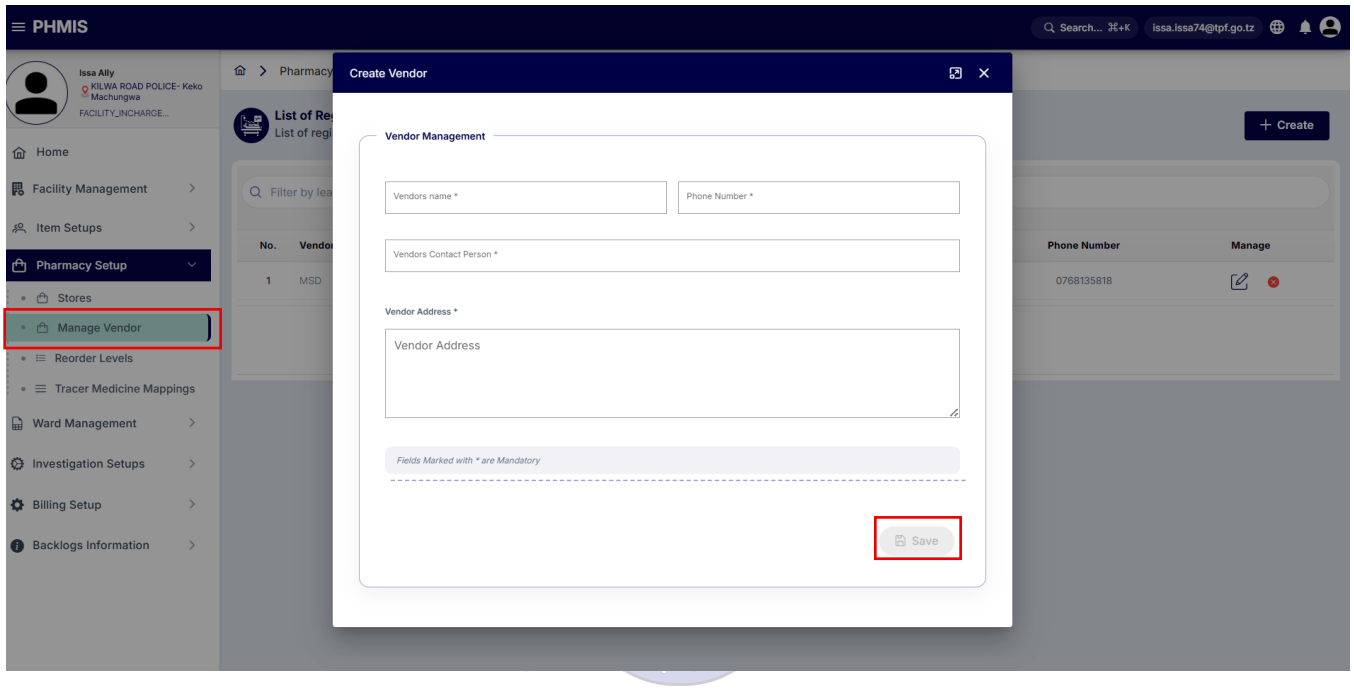
12.0 Prime Vendor

This module works with the MSD procurement system (ELMIS). When a facility sends an order to MSD and the item happens to be out of stock, the facility will receive an Out of Stock (OOS) notification. Through this module, the facility can receive OOS notifications directly and place orders with a prime vendor.

12.1 OOS Notification

To view Out of Stock notifications:

- Click OOS Notification. Invoices with out-of-stock items will be listed.
- Click the invoice number to see the items that are out of stock. Take note of the invoice number.



12.2 Create Order

To create a prime vendor order:

- Click Create Order. A Prepare Order window will appear.
- Enter the invoice number and click Search. The entered invoice will appear.
- Select the items you want to order by checking the box on the right side.
- Click Prepare Order when done.

Edit Order:

- To edit the order, click Edit. You can change the order quantity or add comments.
- Click Submit to save when done.

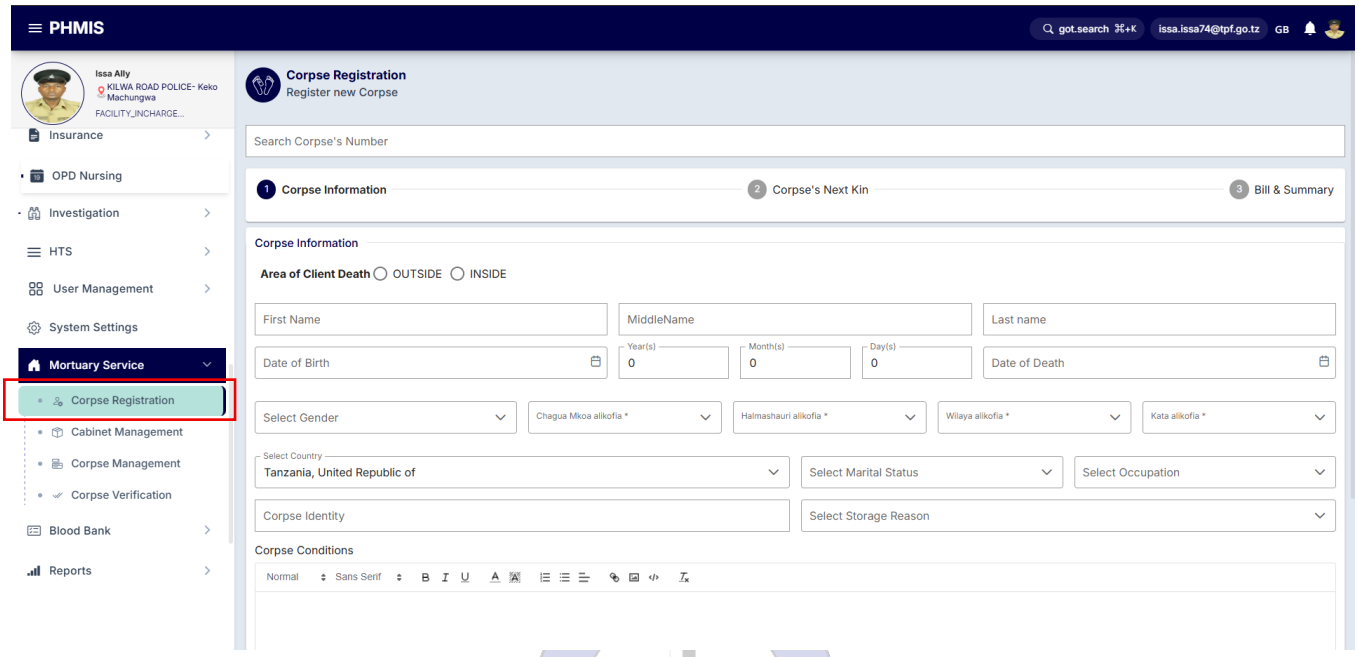
13.0 Mortuary Services

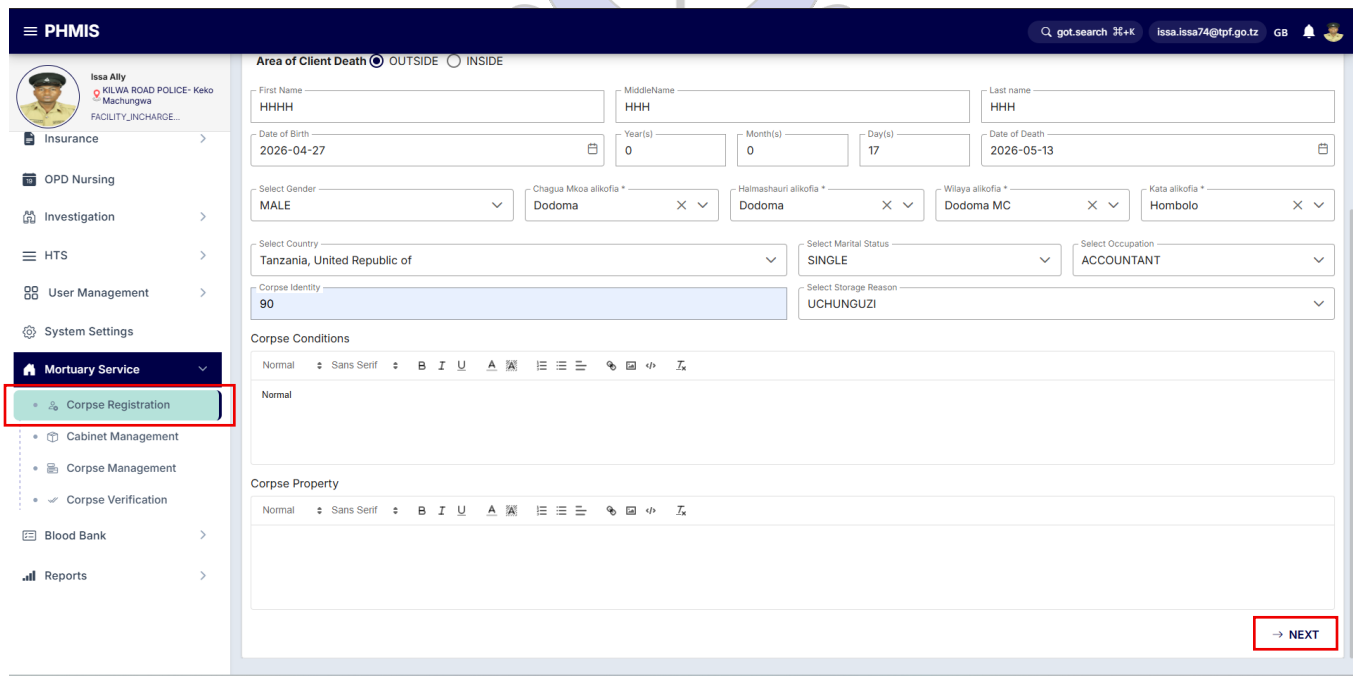
13.1 Corpse Registration

To register a corpse:

- Enter the corpse information and click Next.

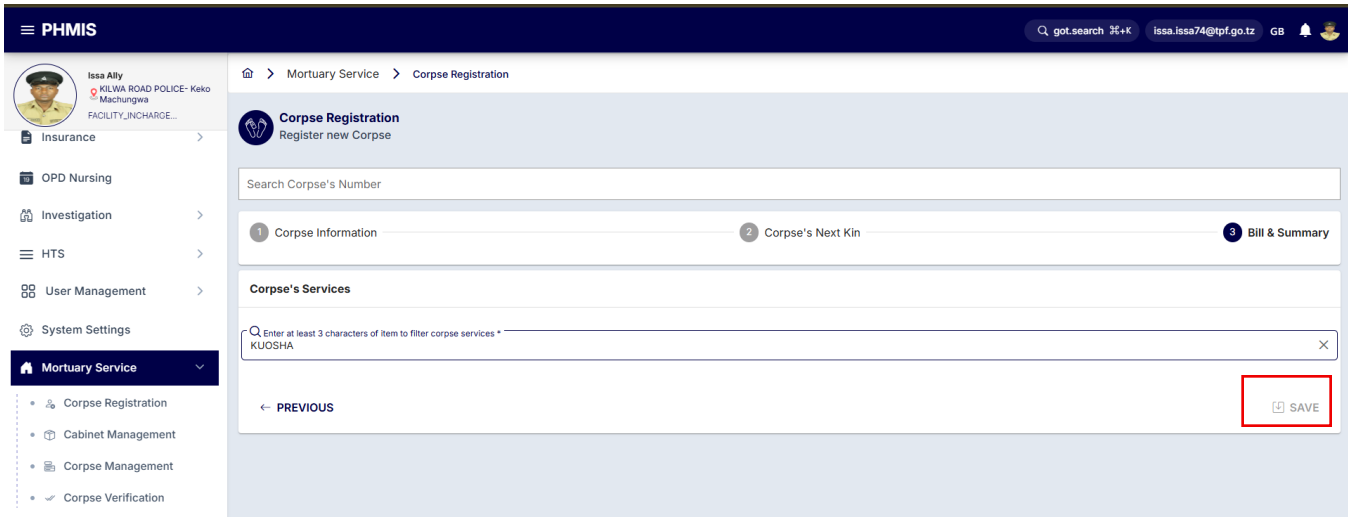


- Enter the Next of Kin information and click Next.

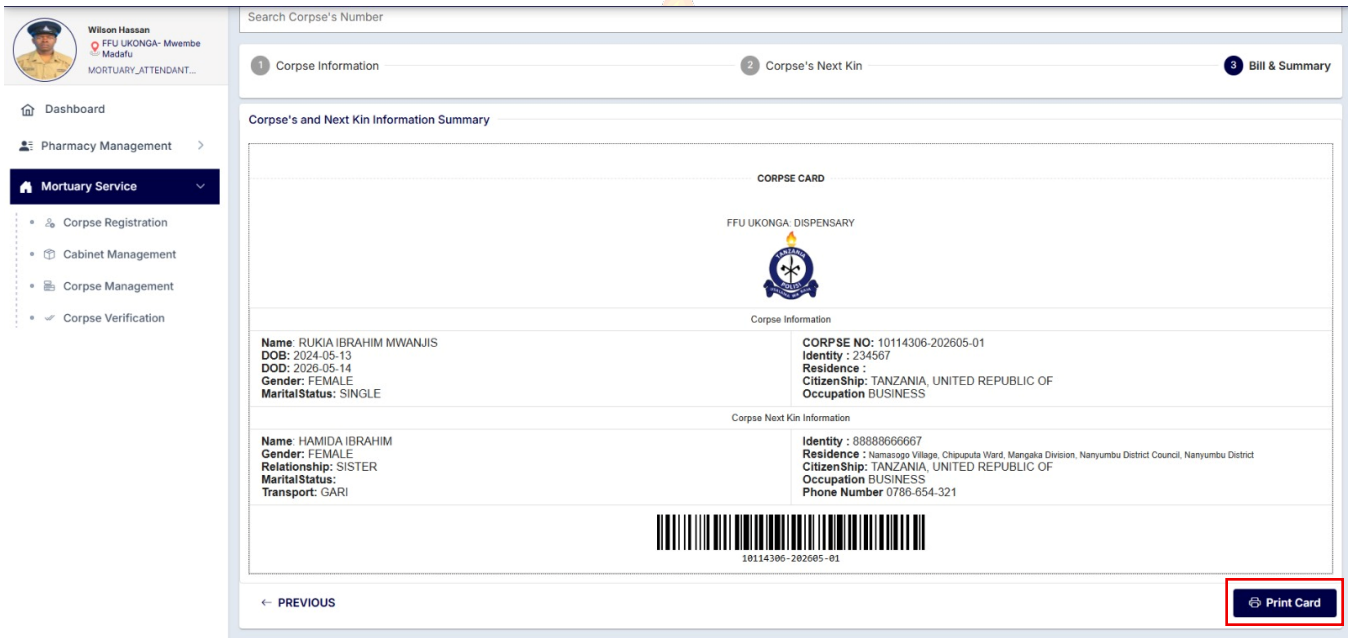


- Select a service to assign to the corpse being registered and click Save.

NOTE: *The selected service will appear in pending bills waiting to be cleared. Relatives will need to go to the cashier to pay.*



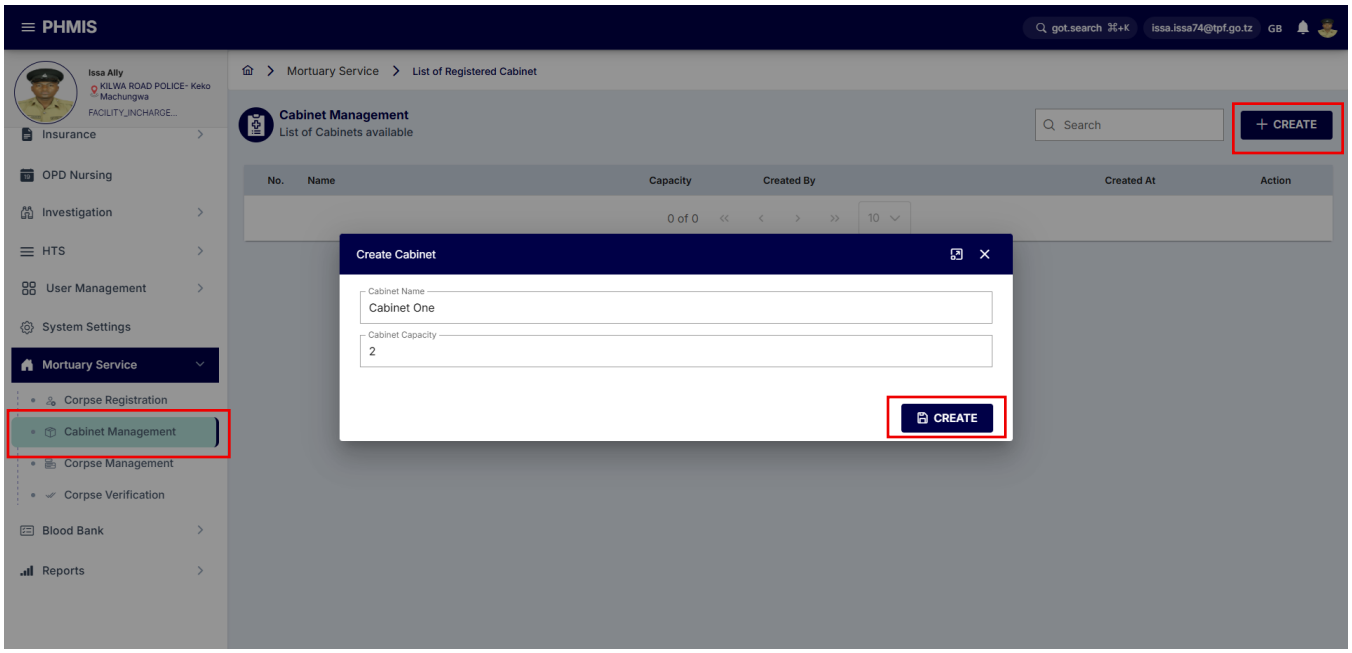
Upon completion of registration, the system will generate a Corpse Card. Click Print Card to produce a hard copy for relatives.



13.2 Cabinet Management

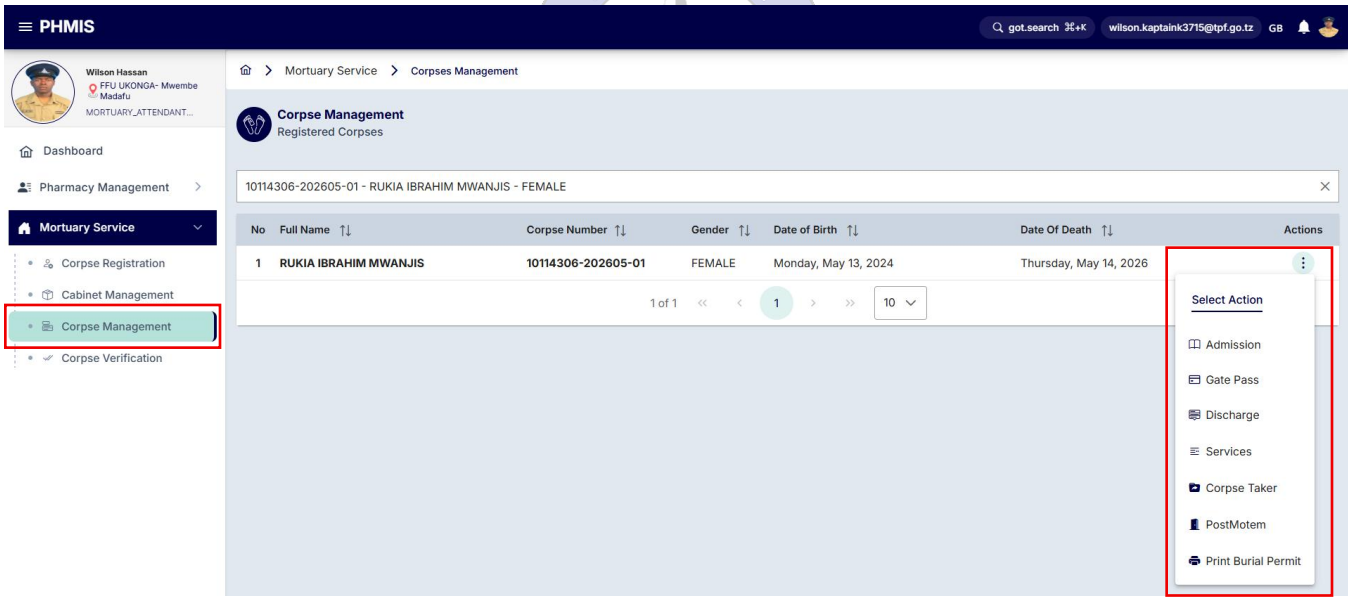
Creating a Cabinet:

- Click Cabinet Management.
- Click Create to get the Create Cabinet pop-up box.
- Enter the Cabinet Name and Capacity, then click Create to save.



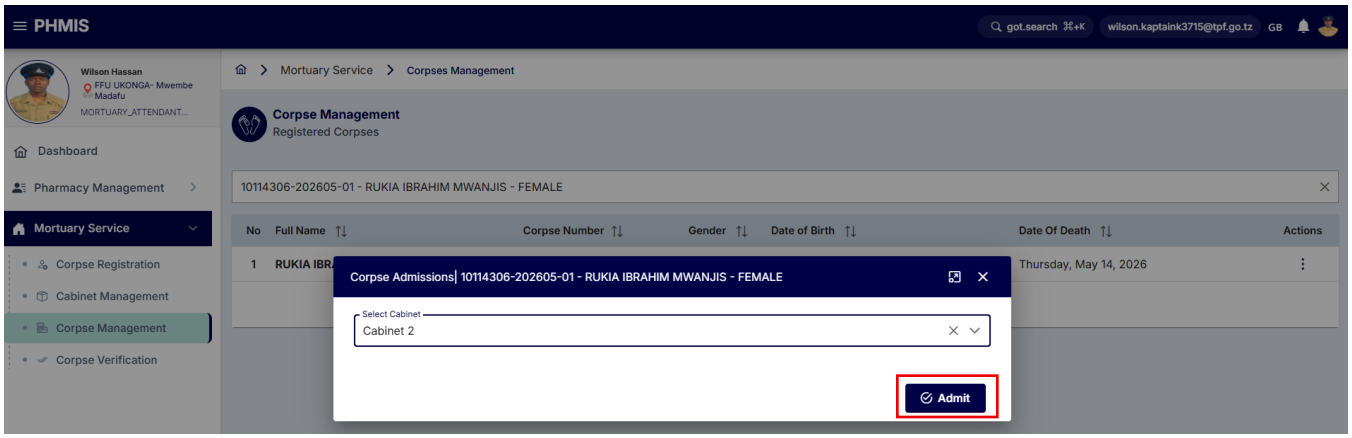
Corpse Management:

To manage a corpse, open Mortuary Services, then Corpse Management. Enter the corpse registration number and select the corpse to attend. Under the Action column, click the three dots and select the action you want to perform.



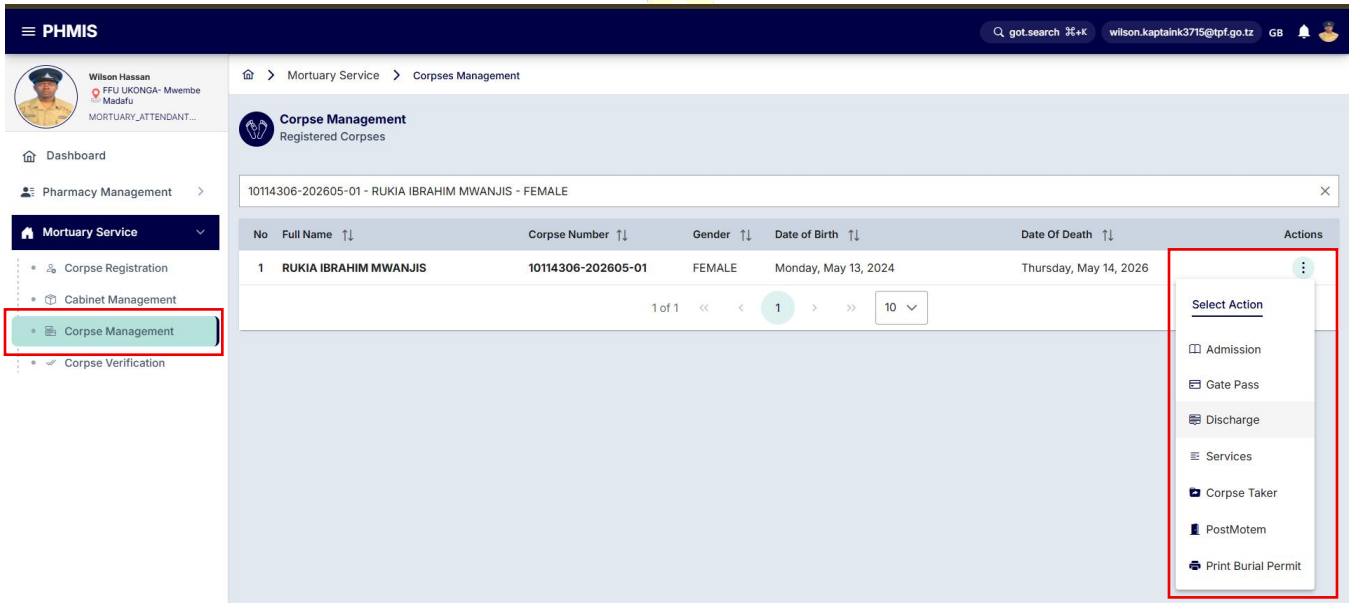
Corpse Admission:

- Click Corpse Management, enter the corpse registration number, and select the corpse.
- Under the Action column, click three dots and then click Admission.
- A pop-up will appear requiring you to select a cabinet.
- Click Admit to admit the corpse.



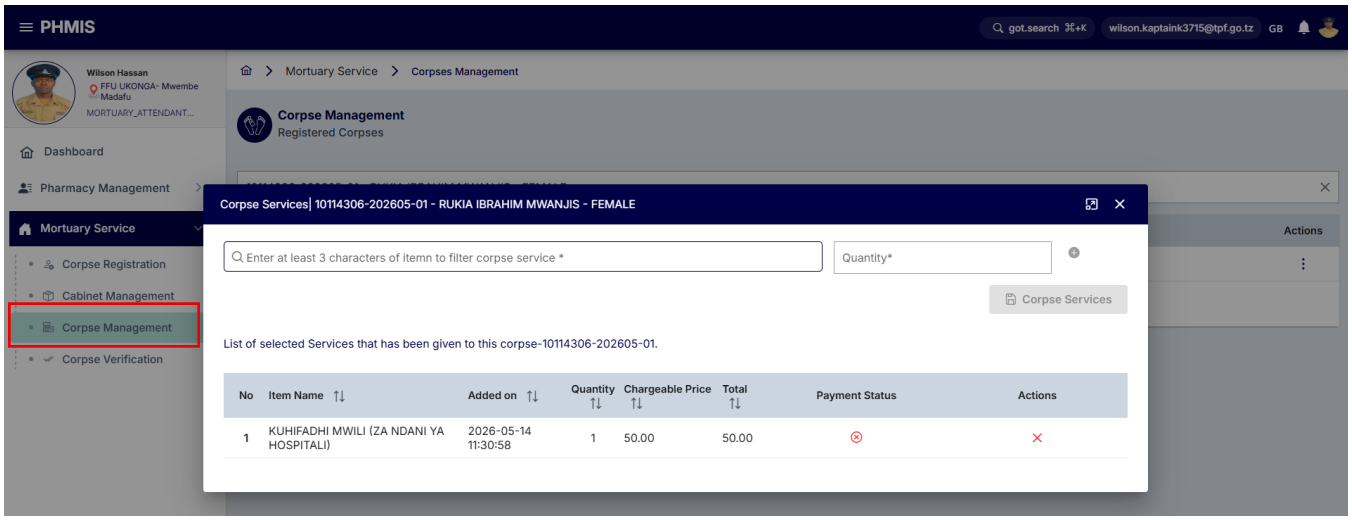
Corpse Discharge:

- To discharge a corpse, open Mortuary Services, click Corpse Management, enter the corpse registration number, and select the corpse.
- Under the Action column, click three dots and then click Gate Pass. A pop-up box will appear. Enter the burial permit number and discharge notes.
- Click Corpse Discharge, then click Yes to grant Gate Pass.



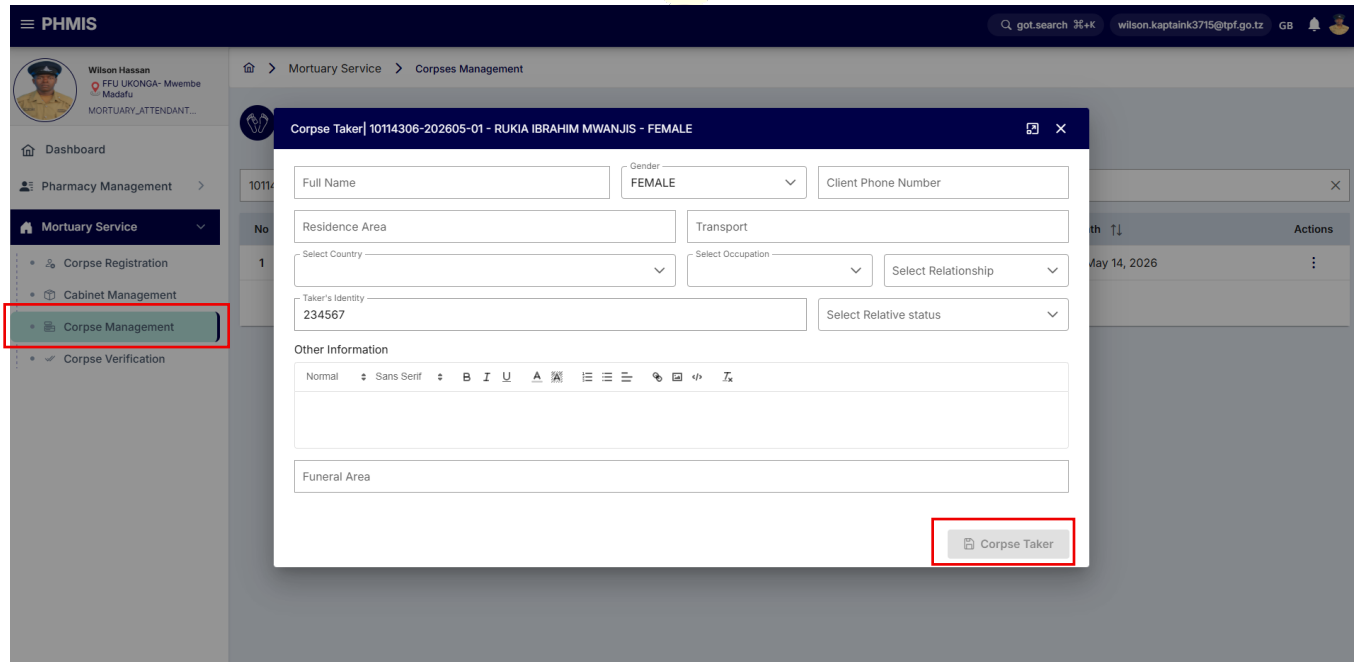
Corpse Service:

- From Select Action, click Service.
- Select a service from the dropdown and enter the quantity, then click the plus (+) sign to add.
- Repeat for multiple services. To remove an item, click the red X.
- Click Corpse Service to save when done.



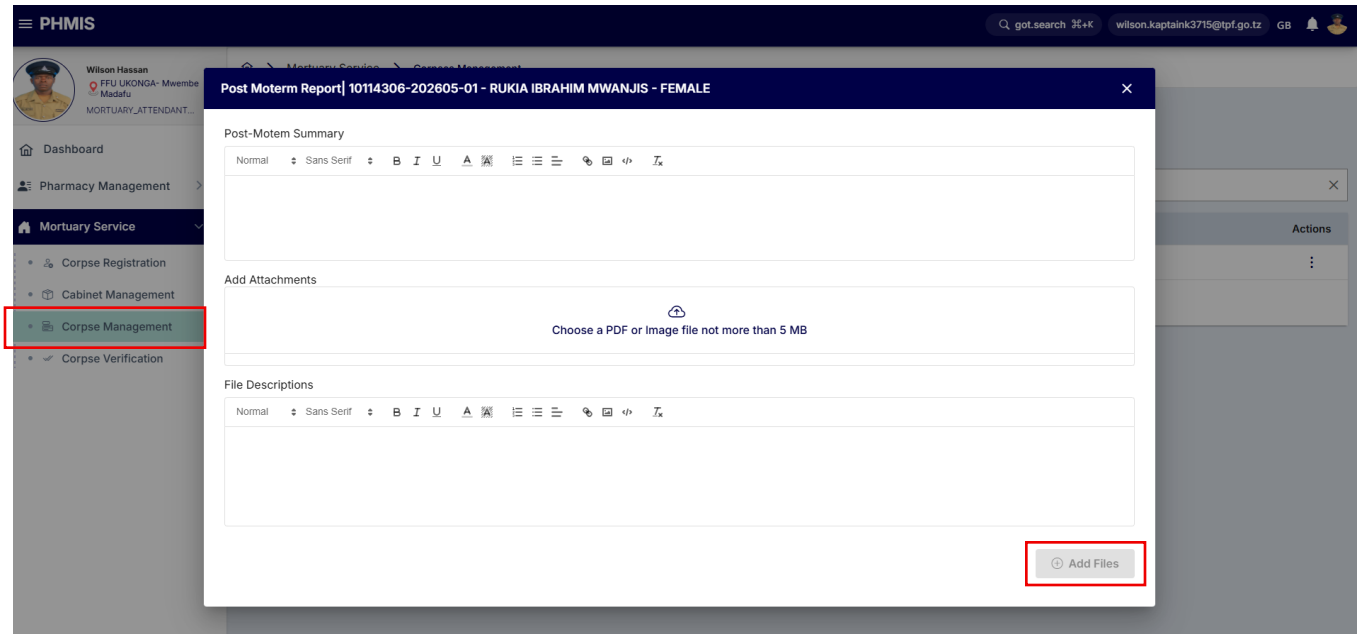
Corpse Taker:

- Click Cabinet Management.
- From Select Action, click Corpse Taker. A pop-up form will appear to fill in corpse taker information.
- Click Corpse Taker to save when done.



Post Mortem:

- Click Corpse Management, enter the corpse registration number, and select the corpse.
- Under the Action column, click three dots, then click Post Mortem.
- A pop-up form will appear to fill in post mortem summary, add attachments, and file descriptions.
- Click Add Files to save when done.



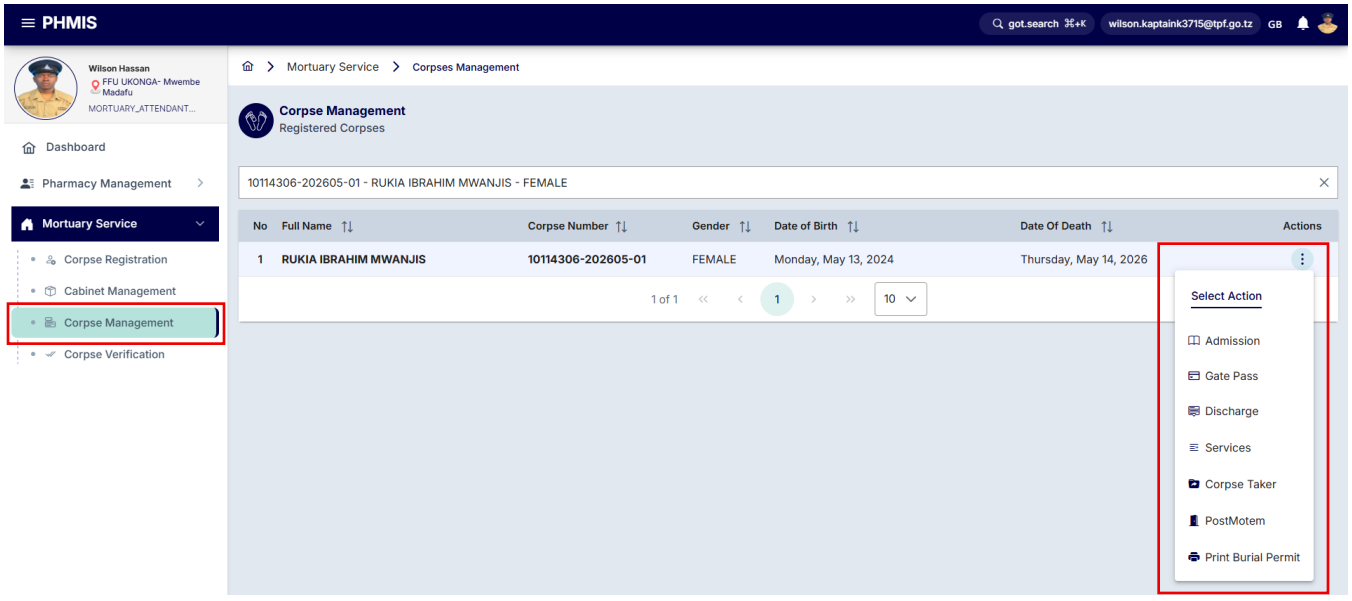
Print Burial Permit:

- Click Corpse Management, enter the corpse registration number, and select the corpse.
- Under the Action column, click three dots, then click Print Burial Permit.
- A pop-up form will appear to allow the user to print the permit.

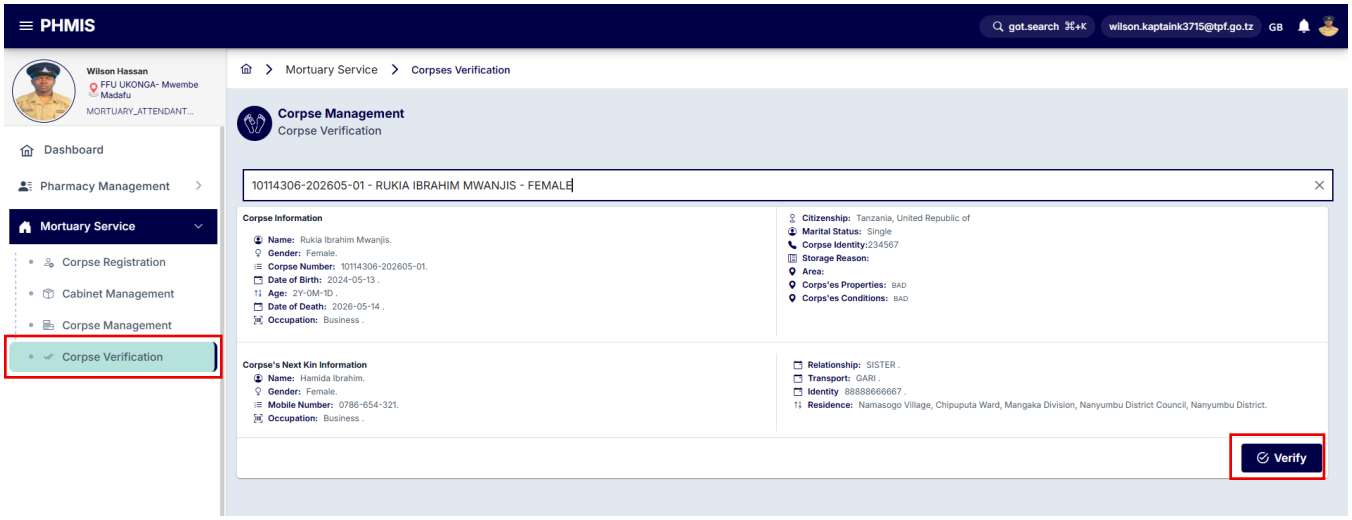
Corpse Verification:

- Click Corpse Verification, enter the corpse registration number, and select the corpse. Corpse information will appear. Click Verify.
- Search the cause of death diagnosis, enter the immediate cause and underlying condition. Click Save when done.

NOTE: *All fields marked with a star (*) are mandatory and must be filled.*



Corpe Verification



14.0 Insurance

This module includes both Community Health Fund (CHF) and National Health Insurance Fund (NHIF) insurance schemes. In this module, users can view claims (submitted and not submitted), perform item mapping for facility and insurance items, manage user mapping, view price packages, and enter insurance credentials to link with the insurance system.

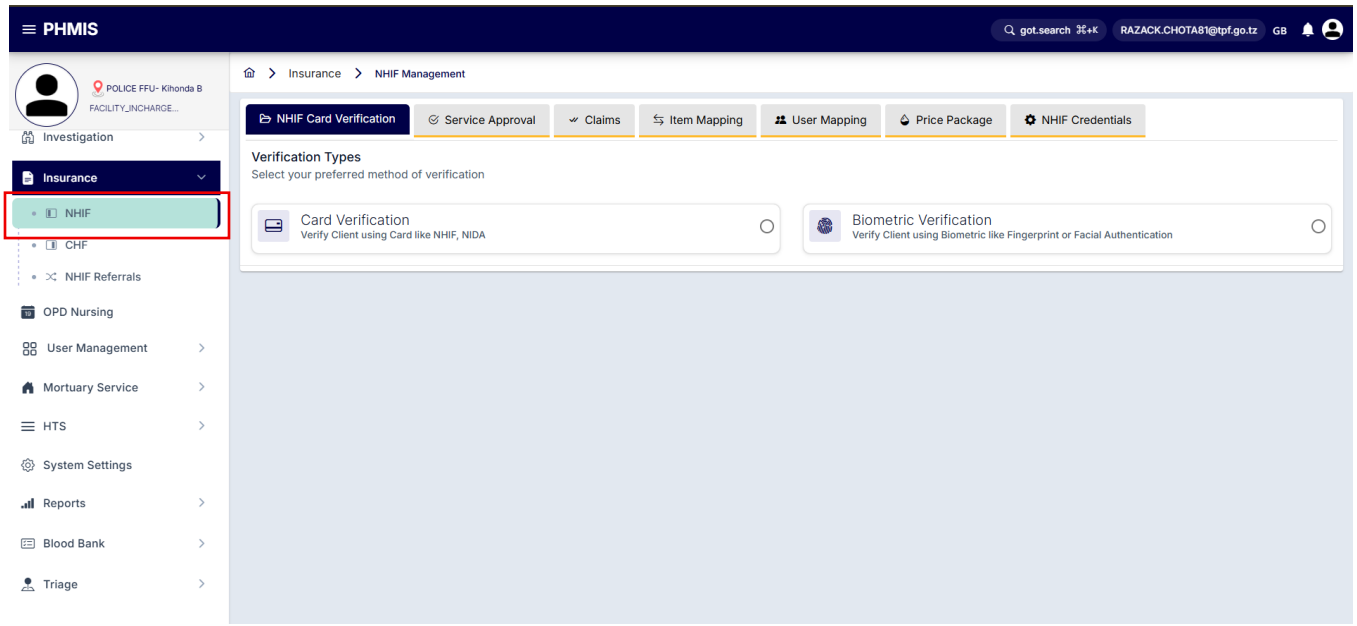
14.1 NHIF

Insurance Claims:

To get insurance claims:

- Navigate to Insurance and open NHIF, then click Claims.
- Choose the dates you want to view and click Filter to get results.

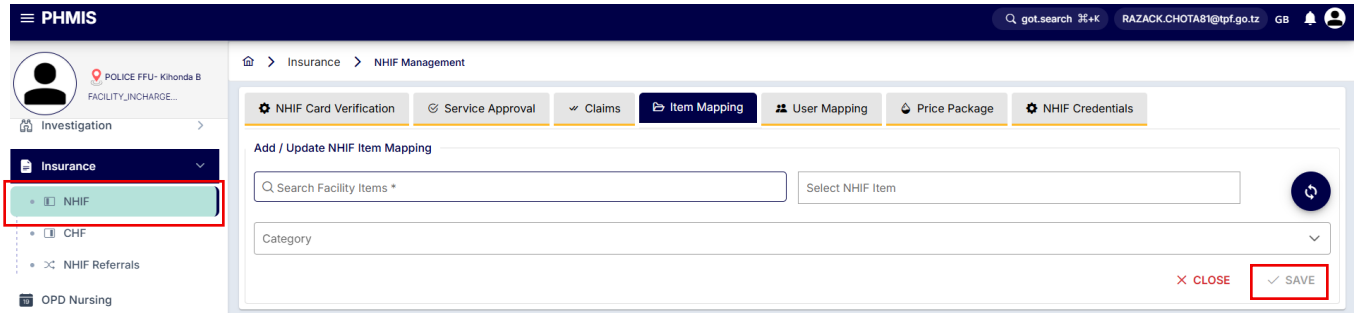
NOTE: *Click the reload icon to get the full list.*



NHIF Item Mapping:

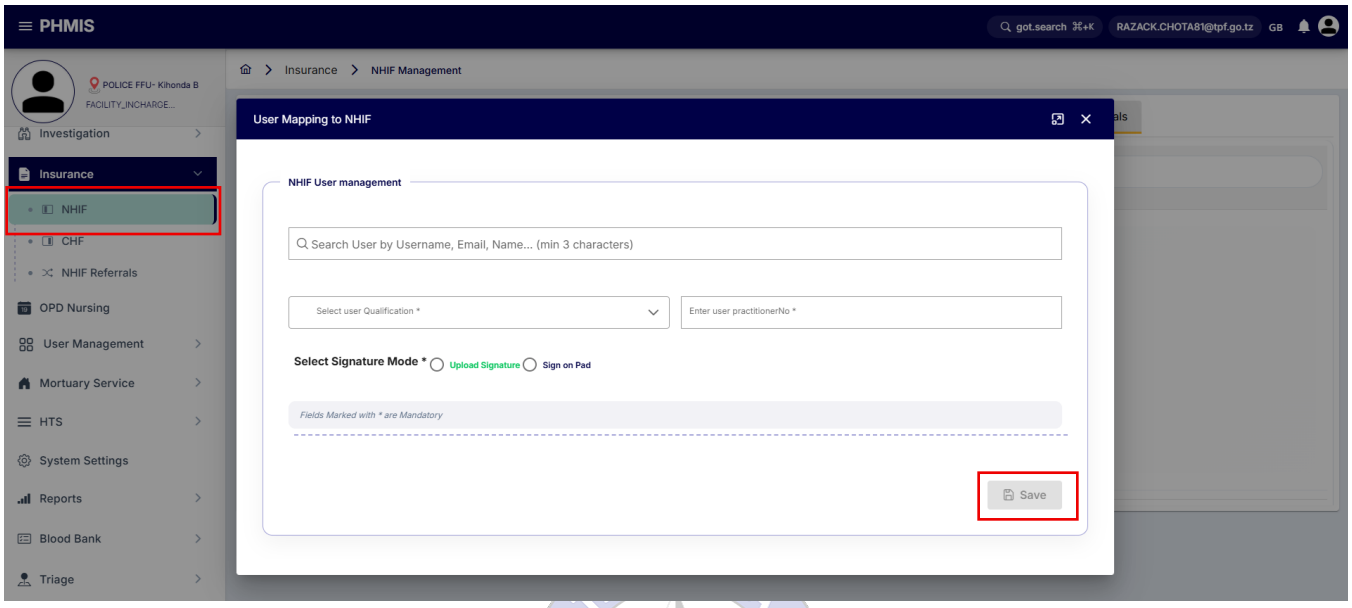
- Click Item Mapping, then search for the Facility Item by entering the name in the Search Facility Items field. Search the corresponding NHIF item in the Search NHIF Item field.
- Select the corresponding category and click Save.

NOTE: *The items searched in both fields must correspond to each other. Wrong matching will lead to incorrect insurance claim data.*



User Mapping:

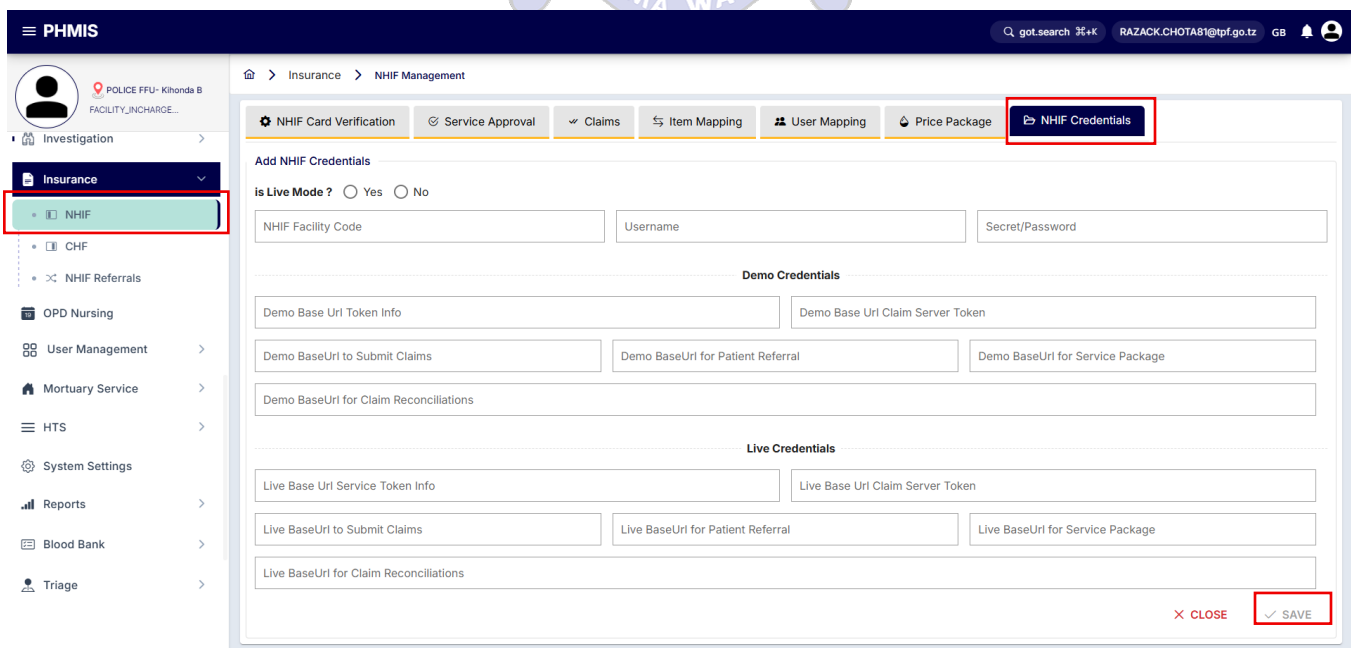
- Click NHIF then User Mapping.
- Search for the user by Email or Username. Select qualification and practitioner number.
- Choose a signature to attach to the user.
- Click Save to finalize or close to exit.



NHIF Credentials:

- Click NHIF Credentials, select mode, then enter the NHIF username and password.
- Click Save.

NOTE: *Demo Credentials and Live Credentials should be left as-is unless provided with specific filling instructions.*



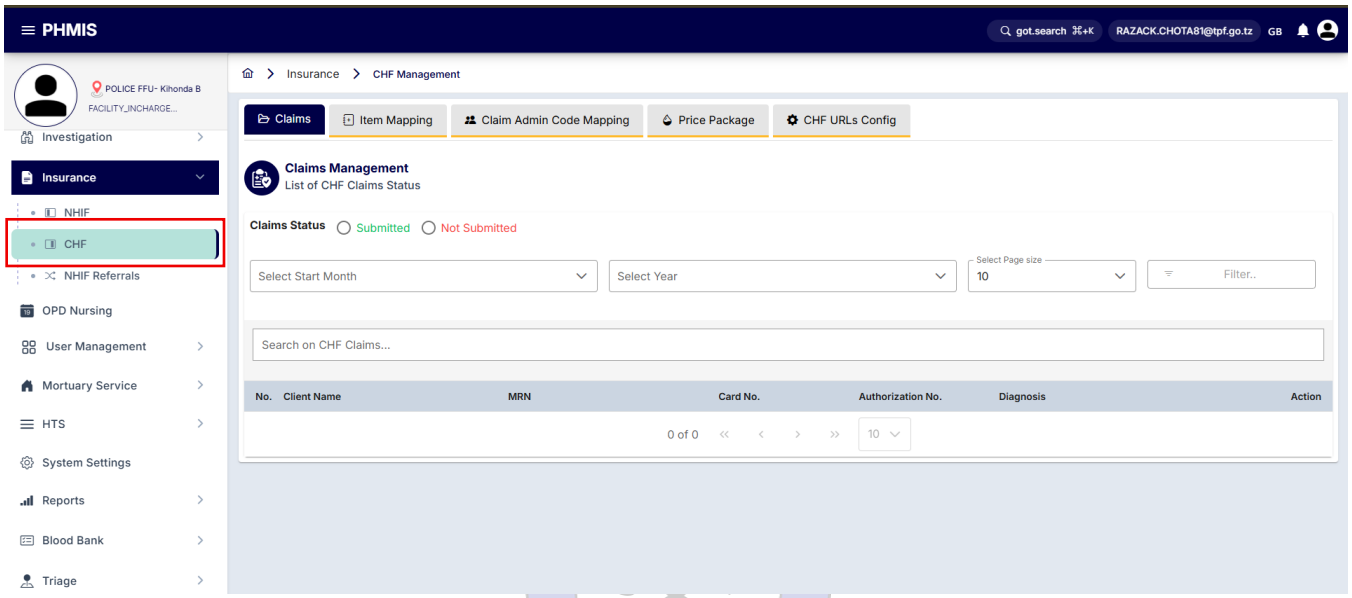
14.2 CHF

CHF Item Mapping:

i. Click Item Mapping, then search for the Facility Item by entering the name in the Search Facility Items field. Search the corresponding CHF item in the Search CHF Item field.

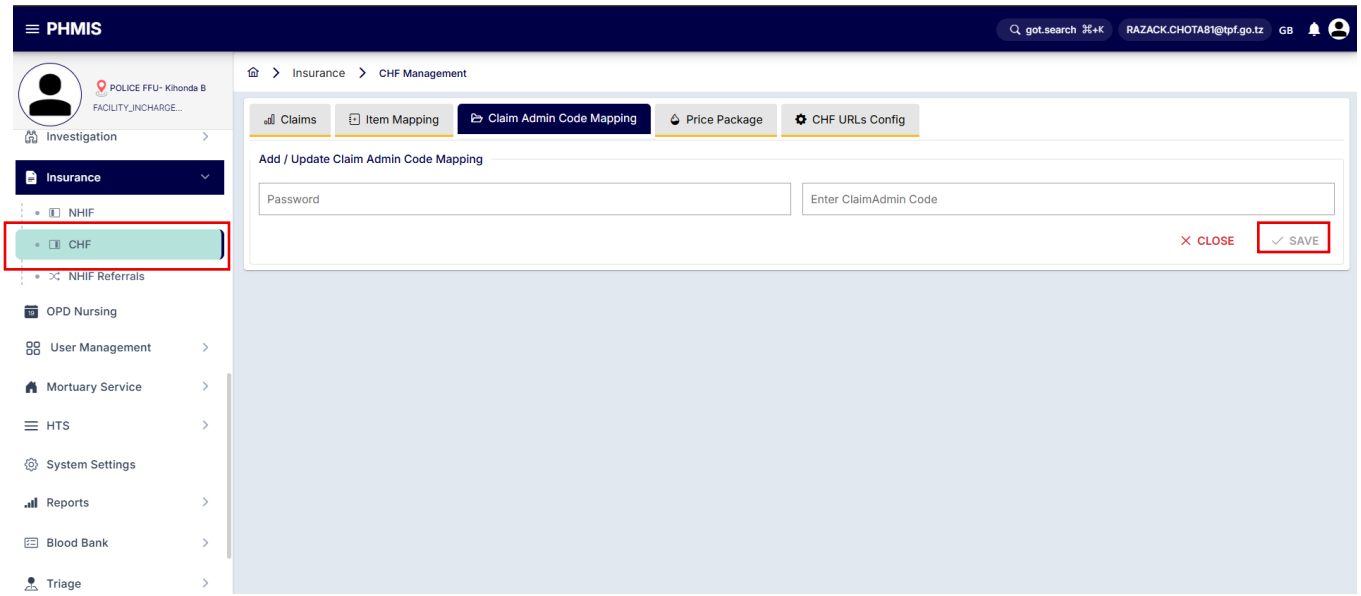
ii. Select the corresponding category and click Save.

NOTE: *Items searched in both fields must correspond to each other. Incorrect matching will lead to incorrect claim data.*



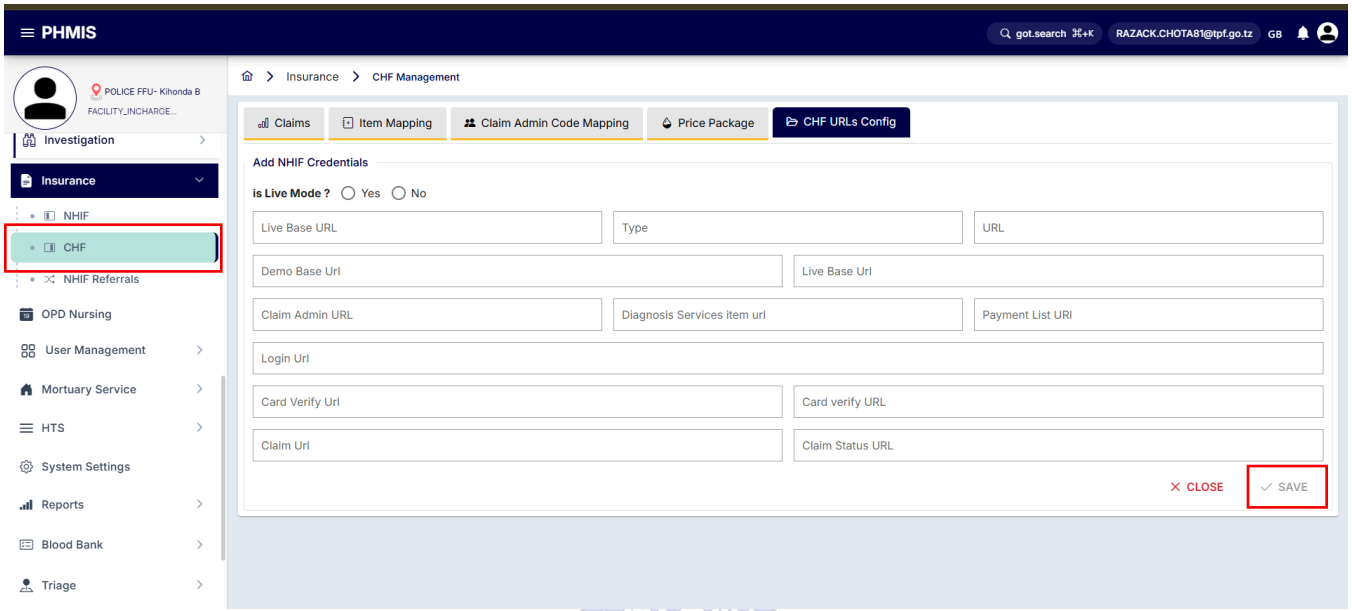
Claim Admin Code Mapping:

- Click CHF, then click Claim Admin Code Mapping.
- Enter the Password and Claim Admin Code.
- Click Save to store changes.



CHF URLs Configuration:

- Click CHF, then click CHF URLs Config.
- Fill in all required fields.
- Click Save to store changes.



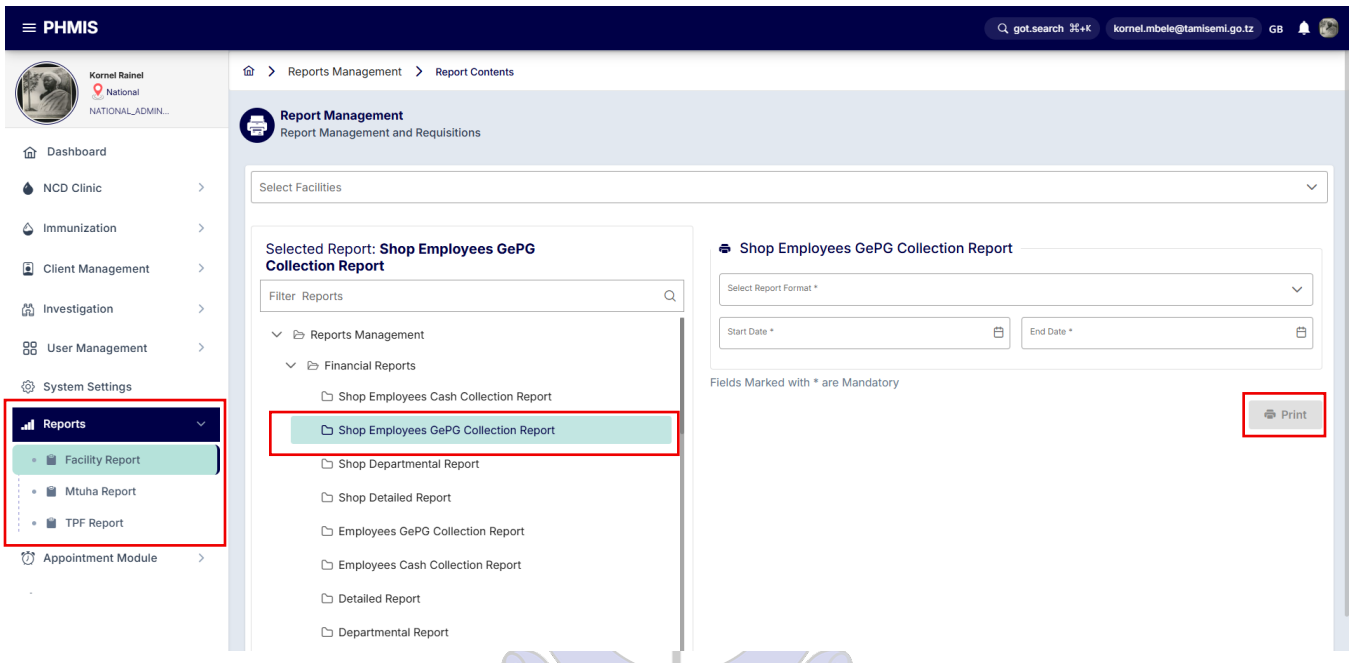
15.0 Reports

15.1 Facility Reports

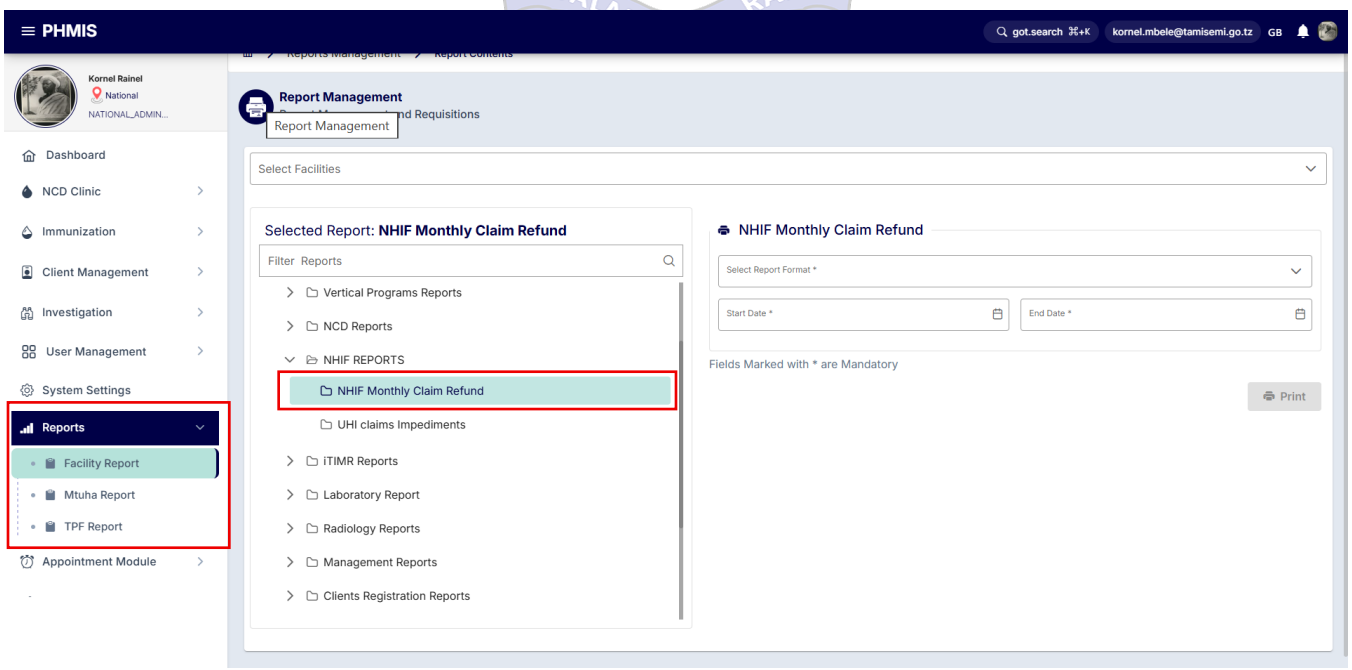
To generate facility reports:

- Click Facility Reports, then select the report category you wish to view.
- Select the report format, Start Date, and End Date, then click Print to generate.

NOTE: *All reports are generated through the same procedure.*



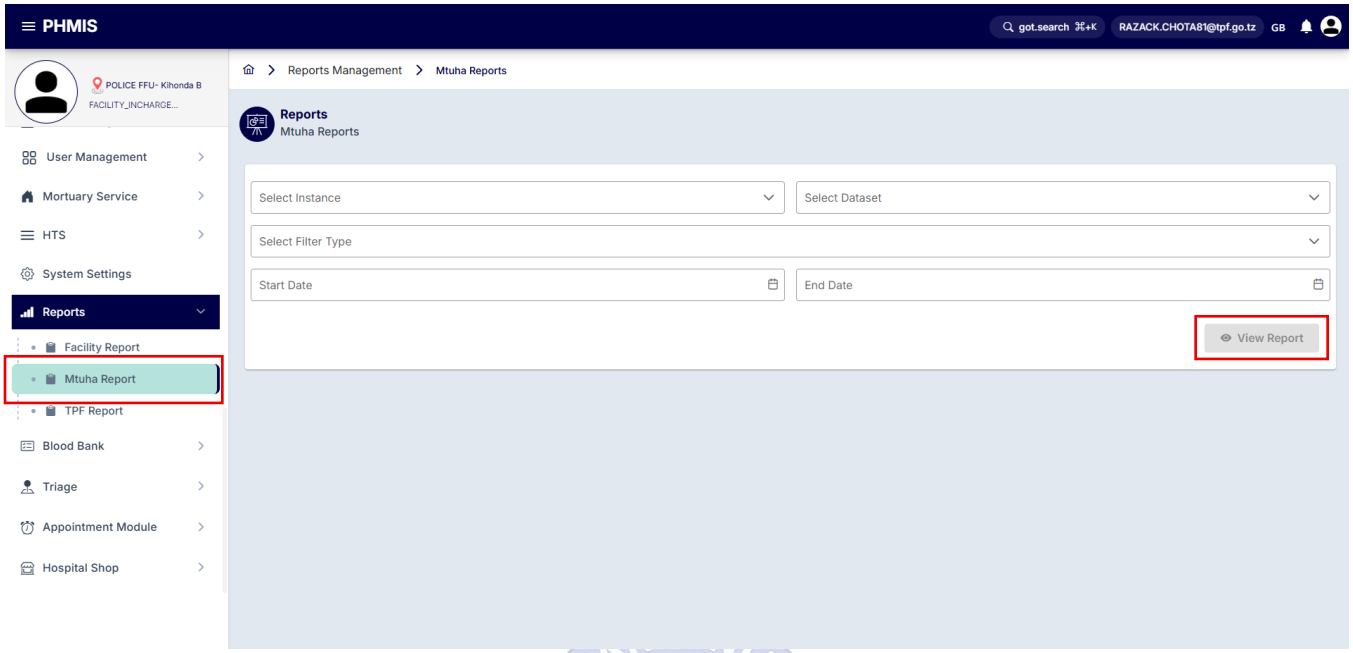
Different type of Facility Report;



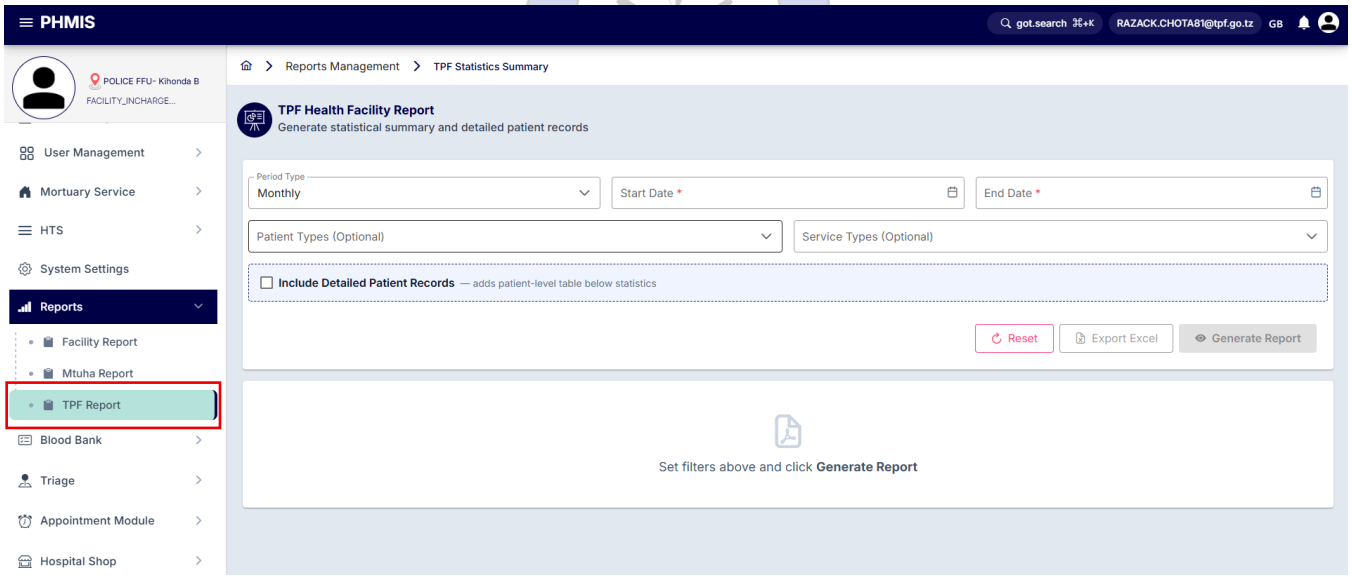
15.2 MTUHA Reports

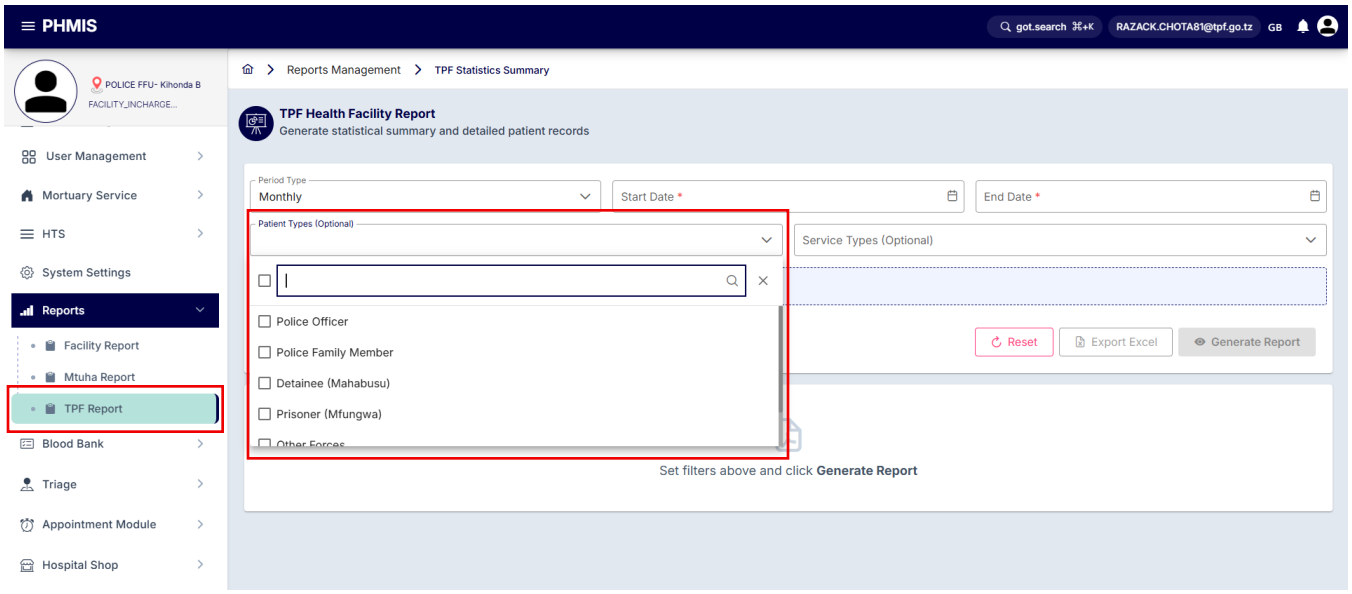
To generate MTUHA (Mfumo wa Taarifa za Uendeshaji Huduma za Afya) reports:

- Click MTUHA Reports, then select the instance, dataset, year, and periods.
- Click View Report to generate the report.



TPF Report;





Filter and then generate report;

Appendix: Module Quick Reference Summary

The table below provides a concise summary of all PHMIS modules, their primary functions and the user roles with access to each module.

Section	Module	Primary Function	Primary Users
1.0	Introduction and Overview	What is PHMIS and how to get started	All Users
2.0	Getting Started / Login	Access the system and manage passwords	All Users
3.0	System Settings	Configure facility, pharmacy, wards, billing, and users	System Admin, Facility Admin
4.0	Client Management	Register clients, verify cards, manage visits and referrals	Reception, Nursing, Medical Records
5.0	Bill Payments	Process bills, print receipts, manage cancellations	Cashier
6.0	Triage	Record initial patient vital signs and assessments	Nursing Staff
7.0	Outpatient Services	Conduct consultations, order investigations, prescribe treatment	Clinicians, Nurses
8.0	Inpatient Services	Manage admitted patients, nursing care, labour, discharge	Clinicians, Nurses
9.0	Reproductive & Child Health	Manage RCH services including ANC, PNC, vaccination	RCH Nurses, Clinicians
10.0	Pharmacy Management	Manage stock, dispensing, requisitions, expiry monitoring	Pharmacists, Pharmacy Technicians
11.0	Investigation	Collect samples, post results, approve, review, amend	Lab Technicians, Radiologists
12.0	Prime Vendor	Manage MSD OOS notifications and prime vendor orders	Pharmacy, Procurement
13.0	Mortuary Services	Register and manage deceased, cabinets, burial permits	Mortuary Staff
14.0	Insurance Management	NHIF and CHF claims, item mapping, credentials	Insurance Officers
15.0	Reports	Generate facility and MTUHA national reports	All Authorized Users

End of PHMIS User Manual — Version 1.0

For technical support, contact your facility ICT Officer or the PHMIS system support team.
